PREMIER BRUCE GOES DOWN TO SEVERE DEFEAT

PURGING OF TEXTBOOKS PROCEEDING

Hon. J. Hinchliffe Is Personally Revising School Manuals to Eliminate American Propaganda

CONSIDERABLE PROGRESS MADE

Elementary Grade Work Already Reviewed — Attention to Be Given to High School Books

IN the elementary schools of the province today there are only three United States books authorized to be used as supplementary readers, as compared with sixteen which were recommended for use, and which originated in the United States, when Hon. J. Hinchliffe assumed office as Minister of Education. But while sixteen United States books were on the list of those recommended as supplementary reading, there was, in addition to this, the fact that the teachers were not required to confine themselves to these books, but could go outside of the list and select any others.

This is the information that is given by the minister in answer to a query as to what grounds there were for the criticisms that were offered at the recent meeting of the Provincial Teachers' Association, held in Nanaimo, when it was represented by some that too many United States books were used.

SCRUTINIZING HIGH SCHOOL

What Mr. Hinchliffe has done in connection with the elementary schools he is following up in the high school courses and scrutinizing what can be done to correct the situation as far as the high school courses are concerned. The minister is making a personal investigation into the books used in the high school, and in doing so is carefully reading them in order to discover whether these are entirely satisfactory from the standpoint of British sentiment.

The rectifying of the conditions has been made possible by an amendment passed last session, which provides that all supplementary readers must be authorized by the Council of Public Instruction. Acting on this rule there has been a very complete review carried out by the minister respecting the books used in the elementary grades with corresponding alterations.

With a very limited time left following the passing of the amending legislation last session, no delay was allowed by the department in carrying into effect the objects sought after of removing all cause for criticism in the books authorized. In future, under this legislation, it will be possible only to use the books which the Council of Public Instruction authorizes.

In opposition the present Minister of Education was an active member of the House in the exercise of the greatest

Two Men Will Attempt Long Voyage

FROM Toronto to the Amazon, 3,600 miles, in a sixteen-foot skiff is the trip which Mr. Lorne Allen and Mr. R. Lambe, two adventurers, have commenced. They're just doing it the hard way, "the hick," they are. An ex-member of the "Mounties," has made the long water journey before—away back in 1902. He constructed the skiff himself, and is confident that it will see him and his partner through. The photographs here show: 1, R. Lambe; 2, the sixteen-foot boat; 3, Lorne Allen.

CHANGES FOR INDIAN ARMY SUGGESTED

Reorganization Under Reformed Indian Government May Follow If Policies Are Successful

AUTHORITIES ARE MUCH SURPRISED

LONDON, Oct. 12 (British United Press)—Sensationally the Indian army, under the control of the Indian Parliament, is an important result which will follow if the Nationalists succeed in bringing about the reformed type of government for India which they are promoting. The idea is not a new one, for it presumably to the Government of India Act of 1919 forecasts it.

However, the army authorities have never considered seriously the possibility of handing over to the Indian Parliament, and the present discussion of the matter takes them by surprise. Many objections have been made, chiefly from the standpoint of Empire defence, and the general attitude was that the army could not be fashioned before several generations at least.

Indian Nationalists, however, have suggested a scheme which eliminates many of the objectionable features of an Indian army from the British military point of view.

It is suggested that the Indian army should be divided into two sections, one to maintain internal order and the other for frontier defence. The first duty could be handled by the militia of the various provinces, which would be recruited and maintained somewhat after the fashion of the British territorials. The Indian army proper, containing both British and Indian troops, would be charged with frontier defence.

The provincial militia would be organized under native officers, holding what would be known as Dominion commissions. They would receive their training under the supervision of the Indian army, but could be under the orders of provincial ministers.

Premier MacDonald Spends His Sixty-Third Birthday in Quiet Manner in New York

NEW YORK, Oct. 13.—Free from official engagements, Rt. Hon. Ramsay MacDonald, British Prime Minister, observed his sixty-third birthday anniversary here today in quiet fashion.

Arising early, as is his custom, he received his first birthday gift from his daughter, Ishbel, who declined to tell him what it was, and then had breakfast with a few friends and some of the members of his party.

BIRTHDAY GREETINGS

Cablegrams and telegrams of congratulation poured in upon him, some coming from members of his family at Lossiemouth, and others from officials in this country and Great Britain. During the day he talked on the telephone with members of his family who are in London, this having been the second transatlantic call arriving at his suite since he arrived here on October 4.

In the afternoon the British statesman received a scroll from a delegation of Protestant clergymen, who voiced their appreciation of his efforts in the cause of world peace.

Accepting the gift with a graceful little speech, Mr. MacDonald said that in the last analysis "it will be the church that will back up our world peace efforts more than any one group." He added that there would be problems and plenty of opposition, "but we will win through eventually."

Addresses on behalf of the delegation were made by Mr. Stanley High, editor of The Christian Her-

Hop-Off This Morning Hope Of Russians

CRAIG, Alaska, Oct. 12.—After ten days delay, the four Russian aviators, flying the plane Land of the Soviets, hoped tonight to take off on the 450-mile flight to Seattle as a 4 a.m. tomorrow Pacific standard time. They expect to reach Seattle between 1 and 4 o'clock in the afternoon. The plane was forced down at Waterfall, October 2, about fifteen miles from here, a short time after it had left Sitka for Seattle.

The plane will follow Hecate Strait and the coastline of Vancouver Island to Cape Flattery and up the Strait of Juan de Fuca, to Puget Sound and Seattle.

TO TALK RESOURCES

REGINA, Oct. 12.—Dates for the proposed natural resources parley between the Provinces of Alberta and Saskatchewan has been set as November 25 and 26. The meeting is to be held at Edmonton will be attended by Premier J. T. M. Anderson, Saskatchewan, and Premier J. E. Brownlee.

ARMED POLICE GUARDING ON CAR DRIVERS

Guards Carrying Riot Guns Stand Vigil Over Storage Tanks in Unusually Violent Strike

SABOTAGE ACTS MARK OUTBREAK

NEW YORK, Oct. 1.—With police stationed every load and guards armed with riot guns standing vigil over storage tanks, the strike of gasoline oil truck drivers tonight went into a week-end deadlock while both sides made conflicting claims for the duration of the fight.

The strike started in Long Island City, Queens, on Saturday and spread rapidly through that borough to Brooklyn and Manhattan and Nassau County on Long Island. Near Hoboken, N.J., where the drivers were not on strike, an oil truck was tipped over and its load set afire after the driver had been forced to flee from three men.

RIOT GUNS USED

Similar acts of violence in the city brought out 1,000 police guards, 200 of them being concentrated in Long Island. Riot guns guarded the storage tanks of the larger oil companies.

The Truck Drivers' Union wants a weekly wage increase from $35 to $47.50, an eight-hour day, time and a half for overtime and recognition of the organization.

Ratepayers to Poll On Incorporation

PRINCETON, Oct. 12.—Decision to hold a poll on village incorporation was taken at a meeting of Princeton ratepayers. The poll will be arranged as soon as possible in order to allow the village to embark on the management of its own affairs on January 1, should the issue carry.

No Drinks After Twelve o'Clock in London Under Lord Byng

LONDON, Oct. 12 (British United Press).—Lord Byng, the new police commissioner, has made it nearly impossible to get a drink anywhere in London after midnight. Night club after night club has been closed in the West End for failing to observe London's drastic drink regulations.

The old speakeasies that once served thirsty customers after the public houses and law-abiding night clubs quit pouring alcohol illusions are now nearly all closed.

Two respectable clubs remain. But it is serious, even with a fistful of dollar bills, to try for a drink after the midnight deadline is reached. It just isn't done.

As a result London is a deserted city ten minutes after midnight. True, some of the clubs stay open until 1 and 2 o'clock, but only a few stragglers, drinking lemonade or sipping coffee, remain to dance.

Lord Byng's London is without night life.

Cradle of Man Is Contended to Have Been Cape

CAPETOWN, Oct. 12.—What South African scientists regard as fresh evidence that the Cape was the cradle of mankind has been discovered in a fossil skull discovered in a quarry near Capetown, by Professor Drennan, of Capetown University. It is said the skull is identical in features with those of aborigines of Australia and Tasmania, reputedly the lowest human type, corresponding to the Neanderthal race.

INDUSTRIES OF BRITAIN ARE WARNED

London Times Tell Manufacturers to Be "Prepared for Worst," in View of Threat to Lift Duties

EARNESTLY CALLS FOR CONFERENCE

LONDON, Oct. 12 (British United Press).—Urging British manufacturers to be prepared for the worst, in view of Rt. Hon. Philip Snowden's promise to remove the McKenna duties as soon as he could afford it, The Times editorially stresses the urgent need for an economic Imperial conference to discuss common fiscal problems. It deals trenchantly with Lord Beaverbrook's campaign for "Empire Free Trade."

"If the wanton abolition of preference worth £1,000,000 yearly, accorded to Dominion goods were to result in any diminution of Dominion preference worth seven times that amount accorded to British goods, the responsibility of the present Government would be very heavy.

"It must be confessed, however, that the optimism of those who see in these reciprocal preferences the beginning of so-called Empire free trade appears extremely precarious. They must persuade the British electorate to agree to a system of tariffs whose advocacy has hitherto invited electoral disaster. They must persuade the Dominions to give up their cherished and natural ambition to nurse secondary industries and to raise by other means a very large part of their revenue now derived from duties on British goods."

NO COMMON BARRIER

The Times proceeds to argue that a conception of the Empire as a single producing and economic unit does not depend on the encirclement by a common fiscal barrier, but rather on the mutual recognition of the "unification of productive assets."

Use, it believes that by a process of amalgamation or rationalization of industry industries in different parts of the Empire, much can be done to assure a rapid increase of population and promotion of the sale of Empire goods.

BRITISH SHIPS PAY VISIT TO TURK CAPITAL

Is First Call Made by British Warships on New Turkey of Mustapha Kemal, Famous Pasha

NEW GOVERNMENT SENDS GREETING

CONSTANTINOPLE, Oct. 12.—For the first time in history British fleet visited Constantinople today, the first call made by warships of Mustapha Kemal Pasha by the British navy.

Among the ships was the Queen Elizabeth, carrying Prince Arthur, who was believed to have carried the greetings of the new British Labor Government to the Turkish Nationalists.

The Turkish military museum at Seraglio Point contains shells shot by the Queen Elizabeth against Turkish forts at Gallipoli during the Dardanelles.

Much importance was attached here to the visit of British warships at this time. It was believed the Turkish Government invited the demonstration as evidence that Greece does not have a monopoly of British friendship in this part of the world.

It was suggested also that Great Britain hastened to accept the invitation, desiring a friendly Turkey bordering the Irak when that country is granted its full independence.

UNION HAS NUMEROUS PROBLEMS

B.C. Municipalities Convention Opening at Harrison Hot Springs Will Scrutinize Cost of Projects

ROADS LEAGUE TO ASSEMBLE FIRST

Problems of Legislation and Administration Will Be Discussed and Plans for Progress Studied

THE meeting of the Union of British Columbia Municipalities and the Good Roads League convention this week at Harrison Hot Springs will afford the opportunity for bringing forward recommendations to the Provincial Government and the Legislature which may call for added expenditures of money. There is now a growing tendency on the part of such bodies to be not too grudgy with their requests, realizing that the increase in the expenditures, if carried into effect by the province, means only in turn increased taxation.

After all the controllable expenditure by the Government is not very great. There is the machinery of government to keep going, and the fixed charges which must be met, leaving at the option of the Provincial Government only a very large amount that may be directed as it may be found advisable.

The city of Vancouver, which carries on its affairs under a special charter, is proposing to come forward with some amendments (Vancouver is the Municipal) Act. There have been many criticisms of that city seeking to direct the policy of the general act, when it itself does not fall under the provisions except in specified instances.

OLD AGE PENSIONS

One of these recommendations that may come forward will be a suggestion that the age at which the old age pensions may become operative be altered to sixty-five years instead of seventy as at present. While this is something which has been asked for before, it is

Rome En Fete in Celebration of "Columbus Day"

ROME, Oct. 12.—Flags and bunting were to be seen over all Italy today in honor of the anniversary of Columbus' discovery of America. Government buildings, churches and barracks were decorated as well as many cars and houses. Newspapers printed long articles dealing with the anniversary, some referred particularly recent discovery in a sixteenth century heraldic book of references and to prove the Italianity of Columbus, contending he was born in Genoa, a small town of Liguria, near Genoa.

Dirigible's Men Refuse to Go on North Pole Trip

FRIEDRICHSHAFEN, Germany, Oct. 12.—Dr. Hugo Eckener, commander of the Graf Zeppelin, confirmed again with the crew of the dirigible today on the projected North Pole trip, the latter repeating their objections to the venture.

Dr. Eckener assured them, particularly the older members of the crew, that every consideration would be given to their safety and comfort, commenting that the Polar flight probably would be less onerous than the world flight.

No agreement was reached, however, and it may be necessary to engage a fresh crew who will undertake the flight without reservations. It seemed probable some of the crew would recongider their attitude.

London Police Will Soon Be Able to Report by Wireless Phones

LONDON, Oct. 12 (British United Press).—The day is not far distant when a police officer on his beat will be able to communicate with headquarters by means of wireless telephony. For several years police authorities in various countries have been striving to effect this important link in the campaign against crime, and recent successful experiments in Paris are believed to have brought it within sight.

In the French capital, policemen equipped with wireless sets no larger than a pocket camera have been able to maintain wireless communication with their stations and, through them, with the entire police organization of the city.

Further tests are to be made, but the success already achieved, both in transmission and reception, leaves no doubt as to the value of the system.

Scotland Yard has obtained a number of sets from the French firm that manufactures them and will shortly conduct experiments in London.

DISMANTLING OF HALIFAX MAKES TALK

Regretted Information Leaked Out as It Is Considered Only Cloud in Otherwise Blue Sky

FEAR IRRITATION MAY BE CREATED

LONDON, Oct. 12 (British United Press).—President MacDonald's visit to Canada is exciting unusual interest here because of disquietude from three correspondents who are attached to Mr. MacDonald's party suggest that Canada has already cause for irritation. Sir John Foster Fraser, writing for The Daily Telegraph, says:

"It is a pity that information has leaked out that President Hoover turned his back with Mr. MacDonald to the subject of the defence of Halifax, N.S., because Mr. MacDonald was in no position to discuss them, although it was more than probable that he promised the President that he would raise the matter with Premier Mackenzie King when he sees him at Ottawa next week.

"That is just the way the harm can be done. Emphatic statements have been made causing national irritation in Canada, whereas the matter only cropped up during the conversation covering a wide review of the maritime question of the world.

"Mr. MacDonald has not committed the British Government or the Dominions to anything beyond the warmest desire to co-operate with the United States in building a better foundation than estate up day for the securing of world peace.

"This view is supported by officials here who believe that Premier MacDonald will be able to allay Anglo-American misunderstanding. Mr. J. H. Macdonald, of the B.C. Manufacturing Co., Ltd., of New Westminster, Mr. Robert Abernethy, of Burrns Rawsplain fully to Mr. MacDonald, and Mr. Kingsmill, of the B.C. Manufacturing Co., Ltd., of New Westminster, Mr. Robert Abernethy, of Burrns Rawsplain fully to Mr. MacDonald, and Mr. Kingsmill, of the B.C. Manufacturing Co., Ltd., of New Westminster, have been selected as the sales amalgamation.

This mission follows the grant of a big subsidy from the Canadian Government to the Australia-B.C. Shipping Co., Ltd. and has been aided by a financial grant from the Provincial Government for trade extension purposes.

Australia imports 600,000,000 feet of lumber annually, and British Columbia's share of this in the past has averaged between 30,000,000 and 40,000,000 feet.

POLICE CHIEF OF FERNIE RESIGNS

FERNIE, Oct. 12.—Charles Anderson, chief of police here for the past seven years, tendered his resignation to the board of police commissioners at a special meeting last night and it was accepted, effective at the end of the month. He will assume similar duties at Kamloops. Applications for a successor will be received October 24, and the salary will be $200 a month.

LABOR GAINS CONTROL IN AUSTRALIA

Bruce Government Defeated at Polls by Large Majority in Battle Over Arbitration Measure

THREE MINISTERS ARE REJECTED

Mr. J. H. Scullin Will Form Administration With Large Following in House of Representatives

MELBOURNE, Oct. 13 (Sunday, Canadian Press Cable).—The fifth Labor Government since the Commonwealth of Australia was formed in 1901, will be in power as a result of the Australian general elections yesterday. James Henry Scullin, who assumed leadership of the Labor Party only eighteen months ago, will be the new Prime Minister.

The Nationalist-Country Party coalition Government under Prime Minister Right Hon. Stanley Bruce, was swept from power after deferring precariously for eleven months, defeated on its proposal to abolish the Federal Arbitration Court and relinquish jurisdiction over most Australian labor disputes to the state courts.

IN NO WAY UNCERTAIN

Australia upheld the principle of federal arbitration in no uncertain manner. The standing of parties so far as could be definitely judged today, will be as follows: Labor, 58; Nationalists, 14; Country Party, 6.

"We are defeated, but we can take it like gentlemen," said Premier Bruce today. He had been in office since 1923, but the Labor Party had been gradually recovering its old-time dominance. It has been in the forefront of Australian politics since 1901.

One of the most interesting features of the coming session will be the attitude of three former Nationalists who seceded from the Government party on the Labor issue and helped to defeat it. These were Right Hon. W. Hughes, M. Hughes, famous for his bold leadership as war-time Premier, who was re-elected with an overwhelming majority in North Sydney; Lieut. Walter Marks, Wentworth, and Mr. George A. Maxwell, Fawkner. These three are included in the estimate of the Labor Party's total.

"Are you sorry you married the man you did?" asked one dear thing at least. I've had some fun making him even sorrier than I am that I did."

A young couple were married in the Lake Shore Star State, and to due time were blessed with an heir. Soon after they moved to Twin Falls and later were staggered by the arrival of twins. Once again they moved, this time to Three Lakes, and the Lord showered them with triplets. Thereupon, while the father of the twelve-year-old prodigy stood moaning his fate, a friend sympathized with him by suggesting that it wasn't so bad after all—he might have moved to the Thousand Islands.

PURGING OF TEXTBOOKS PROCEEDING

Continued from Page 1

care in the selection of textbooks that were placed in the hands of the students of the public schools. At times he had criticism to offer with regard to some of the books introduced, and it was his hope to have wherever possible books produced in Canada or in Great Britain used by the pupils.

ACTION AT ONCE

The assuming of office has not in the least altered his views on the subject. He is now in a position to carry to fruition the principles which he advocated when in opposition. This he is doing without loss of time, and already changes have been made.

Some criticism was offered the department at the recent convention of School Trustees held in Nanaimo, when the suggestion was made by one of the delegates that nothing was being done to rectify the complaint that too many foreign books were used in the schools. It was stated that in Grade I there were nineteen books authorized for supplementary reading, while or these ten were of British and Canadian production, and nine were produced in the United States.

In meeting this criticism, Mr. Hinchliffe points out that now, following his investigations, there are authorized for supplementary reading in Grade I thirteen books. Of these, eleven are Canadian and British and two are United States publications, as compared with the ten Canadian and British and nine from the United States as formerly.

The minister explains that his action in omitting the use of two United States books was actuated largely by one of the books, that these two books were used in nearly every school in the province. If they had been eliminated from the list it would have left most of the schools without any supplementary readers in the grade.

In Grade II, when he assumed office, Mr. Hinchliffe found twelve books recommended. Of these, six were of British and Canadian origin, while six were from the United States.

The minister has now authorized eight books, and of these seven are British and Canadian, and one only of United States production.

From Grade II on some of the books authorized are other than British and Canadian. Formerly, in Grade III, there were four British and Canadian books recommended and one from the United States. Now six, all of them British and Canadian, have been authorized by the minister.

GRADES IV, V AND VI

Continuing, there has been authorized by the Council of Public Instruction, upon the recommendation of Mr. Hinchliffe, four British and Canadian readers for Grade IV, three of the same origin for Grade V, and two for Grade VI.

The minister referred to the expressed opinion at the trustees' convention that suitable history and geography textbooks could not be obtained in Canada and suggested that prizes should be offered for the production of suitable ones.

In these studies the minister pointed out that all the textbooks prescribed for constant use in the different grades in the elementary schools are British publications.

There had been objections raised to a certain history, Cragg's, but this book had been superseded and, before the convention met, a new history was in use. There had been a replacing of Channell's History of Canada and the History of England, which were objected to, by two texts, books which were free from the objections that had been raised against the former ones.

In the line of history and geography there had been added eight books in the line of reference works to be used by elementary schools, and all of these were British and Canadian works.

The minister pointed out that in the carrying out of any changes which were made, the department was faced with the problem of having to do so without interrupting the educational machinery. The work in the schools must be kept going without hindrance while the changes were worked out. This meant that great care had to be observed to see that the educational work was not in the least checked.

MATHEMATICS BOOK

While little or nothing had been carried into effect in the high school curriculum there had been some changes wrought. Thorndike's Junior High School Mathematics had been Canadianized and had been reprinted with the alterations which made the application of problems provincial rather than pertaining to the United States. This book had been printed in the Government printing office.

The minister is now giving his personal attention to the high school course, and will later announce the changes that he deems wise to make.

A circular letter is being sent out by the Department of Education referring to the changes that have been made, and instructing teachers, school boards and inspectors along the line of the alterations in the act and the changes made in books which now must be authorized by the Council of Public Instruction. This letter from the superintendent of education reads as follows:

"This circular letter is issued to call the attention of school boards, teachers and inspectors to certain important changes respecting supplementary readers, which have been made by and under an amendment to the Public School Act, passed at the recent session of the Legislature. This amendment provides the supplementary readers must be authorized by the Council of Public Instruction. Formerly, supplementary readers were chosen by the individual teachers and no restrictions regarding the choice were laid upon them, so that if a teacher thought fit every supplementary reader in his school or class might be of foreign origin.

"Since the beginning of the present term only such supplementary readers as are duly authorized by the Council of Public Instruction may be used in the schools of the province.

"Under that amendment, a list of authorized supplementary readers was made which has supplanted the list of books formerly recommended but not authorized. A list of such authorized books was duly forwarded to the school boards of the province, and one is enclosed herewith for you. It is hoped that the school boards and the inspectors will co-operate with the teachers and see that only supplementary readers that are authorized are being used.

"The department would not advise any school board to stock or renew their stock of supplementary readers of foreign origin, even though they may be on the authorized list for the time being, as such books will be discarded as soon as the department finds it advisable, practicable and beneficial to do so."

LABOR GAINS CONTROL IN AUSTRALIA

Continued from Page 1

Possibly three of Premier Bruce's ministers lost their seats: Hon. W. G. Gibson, Postmaster General; Hon. Sir Neville Howse, Minister of Health, and Hon. C. W. C. Marr, Minister for Home and Territories.

LABOR'S STRONGHOLD

New South Wales, as expected, proved the stronghold and the rallying point for the Labor Party, which captured twenty-two seats in that industrial state to four for the Nationalists and one for the Country Party. Victoria elected eleven Laborites to five Nationalists and four Country Party members. These were not final official figures, but were comparatively accurate.

The heavy poll—voting is compulsory—and the fact the election was immediately followed by Sunday, tended to make definite compilation of the returns slow.

PREMIER-ELECT

James Henry Scullin, leader of the Australian Labor Party, who is expected to be called upon to form a Government as the result of Labor's victory in Saturday's election, was first elected to the Australian House of Representatives in 1910, representing the constituency of Corangamite, Victoria, until 1913. For nine years he did not sit in the House, but was elected in 1922 to represent Yarra, Victoria.

He was re-elected in 1928 and in this election was unopposed.

On the resignation of Mr. Matthew Charlton in April, 1929, occasioned because of Mr. Charlton's ill- health, Mr. Scullin, then deputy leader of the Labor Party, became its leader and immediately began to infuse life into the party.

It was said at the time the real reason for Mr. Charlton's resignation was the result of intriguing against him to replace him by a more active leader.

PREDICTED VICTORY

Mr. Scullin is recognized as one of the best debaters of Australia as well as a sound financial critic. Mr. Scullin predicted the victory of the Labor Party on October 8, when he declared there was a pronounced swing to Labor and that the Labor Government would be the first Britain had immediately helped the Australian Labor Party.

Among the well-known Labor leaders probably elected to the Commonwealth Parliament are Hon. Joseph A. Lyons, former Premier of Tasmania, and Hon. Edward G. Theodore, former Premier of Queensland. Both headed Labor administrations in their respective states, and their inclusion in the prospective Scullin Government is regarded as probable.

The probable election of former Premier Lyons in Wilson, Tasmania, where he is leading by 1,300 votes, will be a gain for the Labor party which, however, may lose Indi, Victoria, where the Labor candidate is running second to the Country Party nominee.

Mother—"No, Bobbie, I can't allow you to play with that little Kim boy. He might have a bad influence over you."

Bobbie—"But, mother, can I play with him for the good influence I might have over him?"

"Don't you take any notice of 'im, mate. 'E's not all there."

"Well, if 'e's not there is like wot 'e is, it's just as well 'e's not all there."

THE charred remains of a Jewish homestead in the town of Mekora Sharon, in Palestine, which is now in the actual control of the Bedouins shortly before the British troops reached this part of the Holy Land.

Premier MacDonald Spends His Sixty-Third Birthday in Quiet Manner in New York

Continued from Page 1

ald; Bishop Francis J. McConnell, president of the Federal Council of Churches of Christ in America, and Rev. Dr. S. Parkes Cadman, former president of the Council.

MR. CHURCHILL CALLS

Visitors who called on the Premier to extend their respects and birthday greetings included Rt. Hon. Winston Churchill, Chancellor of the Exchequer in the Baldwin Cabinet, who is in this country on a lecture tour, and Mr. Adolph Ochs, publisher of The New York Times. Mr. Churchill and the British Prime Minister, long political antagonists, spent a pleasant half hour together.

"A King James version of the Bible containing the beatitudes, and the reference to peacemakers, was presented to Premier MacDonald today by the American Bible Society.

In presenting the Bible, Mr. R. Francis Hyde, president of the society, said that one of the first gifts to the Pilgrim Fathers after their landing in 1618 was one from the British and Foreign Bible Society in Great Britain, "almost at the moment that the War of 1812 was over. The Bible is a great agent for peace, he said.

TAKES LONG DRIVE

After lunch Mr. MacDonald took a long drive up Riverside Drive, beyond the tomb of Grant, and on his return he had an engagement for dinner with Sir Joseph Duveen, an art dealer.

Tomorrow will be a quiet day for the Premier and his daughter, Ishbel. They will motor into the country to the home of Miss Lillian Wald, director of the Henry Street settlement, and a close personal friend, who was Miss MacDonald's companion in this city at the time of her father's serious illness at Philadelphia two years ago.

RECEIVES ARAB LEADER

During the afternoon he received Ameen Rahahbi, who represented himself as leader of the Arabs in the United States. After the meeting Rahahbi said the Prime Minister had assured him there would be an impartial investigation of the recent disorders in Palestine. This was the same assurance Mr. MacDonald gave yesterday to a Jewish delegation.

It was learned at the hotel that the Prime Minister will receive, at 10 o'clock next Wednesday morning, while in Toronto, a delegation from the American Federation of Labor, now in convention there. Mr. MacDonald declined the federation's invitation to attend the convention sessions, but later sent a message which was interpreted as a reversal of his original decision.

It was learned today, however, that he plans to receive a delegation of the labor men rather than be received by them in their convention. The decision not to attend the sessions was reported. It was discovered, however, Mr. MacDonald is making his journey as the Prime Minister of Great Britain rather than as head of the Labor party, and also because of lack of time.

UNION HAS NUMEROUS PROBLEMS

Continued from Page 1

along the line of making the age limit, then seventy, at which, under circumstances that has rendered a pension prematurely old, there always arises the question of the added costs of maintaining the Superannuation Fund, therefore, be asked of the municipalities that if such a request was to be granted, municipal corporations in turn be prepared to step in and assist in the financing.

ROAD FINANCING

Hon. N. S. Lougheed, Minister of Public Works, will represent the Government at the gatherings and will address the Good Roads Convention on Tuesday. It is anticipated that he may have a special message for the towns of good roads when he speaks before them.

The question of financing certain roads which are serving the whole of the province rather than the municipalities through which they pass is one that has been before the minister for some time. He has given a great deal of attention to the subject, and may be expected to touch upon this matter. There is, of course, the financial aspect of such a policy, and this must ever be present in the minister's mind.

An agitation has been started in some directions looking to the increasing of the gas tax as a means for the obtaining of the needed capital for this added undertaking on the part of the Province. It is possible the minister may have something to say along this line.

Hon. J. Hinchliffe, Minister of Education, is to address the convention if he is able to attend. The minister has been confined to his bed for some days, having been threatened with an attack of pneumonia. He is now recovering, and expects to be able to attend the gathering early in the week.

Mr. Robert Baird will attend the convention as inspector of municipalities.

AT ROADS LEAGUE

There will be an address by Mr. Philip, deputy minister of public works, on the subject of roads and the control of their users. Mr. A. L. Carruthers, superintendent of bridges for the province, will speak also on the subject of bridge and culvert upkeep.

The gathering is expected to be largely attended. Many of the members of the Legislature have signified their intention to attend the meetings which open tomorrow morning. During the progress of the convention a meeting of the Municipal Officers' Association, which embraces the permanent staffs, will be held.

Alderman W. H. Cullin left yesterday afternoon en route to the convention. Alderman Marchant will leave this afternoon, and Aldermen Worthington and Mr. T. Hunter, city clerk, will leave this evening. Mayor Anacomb and Alderman Harvey will drive over tomorrow.

The surrounding municipalities will be well represented at the meeting. Reeve William Crouch, Councillor Stubbs and Mr. R. B. F. Jewell, municipal clerk, will appear for Saanich. Oak Bay will be represented by Reeve Cross, Councillor H. W. Paterson and Mr. R. F. Blandy, municipal clerk. Reeve James Elrick and Councillor Alexander Lockley will attend for Esquimalt. Mr. Lockley is a former president of the union.

Stop Irish Girls From Dance With British Soldiers

LONDONDERRY, Ireland, Oct. 12—Thirty Londonderry girls, en route to Lemain last night where they were going to dance with British soldiers, were stopped by armed men and stripped of their clothing and shoes.

The bus in which the girls were riding was stopped and the girls' apparel was taken from them and burned. The men then compelled the bus driver to proceed, leaving the girls to walk home. It is believed that the incident was caused by the resentment of extremists who objected to the girls dancing with British troops.

DISMANTLING OF HALIFAX MAKES TALK

Continued from Page 1

while, with the result that causing some concern because they represent a small cloud in an otherwise very blue sky.

HALIFAX FORTIFICATION

WASHINGTON, Oct 12 (Canadian Press)—Prime Minister Mackenzie King probably will be asked by Prime Minister J. Ramsay MacDonald whether his Government would consider the reduction of fortifications at Halifax, the forthcoming visit of the British Premier to Ottawa will furnish a good opportunity for personal discussion of a number of matters which have been touched upon between Mr. MacDonald and President Hoover.

The general impression here is that one of the topics which will be brought up by the head of the British Government will be the armament at Halifax, the reduction of it understood it is meant the removal of effective batteries.

More important than the Halifax fortifications, however, is the great power, more important at least in the view of the American public, are the British naval bases in Bermuda and the West Indies. The major depots are in Bermuda and Jamaica, and their mount only six-inch guns. In the event of war, the Panama Canal has been stressed by the American press, and it would be considered by the lay public a notable gesture were these islands demilitarized completely.

Mr. MacDonald will also probably canvass the views of Mr. King and his Government on the general question, which attaches to prohibition enforcement in the United States, the smuggling problem.

There's a Difference in Cabinet Heaters

and the difference is largely inside the enameled cabinet.

Before you think of buying any cabinet heater, let us show you Sunbeam's furnace-type cast iron heating unit; its 54-pound fire pot; its gallon capacity water pan for air moistening; its dust-tight and smoke-tight construction. Then you'll know why this superior cabinet heater will heat a 5 to 7 room home, upstairs and down. And remember, *Sunbeam prices today are the lowest in history.*

See us today. We're talking quality, and price.

ENVOY FROM JAPAN LANDS IN VICTORIA

Hon. Iyemesa Tokugawa, K.C.V.O., Arrives on Empress of France and Proceeds to Ottawa

IS TRAVELING UNOFFICIALLY

Expressing pleasure on his appointment as minister from Tokio to Ottawa, Hon. Iyemesa Tokugawa, K.C.V.O., gave his first interview in the salon of the Empress of France, immediately after the arrival of the white liner yesterday morning from the Orient.

On being asked if it was his first visit to Canada, the new minister stated that he had passed through Canada on his way to Washington in 1921, but did not know it well enough to make any statement in this connection. Before any further questions were forthcoming, Mr. Tokugawa expressed interest in the MacDonald-Hoover conversations by asking if there were any new and important developments. On being told of what had been made public in connection with the visit of Premier MacDonald to the United States during the past twenty-four hours, the minister went on to state that Canada and Japan were enjoying a period of most cordial relationship, which he was going to do his utmost to maintain. Both countries were identified with the development of the Pacific, and their interests were accordingly linked together. Both wanted peace and the liberty to pursue their destinies. Not only Canada and Japan, but all the countries bordering on the Pacific must co-operate in maintaining friendly intercourse and trade, and to this end the general good of all should be the first consideration. To Canada and Japan, as they were among the older nations on the Pacific, belonged the great privilege of promoting and furthering this most desirable condition. To this end, Canada and Japan must primarily get to know each other well. The requirements, economic and otherwise, of one another, should be understood, so that any little differences which might occur from time to time, could be satisfactorily adjusted with honor to both countries.

MUTUAL UNDERSTANDING

"On arriving in British Columbia, it occurs to me that I might emphasize this point concerning mutual understanding, because this province is really Japan's nearest neighbor, not altogether because it holds the greater part of the Japanese population in Canada, but because of the fact that all the trade winds we now enjoy with your people, and hope to increase in the future, must enter its ports and pass between its boundaries.

"I must proceed to Ottawa almost at once, leaving Monday. I hope to come back to British Columbia soon, and will do so whenever the opportunity presents itself. Once I have presented my credentials at Ottawa, then I shall be free to participate in official functions—a pleasure I am not privileged to enjoy at the present moment.

"In the meantime it is my intention to devote considerable time to studying the Canadian people and their requirements. This I consider the most important phase of my duties just now. Apart from my efforts to maintain friendly relations with the Canadian people, the development of trade between our countries will also engage my attention."

MR. MARLER'S ARRIVAL

Questioned as to the Canadian minister's arrival and reception in Japan, Mr. Tokugawa stated that he had met Mr. Marler on several occasions, and was sure he would prove very successful, bringing credit to himself and contributing to the better understanding of the two countries. The Japanese Cabinet were delighted with such a highly representative Canadian as had been sent to their country to represent Canada, and have already taken steps to do him honor in his capacity as minister.

Mr Tokugawa speaks perfect English, is of middle height and typical of the modern advanced Japanese gentleman. Quiet speaking, soft of voice and courteous, the representative of the Japanese Emperor to Ottawa would appear to be a very forceful personage as he addressed the assembled group of newspapermen on the Empress of France.

Other Kuomintchun forces, fighting under the standards of Marshal Feng Hu-Hsiang, were said to be moving on Hankow by way of the Peking-Hankow railway and Western Honan.

The Nanking Government announced yesterday that it was sending a punitive expedition against Feng.

James Bay P.T.

The James Bay Public School Parent-Teacher Association will hold its monthly meeting on Monday evening, commencing at 8 o'clock, in the auditorium of the South Park School, when plans will be made for carrying on the activities of the association during the Fall and Winter. A full attendance of all parents and teachers interested in the three schools of the district is requested—South Park, Kingston Street and Beacon Hill.

$108,030 IS ESTATE VALUE

Mr. Edgeworth U. Reid, of Victoria, Who Died in June Last — Leaves Big Sum to Widow

OTHER ESTATES PROBATED HERE

Mr. Edgeworth Usher Reid, of Victoria, who died here on June 16, 1929, after a lingering illness, left an estate totaling $108,030, the probate of his will being issued out of the Supreme Court of British Columbia at Victoria last week.

The deceased's estate consisted chiefly of $101,000 in bank stock, $2,324 cash in bank, $2,000 household goods, and an automobile valued at $1,000.

Practically the entire estate was bequeathed to the widow, Mrs. Delphina Sylvester Reid.

The late Mr. Reid had been a resident of Victoria for several years, coming here from Kobe, Japan, after retiring from active business. His death occurred at the family residence, St. Patrick Street, Oak Bay.

Other probates and administrations issued by the Supreme Court here during the week ending Saturday, October 12, were as follows:

Joseph W. Kay, late of Brooklyn, New York, who died on May 18, 1928, at Brooklyn; total estate, $1,739,131; British Columbia estate, $26,000.

Simon Billing, late of Victoria, who died at Victoria on February 22, 1922; estate, $2,365.

Lem Long, late of Colwood, who died at Victoria on September 28, 1929; estate, $624.

BELMONT BLOCK IMPROVEMENTS WILL BE MADE

Messrs Cross & Company, agents for Belmont House, state that following the recent visit of two of the directors of the company who own the Belmont Building, it has been decided to at once instal water, gas and compressed air in almost all the rooms of the building, and to prepare new curved lines, Sizes 32 to 36.

FRANCE TO BEGIN NAVY DISCUSSION

PARIS, Oct. 12—It is authoritatively learned that France will begin conversations with Great Britain and Italy in an effort to prepare the basis of the London naval conference and to determine and harmonize if possible the respective standpoints.

It is said that this is in keeping with the text and the spirit of the conference invitation issued by the British Government this week.

THE FLOWER OF REMEMBRANCE

As the years go by efforts strengthen towards the making of Armistice Day a more and more memorable anniversary in the annals of time. The more distant the perspective through which the Great War is viewed, with all its sufferings and glories, the better it is possible to estimate how momentous a turnpike it proved on the road of history. Within a month Armistice Day will have come around once more, marking the eleventh anniversary of the cessation of an epochal struggle which is the outstanding memory of the present generation. Soon that generation will have passed, but it is leaving to its successors a legacy of courage, of sacrifice and of will power, the memory of which will shine undimmed through ages yet unborn. In the preservation of that memory the veterans of the Great War are performing a suitable work. They deserve every human co-operation in a task of preserving what must always rank among the highest traditions of the race.

This year a more intensified effort than ever before is being made in this community to forward the sale of poppies—those frail but indelibly associated with the Fields of Flanders—so that from the proceeds the cause of the returned men may benefit. Throughout the schools of the community the poppies will be distributed to every child, irrespective of whether he or she contributed to the cause. This the rising generation will be reminded of the greatest pages in latter-day history and of the crucible of suffering through which their parents passed. The churches are taking up the plea for commemoration through the sale of poppies, so that those who still carry with them a legacy of physical care and sorrow because of the Great War may derive direct benefit. Yet a third effort on the part of the Armistice Period Committee is an arrangement whereby it will be possible for the families of those who lost dear ones on the battlefields of the Great War to purchase poppy wreaths to lay at the base of the War Memorial in Parliament Square. The Armistice Period Committee undertakes that, after Armistice Day, these wreaths will be removed from the War Memorial and placed on the graves of the returned men who have died since the day of battle, and whose last resting places are in the cemeteries at Ross Bay and Royal Oak.

These are methods of intensifying the memory of Armistice Day and all it signifies that should touch the heartstrings of our people. This city, during the years of crisis, bore its share of the war task and contributed freely of its manhood and womanhood to the cause. The legacy of duty arising from the most momentous era of a century past is still with us. It is ours in this age of reconstruction, to heal the gaping wounds of sacrifice, to ameliorate the lot of those who fought and suffered, to bring a measure of relief into the lives of all who passed through the Valley of the Shadow, and returned, in many cases more broken than others, to take up peaceful avocations once more. Help can be given them by the measure of the remembrance brought to bear on what Armistice Day signifies. The poppy is the flower of remembrance. It should be worn on every coat lapel and in every bosom on November 11.

HABITS OF CENTENARIANS

The Centenarian Club of London has decided to collect particulars concerning the habits and modes of life of people in the British Isles who have lived to be centenarians, and their endeavors will be followed with considerable interest everywhere, since everybody, according to Talleyrand, wants to live long, while nobody wants to be old. The object of the effort is to obtain facts from those who have lived long in the most diverse circumstances of life, that may throw light on the conditions most conducive to longevity.

There are many records of people who were said to have lived for considerably more than a hundred years. Thomas Parr, for instance, was reported to have died after a dinner party at Lord Arundel's, at the age of one hundred and fifty-two, and the Countess of Desmond died, it was claimed by falling from a cherry tree in her one hundred and forty-sixth year. There is nothing to show that in the present day, with more exact data available, such great ages are ever reached. On the contrary, the hundred years are seldom exceeded in human life, and centenarians are few. There were in England and Wales at the last census in 1921 only 110 of them, in the proportion of thirty males to eighty females, and the number is apparently dwindling in 1881, for the population, number of centenarians came out in the census returns at 141; in 1891, or ten years later, it was 146, while in 1911 it was 128, so that the most recent figure of 110 is the lowest in five decades. The object will be to trace this small number and obtain information from them.

Whether men and woman who have lived to advanced age have been constitutionally strong or weak, have married or remained single, indulged in or abstained from alcohol or tobacco, worked strenuously or followed a life of ease, are all factors that count. Take a few of the octogenarians. Mr. Gladstone became Prime Minister for the fourth time at the age of eighty-two and lived to be eighty-nine. He was constitutionally one of the strongest men and owed much to the care of his wife. He ate freely but moderately, but did not smoke. Sir Ray Lankester, who has just died, led a strenuous life in the world of science. He had severe illnesses and suffered from bronchitis. He never married. Lord Penzance, remembered as a great ecclesiastical judge, though weak in middle life, died at the ripe age of eighty-one. Then there is the experience of octogenarians still living Sir Walter Runciman, the shipping magnate, now eighty-two, gave as his advice a short time ago to young men: "Marry early and don't join clubs. The greatest thing is to discover your destiny and do your best to achieve it." Sir Oliver Lodge, another apostle of work, has argued that in these enlightened days men should live not at three-score years and ten, but a century. He is in his seventy-ninth year and still active. Sir Albert Spicer, another keen worker, who has turned the eighty-second milestone, has just declared that his success has been due to hard work, good fortune and good friends. Sir James Chrichton-Browne, the great authority on mental and nervous diseases, is still active at the age of eighty-nine, and has just recommended all to take good wholesome food and "behind-time behind it the tradition and experience of countless generations." Then we have Earl Balfour and Viscount Peel, "Father of the House of Commons," not to speak of Thomas Alva Edison (still doing sixteen hours' work a day), showing in public no abatement of energy.

The proposed inquiries of the Centenarian Club seem to be really worth while. They may lead to tabulated facts, guiding principles, and practical suggestions, which, all, who desire to live long, will assuredly study, and some possibly endeavor to follow.

VANCOUVER LOOKS AHEAD

Sea Island, to be the site for Vancouver's airport, is located slightly less than ten miles from the heart of the city, but it is served with good roads so that no undue delay is anticipated in transporting passengers and freight to and from departing and arriving airplanes. The citizens are to vote next December on a by-law to provide a sum of $200,000, an amount required for the preparation of runways, for buildings, and for wharves and floats to handle seaplanes. The money for the purchase of property has already been voted. A year ago the citizens approved the expenditure of $300,000 for the purpose. Thus the provision of the facilities for Vancouver's land and seaplane base is to cost a half million dollars.

Vancouver has decided on a plan capable of future extensions and developments. The committee of the City Council responsible is showing vision commensurate with the growth of the port and the progress of aviation. Mayor McGeer has taken up with Ottawa the desirability of the establishment of an air mail service between Vancouver and Seattle, and such will undoubtedly be established early. The new airport is to be equipped in an up-to-date fashion, including accommodation for those industries which are necessary for its maintenance and which should be located on the spot. It is believed that ultimately the airport will be self-supporting through rentals. The two main essentials that have governed the decision affecting location are; ample acreage to provide miles-long runways for the land planes, and, secondly, a large area of smooth and practically land-locked water free to the operations of seaplanes through the absence of other traffic.

Hamilton, Ontario, is to be the scene of the first Imperial Games, to be held in August of next year. The event will draw athletes from all over the Empire and the proposal is that such games should be held every two years. These games will not interfere with the Olympic games which is scheduled for 1932. An Empire Olympiad is an event which will grow in popular favor and undoubtedly prove the means of promoting greater athletic prowess throughout the British realm.

In New York the record of crime detection is one for every fifty-six murders. Whatever the United States is, it is not a nation of detectives.

WANDERLUST OF BIRDS

We call ours a restless age among men; but even Lindbergh is a stable stay-at-home compared to some of the birds. And no one has yet satisfactorily explained the phenomenon of these migrations of millions. Why do the birds that dwell in the Arctic go to the Antarctic, and not vice versa? Why do most of the birds of the Northern Hemisphere make these long annual trips, while the birds of southern is an unknown in the Southern? What makes the birds so restless long before the cold weather comes and the food supply gives out? Is it some strange, inherited pre-glacial memory? That is a hypothesis, but it only suggests another mystery; for how explain such memories in birds, and not in the king of the beasts, man?—New York Herald-Tribune.

Art is human activity having for its purpose the transmission to others of the highest and best feelings to which men have risen.—Count Leo Tolstoy.

Note and Comment

By R. B.

A representative of the embittled farmers of the Prairies has issued a curt and peremptory warning to all and sundry that the action of the Wheat Pool must not be discussed in a spirit of criticism. Unfortunately, we must comment upon the situation created by the Wheat Pool, but not in a spirit of criticism (unless the phrase be beyond our competence) before the warning was issued, and possibly our comment would not have been forthcoming if we had read the admonition before the comment was printed. The action of the Pool has arrested the attention not only of Canada, but of the whole world, and what are we to be permitted to comment upon if not upon something that is the subject of world-wide discussion?

The Wheat Pool has been invested with or has arrogated to itself a position of great importance, but it has not the authority to gag the public and suppress comment upon its position. The representatives of the Pool claims the organization has done the right thing and that no course of action other than it has done will be amply justified by results. We did not say the Pool had done wrong thing. We treat it has done the right thing. But we did point out the immediate effect upon the general business of Canada of the action of the Pool in storing its wheat and withholding it from market.

That effect is of course the sole business of the Pool and of the wheat growers who hold that their product is worth a certain price and that they will not sell it for less than that figure. Representatives of the Canadian farmers claim that while the British millers are buying wheat of an inferior quality from Argentina, Australia, Germany and other countries at a price much below the value of Canadian wheat, the supply from those countries will soon be exhausted, and the millers will then be compelled to come to Canada and buy wheat at the arbitrary prices fixed by the Pool.

When that time comes the Pool will not permit its wheat to pour from storage in a flood, thus bringing obsolete competitive conditions into action and depressing prices. It will dole the wheat out in sufficient volume to meet the actual requirements, thus maintaining the established standard of values. Then the temporary business depression in Canada will be succeeded by a sustained period of abounding prosperity, and the foresight of the Pool will be acclaimed from one end of Canada to the other.

There is therefore no reason to wonder why the action of the Prairie Wheat Pool has arrested the attention of the whole world. If the action of the Pool should be justified by results, the whole economic fabric of the world has undergone a momentous change. Business is no longer to be based upon a competitive basis. Business is going to be done upon a co-operative or co-ordinative basis. Men are no longer going to market in haggle about prices, as was in Far Eastern bazaars do at the present time, and probably a few men of obsolete views also do in many other markets even at this time. We believe there was a time when purchasers enjoyed going to market for the purpose of haggling, even of quarreling, about prices. That custom has been, or is going to be abolished. Everything will be ticketed at a fixed price. Take it at that price or leave it.

In the meantime John Bull, who is a greedy consumer of wheat and meat products of all kinds and cannot produce nearly enough of such things to meet his requirements, and still believes in the old system of arguing and bargaining about prices, has doubtless been making notes of the action of our Wheat Pool. That he has reached the point where he must at the price fixed and has procured sufficient for his immediate needs in other countries. What will John ale to himself when our Wheat Pool has created a famine in his land and proceeds to dole out food to his sons and daughters in limited quantities and at prices which are not determined by the natural business law of supply and demand but by an arbitrary decree of a committee?

The representative of the Wheat Pool is grievously mistaken if he thinks discussion of the situation created by the action of the Pool is suppressed. It is an extraordinary and unprecedented situation. The people who are most concerned in it at the present time are the railway and steamboat employees who have been thrown out of employment and will be idle throughout the Winter. Business in general is interested in it, because it has created at least a temporary business depression. If the embittered farmers should be victorious, the interest will be more intense, because a new business procedure will be established and the world will realize that old systems are indeed passing and giving place to new ones. As one commentator said after surveying the situation produced by the war, "nothing can ever be the same again."

NEW OFFICERS ARE SELECTED

McBride Conservative Club Names Panel for Ensuing Term

At the annual meeting of the McBride Conservative Club, held in the Rose of Sharon Hall last Wednesday evening, the members were given to know from the reports of the officers who had guided the fortunes of the club during the year, that the club changed its officers.

President Lancaster said he be lieved it in the best interests of harmony for the party that a complete slate of new officers should be elected, and in this the secretary, Mr. C. Ralph, and the treasurer, Mr. H. Callow, concurred, in order that the two factions might have a better opportunity of uniting to bring the other back to its former standing within the party ranks.

Secretary Rigby reported that all the old members of the club, except two, were still with the old club, and that the membership roll would soon reach 100 members. He said that the policy of the old club was to support 100 per cent the Conservative Government in power, and its constitutionally-elected members.

Treasurer Callow in his report, said that all outstanding accounts had been paid, and that he would open a small balance to hand over to his successor.

The following were elected to office for the coming year: President, G. A. Turner; vice-president, J. T. Clark; secretary, W. F. Godwin; treasurer, T. Rigby; executive committee, A. Lancaster, C. Rigby, H. Callow, Mr. L. Burns, A. D. Wakeham and William Thacker.

A vote of thanks to retiring officers was tendered to the retiring officers for their whole-hearted application to their duties, and the incoming officers each addressed the club with a few remarks.

Letters to the Editor

We invite to the Editor will be inserted when they are of a length and express the opinions of the writer. This rule admits of no exception.

SNEAK THIEVES

Sir:—May I encroach upon your valuable space for the purpose of calling attention to those interested that Halloween is fast approaching.

As a reminder of the fact I have already been made the victim of either a senseless prank or a sneak thief, for, in my estimation, it is classed as a good citizen. Between Thursday evening and Friday morning a tubular iron gate at the side entrance to my premises was taken off the hinges and has not been seen since. A tubular iron gate of the description interwoven with wire, with ornamental top and painted green, somewhat the worse for wear, is not of much value, except in its proper place, so that the intellect of the party who took it may be judged therefrom by the value of the article taken and the manner thereof.

This matter has been reported to the police and should anyone know of the whereabouts of this gate so that I can have it delivered, I would be glad if they would kindly communicate with the city police or with the writer.

Perhaps the party who had the nerve to pilfer the gate will have the nerve to utilize it in the face of this letter.

If, however, it is the result of overanticipation of the coming event by young people, there is yet time for parents to warn their children against wanton damage and destruction of property, and incur no loss which may otherwise be prevented.

H. W. MILLER,
562 Toronto Street, Victoria, B.C.

The Rhyming Optimist

By Alfine Michaels

NEW DAY

Here dawns another day. Forget
All past days' folly and regret.
And only look ahead to see
The fair, fair sweet the new day can be!
Learn with what confidence assured
The prayers that failed at twilight's end
Now dawns the day that yet may bring
Your fairest hopes to blossoming.
Toil on in faith; by this day's noon
Life may confer the long-sought boon;
No more be downcast or forlorn,
New courage with new day is born.

The sunlight's glory richly lies
Along the grass. The new day's skies
Are tranquil as an island sea.
Cast off old fears; be free, be free
To rise in strength of hope and will
And this day's promises fulfill!

COMMISSION STUDIES IN WASHINGTON

Irrigation Inquiry Investigates Methods in Fruit Growing Areas of Neighboring State

VALUABLE DATA HAS BEEN SECURED

Mr. Sanford Evans, the commissioner appointed by the Provincial Government for the conducting of a full inquiry into the questions associated with the horticultural situation in the Okanagan, has been spending some days, accompanied by Mr. W. W. Dowson, director of markets for the province, and Mr. J. O. Thomson, secretary to the commission, in the State of Washington investigating there subjects similar to those which are the basis of the investigation now in hand. Wenatchee and other fruit growing districts were visited and careful inquiries made into the methods employed there.

Fruit packing methods were inquired into by the commission. They were informed of the custom of packing for separate local units, so that the fruit of each community could go its own merits, and of the custom of breaking pools as to closing dates to give growers of early producing districts the premium advantage they are entitled to on Winter Bananas, Jonathan and Early Delicious. This practice obtained at the beginning of the season, pools were closed each Tuesday and the calculations they were informed. Early season pools have been in operation in Washington as well as British Columbia fruitgrowers, it developed.

Asked as to the Washington experienced with Jonathan and other varieties, Mr. Myron Foster, president of the Northwestern Fruit Exchange and a leading fruitgrower, said that in the orchards he was interested in, the Jonathan the problem had been solved by picking for color and—Delicious pickings are sometimes made to remove the fruit when it is in prime condition. Apples too low on the sunny side of the tree break down from sunscald, Mr. Foster stated, while an apple that is shaded and does not attain color upgrade of the variety will remain firm for a long period.

IRRIGATION

Another subject which attracted attention was that of irrigation as practised on the Washington side. In this connection the commission was aroused in the pumping of water for this purpose from lakes such as existed in the Okanagan to land at considerable altitude above the source.

Particular inquiries were on the subject of pumping water from high bench lands, and information regarding costs and experience was gathered as to plants in communities in the Wenatchee district serving lands from 100 to 500 feet above the source of water supply, either for continuous seasonal use or for part-season use in conjunction as auxiliary supply. The information gathered was of special interest in connection with possible recommendations regarding the extension of irrigation by installation of pumping along the chain of lakes in the Okanagan valley district.

PUMPING PLANTS

Efforts to provide electric power for pumping purposes in Washington for pumping purposes Mr. M. T. Foster told the commission, was probably the most important thing the Government could undertake to aid in solving problems of low production and lack of water supply. Mr. Foster volunteered to assist the commission in making investigations at Wenatchee.

Data on high-lift pumping plants was given by Mr. Harry T. Kerr. The visitors were somewhat amazed at the pumping costs that had been proven feasible and assurances that sample data could be obtained covering the operation of many plants that served land at elevations high above the source of supply.

LOCAL BREEDERS ARE SUCCESSFUL AT SHEEP SHOW

Reports from the second annual fair and sale of sheep held under the B.C. Sheep Breeders' Association, held last Wednesday, proved a decided success. The Minister of Agriculture, Hon. W. Atkinson, officiated at the opening and expressed his pleasure at the excellent showing of sheep. The exhibits were widespread, coming from all parts of the province.

Among those who were represented by stock at the fair and sale were a number of Vancouver Island breeders. In the Hampshire class Mr. George Spencer, of Sidney, was represented and appropriated among the prize winners. In the Shropshire class, Captain J. G. Greves, of Westholme, appeared among the prize winners, and in the sales a ram bred by him headed the list in point of price. Mr. M. Herron, of Kalowna, paying $42.50 for it.

At the close of the event a number of interesting addresses, among with Hon. William Atkinson and had before him many concerning instances of losses by coyotes, urging extermination of bounty on this pest.

Tom—Has your gardener taught you anything?

Dick—Yes; I'll never again believe that we reap what we sow.

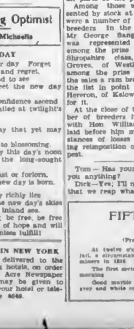
FIFTY YEARS AGO TODAY

(From The Daily British Colonist, October 13, 1879)

At twelve o'clock yesterday there was not a single Indian in Victoria (but, a circumstance unknown before, since the settlement of the Province in 1843. There are forty-six prisoners, (no of Whom are Chinese).

The first occasion of more of the season left at Langford Plains yesterday morning.

Good mettle from Beaver Cove quarry is arriving in the city, in black, grey and white colors.



THE Mouse Tower on the Rhine, opposite Bingen, Germany, is the scene of Longfellow's famous poem. It is one of the beauty spots of Germany with its background of terraces and the ruins of Ehrenfels Castle. There is little foundation for the legend that Bishop Hatto was eaten by rats in the Mouse Tower

PREMIER WILL ADDRESS GYRO CLUB MONDAY

Hon. S. F. Tolmie to Take Part in Founder's Day Programme — Round Table Meets Tuesday

FATHER WOOD AT KIWANIS MEETING

CLUB CALENDAR

MONDAY — Gyro Club, Empress Hotel grill-room, luncheon, 12.10 p.m.
TUESDAY—Kiwanis Club, Empress Hotel ballroom, luncheon, 12.10 p.m.
TUESDAY—Round Table, Empress Hotel, supper, 6 p.m.
THURSDAY—Rotary Club, Shrine Temple, View Street, luncheon, 12.10 p.m.
FRIDAY—Gaudiens Club, Dominion Hotel dining-room, luncheon, 12.45 p.m.

Hon. S. F. Tolmie, Premier of British Columbia, will address the Victoria Gyro Club tomorrow at its weekly luncheon meeting in the Empress Hotel grill-room, commencing at 12.10 p.m. Tomorrow will be observed as Founders' Day, and an interesting programme in connection with that celebration will be presented.

"The French View on Reparations" will be the theme of a discourse which Comte Jean De Buannet will give at the supper meeting of Ye Loyal Knights of the Round Table, on Tuesday night at 6 o'clock, in the Empress Hotel.

Rev. Father Anselm B. W. Wood, rector of St. Joseph's Church and a member of the Kiwanis Club, will be the speaker guest at the Kiwanis Club luncheon on Tuesday, at 12.10 p.m. in the ballroom of the Empress Hotel.

The Rotary Club will hold its luncheon next Thursday at 12.10 p.m. in the banquet hall of the new Shrine Temple, View Street, by invitation of Mr. Walter Luney, Potentate of Cliffe Temple.

The Kumiuks Club will hold a series of community bridge parties this week at the homes of different members of the organization.

C. CREED FACES ASSAULT COUNT

ACCUSED CHARGED WITH OCCASIONING GRIEVOUS BODILY HARM

Chinese in Hospital With Severe Injury to Right Eye. Court Told —Hearing on Thursday

Claude Creed was charged before Magistrate George Jay in the city police court, yesterday with assaulting a Chinese, Lee Clim, on October 11, and occasioning him grievous bodily harm. He elected summary trial, and entered a plea of not guilty.

Mr. Richard O. Lowe, acting in an advisory capacity to Lee Clim, informed the court that the Chinese was at present in hospital, and was suffering from a severe injury to the right eye. The condition of the wound indicated that an instrument must have been used on the Chinese, Mr. Lowe declared.

Mr. Lowe presented a certificate from Dr. A. E. McMeiking, which stated that Lee Clim was under his care at St. Joseph's Hospital, and, that in his opinion it would not be advisable for him to attend court for several days.

Magistrate Jay approved a request that the case be remanded until next Thursday, when, it is expected, the Chinese will be present in court in connection with the proceedings against Creed, the accused.

The accused was taken into custody by Chief of Police John Pitt and Constable J. Wesley Harper.

LIBERAL LEADER IN ONTARIO LAYS DOWN GAGE TO PREMIER

KINGSVILLE, Ont. Oct. 12.—Will Premier Ferguson tell the people of Ontario the revenue from the Liquor Control Act for the fiscal year 1928-29 which ends October 31, the day after the provincial election?

This was the challenge issued here last night by Hon. W. E. N. Sinclair, Liberal leader. It was by way of reply to Premier Ferguson's challenge to him to say whether he favored a return to the Ontario Temperance Act.

The Liberal leader said the Premier had charged him with want of courage. He now had an opportunity of displaying some real courage himself if he had any. The Premier knew what the figures were and the people of the province were entitled to this information.

SLIGHT FOOD CHANGES AFFECT THE BODY TREMENDOUSLY

My grandniece weighed less at eight months than at birth, due to "Infantile eczema." Was plastered with ointments and unhatched for seven months—entire household exhausted from lack of sleep. I added vegetable juice to each bottle feeding, nothing more. After two days she slept fourteen hours without waking. Ointments then discontinued, baths resumed. No rash, no tickling in four years since. Why? Vegetable juice alkalinized her blood, killing the acid-caused eczema. Alkaline Roman Meal has kept her blood alkaline since.

Alkaline Roman Meal also saved my life when the great Cold hit me twenty years ago I could not live four months. Now at 75 (not two per cent of me) 30 have muscles, strength or endurance equal to mine built up out of alkaline Roman Meal. I'll send you a free booklet, "HOW TO KEEP WELL," and other literature, if you'll write for it to ROBT. O. JACKSON, M.D., 218 Vine Ave., Toronto 4, Ont., or write for free sample of Roman Meal. (Adv.)

NEW CHANCELLOR OF QUEEN'S INSTALLED

KINGSTON, Ont. Oct. 12.—The installation of Mr. James A. Richardson, of Winnipeg, as Chancellor, succeeding Right Hon. Sir Robert Borden, and an address by Sir William Clark, British High Commissioner at Ottawa, featured the Autumn convocation of Queen's University held tonight. The honorary LL.D. degree was conferred upon the new Chancellor by Principal Taylor, and those of Sir William Clark, High Commissioner of the United Kingdom, Ottawa, and Mr. John W. Dafoe, F.R.S.C., editor, Manitoba Free Press, Winnipeg, by Chancellor Richardson.

JAPAN MAY RAISE EMBARGO ON GOLD

TOKIO, Oct. 12.—Juichi Tsushima, Government financial commissioner, will sell for New York, arriving there about October 31, to conclude preparations for lifting of Japan's twelve-year embargo on gold exports.

After negotiations in November with New York bankers and Washington officials, he will continue to London for similar negotiations there in December. The press today predicted he would attempt to negotiate contracts with New York and London banks to enhance funds to be at the disposal of the Bank of Japan.

President of Catholic Truth Society

REV. MARTIN JOHNSON
President of the Canadian Catholic Truth Society, Ottawa, who has accepted presidency of the Catholic Truth Society of Canada to succeed Rev. J. J. Burke, who was forced to resign on account of stress of other activities.

ACCUSED ELECT SPEEDY TRIAL

HADDON AND BARERA TO BE TRIED WEDNESDAY AFTERNOON IN COUNTY COURT

Both Face Theft Charge—Assizes Will Open Tuesday, With Two Trials on Calendar

Wilfred Haddon and William Barera will stand trial before His Honor Judge Lampman in the County Court here on Wednesday afternoon October 16, at 2:30 o'clock, on charges of stealing two Winchester rifles and a shotgun, the property of Ernest Morry, William Morry and Charles Keown, from a motor car standing outside the Coach and Horses at Esquimalt on Saturday, September 21.

The two accused, who have been in Oakalla prison since they were committed for trial on September 24 by Magistrate George Jay in the Esquimalt police court, yesterday elected speedy trial before Judge Lampman, and the date of trial was fixed. Mr. W. B. Colvin represented the Attorney-General's Department.

As Haddon and Barera did not elect trial by jury there will be only two cases at the Criminal Assizes, which open here on Tuesday next at 11 o'clock at the Provincial Court House, with Mr. Justice Murphy presiding. Mr. William C. Moresby, K.C., will be the Crown prosecutor.

D. Marks, of Chemainus, will stand trial at the assizes on a charge of stealing goods and chattels from J. R. Smith, valued at $610, between October 26, 1928, and January 31, 1929. This case has been traversed from the Nanaimo assizes to the Victoria assizes. Mr. Arthur H. Fleishman, of Vancouver, will be the counsel for the accused.

Herbert George Delamont, former ship's barber aboard the Sa. Empress of Russia, will be tried on a charge of being unlawfully in possession of opium at Victoria on June 11, 1929. Mr. Stuart Henderson will appear as defence counsel at the trial.

ENDOWMENT LANDS REPORT TO HAVE PROMPT ACTION

The return of Hon. P. P. Burden from the North and the closing up of the field work in connection with the P.G.E. resources will be followed by the Minister of Lands giving special attention to the University Endowment lands question as reported on by Mr. A. N. Darkin, the special commissioner, who investigated the matter of the Point Grey subdivision.

The minister will give the report, which is a voluminous one, a careful study and later will present it to the full executive for consideration. It will be a little time before the Government is prepared to announce its attitude on the subject.

Obituary

SHEPHERD—The funeral of the late Alfred Oliver Shepherd took place from Hayward's B.C. Funeral Chapel yesterday morning, at 10.30 o'clock, Rev. H. P. B. Luttrell officiating in the presence of several friends and relatives. The hymns sung were "Lead Kindly Light" and "Jesus, Lover of My Soul." Many beautiful floral offerings were received and placed on the casket and hearse. The pallbearers were A. Shepherd and C. Shepherd, sons of the deceased, and J. Davidson and O. Francis, friends. The remains were laid to rest in Royal Oak Burial Park.

GRAY—The remains of the late Miss Florence Mary Gillies Gray were laid to rest yesterday afternoon in the family plot at Ross Bay Cemetery, the funeral taking place from Hayward's B.C. Funeral Chapel at 2.30 o'clock, Rev. Dean Quainton officiating. The hymns sung was "Abide With Me," Many friends were present, and a large number of beautiful floral designs were received and placed on the casket and hearse. The pallbearers were A. D. Crease, E. E. Wootten, Major O. M. Roberts, H. A. McLean, Gavin H. Burns and Richard Jones.

WALKER—There passed away in the city, on October 12, Stephen Kenneth Walker, infant son of Mr. and Mrs. Robert James Walker, of Vancouver, B.C., aged one year and born in Vancouver. The remains are reposing at Hayward's B.C. Funeral Chapel until Monday, when they will be taken to Vancouver for interment.

TOC H MEETING

The Toc H guest night for the month of October will be Tuesday evening, October 15. The meeting will be held at 8 o'clock in the Toc H Qrp. 52, Harlem Street. Mr. F. B. Shoemaker, of the T.M.C.A., will be the speaker and guest of the evening.

A Distinguished Collection of
COATS for FALL

TO achieve fashion distinction this season one's coat must follow the lines of the new silhouette. It must be suavely "Princessed" and correctly flared to be in keeping with the mode of the hour.
You will find a very complete selection of the new coats at this store. Coats of fine Broadcloth, Kitten's Ear, Ripple-Sheen, Bragancia and Camotex, all, of course, with luxurious furs worn in the ways endorsed by fashion leaders. Prices are from
$35 to $75

Fur Coats
A good Fur Coat is an investment in years and years of beauty. And because the Coats at this store represent the pick of a great designer's stock they are particularly desirable. All furs are represented. All prices from
$75 to $400

The New Evening Frocks
The sweeping ankle-length mode is shown in its most fascinating effects in this splendid collection. Frilled, tiered and bouffant effects in a host of the new colors and lovely fabrics. Prices are as moderate as fine quality and workmanship permit.
$25 to $75

DUNCAN INVENTOR SECURES PATENTS

Automatic Signaling Device for Closed Cars Is Designed by Mr. Arthur Dandridge

Mr. Arthur Dandridge, of the British American Auto Schools, Duncan, has secured world patents on an automatic signaling device for closed cars. The outstanding feature of his invention is the fact that it is operated by lowering or raising the window.

When the window is closed, the hand hangs idle. To signal a stop, the driver lowers the window an inch or so and the arm automatically gives the correct sign. Signals for right and left turns are secured by lowering the window farther. For no signal need it be opened more than five inches.

HOW IT WORKS

The device consists of a semaphore pivotally mounted on a small bracket extended from the upper hinge of the driver's door. A projection catches a small clip attached to the top of the window and simple lever action, with the pivot as fulcrum, follows movement of the window, which is raised or lowered by the usual hand crank.

For night driving the hand will be illuminated, the light coming on automatically when the signal is moved.

The device is small and neat and can be attached in a minute. It being only necessary to remove the bolt in the upper door hinge and replace it with a slightly longer one that will also hold the signal in position.

INTERFERES WITH NOTHING

One of the points Mr. Dandridge claims for his invention is that it interferes in no way with the ordinary operation of the car. Its main purpose is to save the setting received when signaling in rain.

Mr. Dandridge has now perfected his model and hopes to interest some manufacturer in it. With mass production, he believes that it will sell for no more than two dollars.

NEW FOUND DRUG INFLUENZA'S FOE

LONDON, Oct. 12.—A new drug was termed last night by the well-known British Medical Journal "The most valuable agent discovered" for treatment of influenza. It quoted investigations made by Dr. Raymond Price, of Halifax, Yorkshire, as giving striking proofs of its efficacy.

The average duration of fever was 1.4 days in treated patients against 2.8 in untreated, headache persisted for one day as against 3.1 days. Muscular pain was relieved in 1.3 days against 3.4. Days abed were reduced from 3.7 to 2.8 and days absent from work were reduced from sixteen to 5.3. It was claimed that an early initial dose completely prevented attacks.

MANY ATTEND AT FUNERAL OF MR. CASTLETON

Member of Pioneer Family Here Dies at Seattle After Residence of Forty Years —Was Well Known

IN ACCIDENT FOUR YEARS AGO

There passed away in Seattle at the family residence, 4023 Second Avenue, N.E., on Saturday evening, October 5, Mr. Arthur R. Castleton, third son of the late Richard and Sarah Ann Castleton, pioneer residents of Victoria, who left Gravesend, Kent, England, on the sailing ship Kosmos Morrison on August 16, 1852, arriving in Victoria January 18, 1854.

Mr. Castleton was born in Victoria on May 1, 1863, and was educated at St. Louis College. He went to the Dougall Foundry to learn his trade as an iron moulder and later he worked at the Albion Works.

Mr. Castleton moved to Seattle about forty years ago and for twenty-five years was employed at the Washington Ironworks, where he made, among other things, the fluted columns which are now a part of the Rialto Building front. Mr. Castleton was a member of the old Volunteer Fire Department in Victoria, and also of Seattle.

He was a enthusiastic hunter, took a keen interest in fishing and a great lover of flowers and fond of sports, being a member of the first Y.M.C.A. crew in Seattle. He is used to play cornet in the band in Victoria and also played in the old Cordray Theatre in Seattle.

He is survived by his wife, Anna M. Castleton, in Seattle; one son, William W., and three grandchildren in Portland; two sisters, Mrs. P. Williams Horne, of Sooke, Mrs. John Lovell Smith, of Shawnigan Lake, and one brother, Frederick Castleton, manager of the H. C. Funeral Co. (Hayward's Ltd.), Victoria.

Mr. Castleton was a member of Court Vancouver Lodge, No. 2110, A.O.F., Victoria, also Tent No. 8, Knights of Maccabees, and Iron Moulders' Union, Local No. 163, Seattle. He was secretary-treasurer of the Iron Moulders' Union for twenty-five years until ill-health forced him to retire, the outcome of an accident, having been knocked down about four years ago by a motor car.

The funeral took place from the Butterworth Mortuary on Wednesday at 2 o'clock. The Rev. Dr. W. J. Major conducted the services at the chapel and graveside. Three solos were sung by Mr. Owen Williams, accompanied on the organ by Mrs. Williams. The solos being "Lead, Kindly Light," "Nearer, Will Be Done" and "Nearer, My God, to Thee." The very large attendance of friends and the many beautiful floral offerings received from Victoria, Seattle and other Sound cities testified to the high esteem in which the late Mr. Castleton was held. The following acted as pallbearers: Messrs. W. B. Allen, S. P. Payne, Earl Thompson, Harry Cousins, John Brown and Arold Daniel. The remains were laid to rest in Lake View Cemetery, Seattle.

Obituary

STEWART—There passed away on Saturday morning at St. Joseph's Hospital, Archibald Stewart, aged eighty-eight years, of 141 Beach Drive. He is mourned by one son, W. B. Stewart, of Mount Tolmie, and three daughters, Mrs. J. A. Flatfield, with whom he resided; Miss A. Stewart, and Mrs. A. Chisholm, of 1146 St. David Street, also by eight grandchildren. The funeral will take place on Monday afternoon at 2 o'clock from McCall Bros. Funeral Home. Interment will be made at Royal Oak Burial Park.

ROBB—A large number of friends attended the funeral service of the late John A. Robb, which took place on Saturday afternoon in McCall Bros. Funeral Chapel, Rev. F. A. P. Chadwick officiating. "The Last Call" was sung as a solo by Mr. Petty Edmond, with Miss Helen Moore presiding at the organ. The United Service Lodge, A.F. & A.M., No. 34, attended in a body, and the Masonic funeral service was read by Wor. Bro. S. Day, worshipful master of United Service Lodge, assisted by Third Officer H. Denyer, Chief Engineer C. Stewart, Purser E. Pearce, Chief Electrician H. Porter, Chief Steward F. Ledingham, Second Engineer F. Jupp, Fourth Engineer R. Nicholson, Cabin Steward A. Fry. The remains were taken to Vancouver for cremation, the following Masonic brethren acting as pallbearers: Bro. Wor. Bro. Stewart M. Manuel, Wor. Bro. O. Harris, Bros. F. Ritchie, T. Thomson, M. Morris and S. Wilbers.

LONDON, Oct. 12.—The British Parliamentary commission of inquiry into the recent Palestine disorders, left London for Palestine today.

City & District

Building Permits—Since the commencement of the year, building permits amounting to $3,566,784 have been issued at the City Hall, an amount almost double that for the whole of last year.

New Air Route—Weather permitting, Alaska-Washington-B.C. Airways will inaugurate service to Vancouver at 11:30 o'clock Tuesday morning, according to Mr. H. B. Gibson, president.

Call for Bids—United States fishing vessels cleared here yesterday before proceeding to Seattle for fresh herring bait were the Evolution, Orient and Madelina J. The Madeline J is the thirty-seventh halibut fisherman to port since October 1.

This ought to be the condition of Property Sales and Transfers—During the first week in October, $367,410 worth of property changed ownership, bringing the total sales and transfers of property within the city from January 1 to October 7, to $3,370,350.

Invited to Speak—Mr. George I. Warren, publicity commissioner, lately received an invitation to address the Redwood Empire Association and nine affiliated units at a convention in San Francisco, to be held October 16, 17 and 18. The chief feature of the convention will be the discussion of the development of a greater volume of travel throughout the Pacific Coast.

Using New Rooms—The first of the new commercial rooms on the lower floor of the new addition of the Empress Hotel was occupied last night. It is expected that the transfer from the old rooms on the lower floor of the main block will be completed by the end of the week. The former commercial rooms will then be converted into private dining rooms.

Returns to Theatre—Miss Hennessge, lately of Victoria, has returned home after spending a couple of days in the city. It was expected that Miss Hennessge started experimenting with the growing cactus plant, a commercial proposition. Year by year the plant has increased the number of her plants, and a considerable quantity of Prickly Pear Cactus water is now on the market of British Columbia.

Forced Down—Forced down by thick fog off Active Pass, the Alaska-Washington-B.C. Airways Fairchild seaplane at 2 o'clock yesterday afternoon caused considerable alarm to passing seamen aboard Sa. Alameda. The ship reported by wireless that it had sighted a plane in distress. The seaplane, piloted by Captain Gordon MacKenzie, rested for twenty minutes before proceeding to Victoria.

To Arrive Here—Dr. Flora M. Stewart, who is associated with the Sun Mental Hospital at Middletown, N.Y., will arrive in the city today on a visit to her cousin, Mr. F. Philip, Deputy Minister of Public Works. Dr. Stewart is a graduate of the University of Edinburgh, She left Europe yesterday. As far as Jordan River yesterday. As far as Jordan River she accompanied by Mr. McCauley who struck by falling rocks. He was taken to the Jubilee Hospital where Dr. W. Rapp attended him. The full extent of the injuries will not be known until an X-ray is taken today.

Seaplane Survey—Having completed a busy season in service of the Forestry Department fire prevention surveys, the Moth seaplane operated by Canadian Airways for the Yarrow Aircraft Corporation, of Victoria, now based at Vancouver. Captain E. C. W. Dennis, the pilot, completed his third year of patrol work for the Government. Flying over flights of 110 hours, covering 8,630 miles, were made over the Kootenays, Arrow Lakes and Okanagan districts.

Spokane Invites Bishop Schofield To Church Event

Reciprocating the compliment of the visit of the Bishop of Spokane to the conversazione of Christ Church Cathedral on September 26, as a representative of the Protestant Episcopal Church, Dr. Cross has invited Bishop Schofield to be the speaker at the new Episcopal Cathedral there on Sunday next, when the building is dedicated.

This cathedral at Spokane has been under construction for five years, and the Anglican Church in British Columbia will be represented at the ceremonies by archbishop of Rupert, who will preach in the morning, and Bishop Schofield, who will speak at the evening service.

During his visit to Spokane the Metropolitan has been invited to speak to the Spokane Chamber of Commerce on October 23.

Trades Council President Will Speak Wednesday

Mr. Tom Moore, president of the Trades and Labor Council of Canada, who is routed to Japan to be a Canadian delegate at the conferences of the Pacific Ocean Relations and will sail on Thursday on the Empress of Canada, will arrive in Victoria on Wednesday morning from Vancouver.

He will speak at a meeting at the Chamber of Commerce at 8 o'clock that day. Those who wish to meet him personally before the meeting are invited to apply to Alderman Woodward, secretary of the Trades and Labor Council, as soon as possible, so that an appointment can be made.

"Has anything happened while I've been out?"

"No, nothing except that the door you are leaning against has been repainted."

MR. GODFREY RETURNS HERE

JOINS WILKERSON STORE AS MANAGER AFTER SEVERAL YEARS' ABSENCE

Has Been Engaged as Buyer for Hudson's Bay Company—Well Known Here

MR. A. H. GODFREY

Mrs. L. B. Wilkerson has recently secured the services of Mr. A. H. Godfrey as manager of her jewelry store, 1310 Douglas Street. Mr. Godfrey was a resident of Victoria some thirteen years ago, when he was employed by the same firm, that of W. H. Wilkerson. On leaving Victoria he joined the staff of D. R. Dingwall Ltd., in Winnipeg, with which well-known concern he remained ten years. The last three years Mr. Godfrey held the post of assistant manager and Eastern buyer for the jewelry department of the Hudson's Bay Co. in Winnipeg. In this capacity his territory included New York and the Eastern States. Despite his long absence from Victoria, Mr. Godfrey finds many old friends to welcome him back, for he is prominent in board of trade and in fraternal circles. He will take up his new duties on Monday.

Officers Elected of Victoria Radio Club

At the annual meeting of the Victoria Radio Club, Mr. J. Fyfe-Wilson was unanimously elected president. Other officers similarly chosen were: Honorary president, Mr. Harold Grant, vice-president, Mr. J. Prampton; secretary, Mr. E Hawkins; treasurer, Mr. W. C. McObbon; directors, Messrs. K. M Chadwick, F. Holmes and F. Pagett.

A substantial balance was shown in the financial statement and votes of thanks were tendered to the secretary and treasurer. The club will urge the Dominion Government to take early action on the radio communication report and is to interview Mr. D. B Plunkett, M.P., on the same matter. The executive was authorized to offer its co-operation to the newly-formed short wave radio club.

Special Harvest Thanksgiving service will be held this morning at Holy Trinity Church, North Saanich, at 11 a.m. The preacher will be the rector, Rev. T. M. Hughes. The jubilee class will resume at 3:30 o'clock.

ONTARIO PREMIER IS STEADFAST TO HIS LIQUOR LAWS

EAST WINDSOR, Ont., Oct. 12.—Campaigning in Essex County on Friday, Premier G. Howard Ferguson staunchly defended the Ontario Liquor Control Act. Speaking here last night and in the afternoon at Leamington, the Prime Minister again called on Mr. W. E. N. Sinclair, Liberal leader, for a clear statement of the policy of the Liberal party on the liquor issue.

At the same time Premier Ferguson gave his pledge that every promise made by him in this campaign on any public question would be carried out.

The annual general meeting of the Ward One (Saanich) Liberal Association will be held in the Liberal rooms, Victoria, on Tuesday, October 15, at 8 o'clock. All Liberals of the district are invited to be present.

Women's Work and Institutes

Women's Clubs and Societies

St. Joseph's W. A.

The Ladies' Auxiliary of St. Joseph's Hospital held its monthly meeting on Friday afternoon in the sewing room at the hospital. Mrs. Frank Sehl, the president, was in the chair. There was a large attendance of members, and many business matters were discussed, foremost of which were plans for the forthcoming bazaar and sale of work, and it was decided to hold this about November 21, and same to be held in the lecture hall of the nurses' new home. This month the auxiliary will purchase for the hospital an electric gauze cutter and an electric floor polisher. The treasurer's report showed a substantial balance in the bank of $1,600. The membership drive was very successful, a good many subscriptions to the auxiliary being received. The convener of sewing, Mrs. M. C. Henderson, gave her report of sewing done during the last month as 1,812 pieces: dish towels, 187; pillow cases, 128; table napkins, 82; roller towels, 27; bureau scarves, 22; wrappers, 17; caps, 12; jackets, 11; table covers, 9; gowns mended 17; sponges 1,342; abdominal sponges, 84.

Auxiliaries Hold Tea

On Thursday evening a joint meeting of the auxiliaries Britannia and Pro Patria Branches met in the clubrooms of the Canadian Legion on Courtney Street. Mrs. Drury, president of the Pro Patria Branch, presided and introduced Mrs. Barland, of Nanaimo, provincial president, who gave an inspiring address outlining the aims and projects of the auxiliaries to the Canadian Legion throughout the province. She emphasized the importance of studying the work of the League of Nations, the need of state health insurance and the importance of instructing the children in the significance and sacredness of Armistice Day. A vote of thanks was accorded her, and in appreciation she was presented with a bouquet of carnations and gladioli. Social hours residered by Mrs. Gosse and Mrs. Hart, accompanied by Mrs. Limbert, were much enjoyed by those present. Refreshments were served by the ladies of Pro Patria Branch.

McGowan, Mrs. E. C. Hayward, Mrs. Herbert Pendray, Mrs. Edwin Tomlin and Mrs. S. J. Willis. Mrs. E. B. Taylor, the treasurer, will be on hand at 11 o'clock to receive dues.

Made Life Member by McBride Club, Inc.

MRS. FRANCES A. WALKER

Whose photograph appears above, was made a life member of the Women's McBride Club, Incorporated, at a meeting held last Wednesday. In making the presentation Cecelia Allan, president of the club, referred to Mrs. Walker's distinguished work in aid of the association.

Women's Institutes of Vancouver Island

SOUTH SAANICH

The South Saanich Women's Institute held a week bee on Thursday, to which a large number of members and visitors turned out. Two wool comforters were worked on and after luncheon Mrs. Gillis, of Victoria, gave a most interesting demonstration and talk on dress form making, one form being almost completed. This was much appreciated by the members, who extended a hearty vote of thanks to Mrs. Gillis.

QUALICUM BEACH

The monthly meeting of the Qualicum Beach District Women's Institute was held at the home of Mrs. Clapham. Mrs. Palmer, of Coombs, and Mrs. R. Taylor, of Errington, were appointed delegates to the convention to be held at Courtenay. A roll call was made and subjects were chosen for debate in the Winter months. Tea was served by Dashwood and Qualicum Beach ladies.

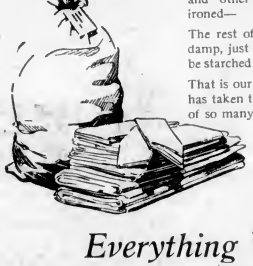
SOOKE AND NORTH SOOKE

The regular meeting of the Sooke and North Sooke Women's Institute was held on Friday afternoon at the home of Mrs. G. A. Acreman, who presided. Fourteen members were present. A report of the recent visit of the members to the Sunshine Camp was given by the secretary. On September 20 a party of twenty-five members and friends visited the Queen Alexandra Solarium at Mill Bay. The party took the form of a picnic and the members were conveyed in cars owned by Mrs. R. Strong, Mrs. C. T. Mult and Mr. George Throup. Mrs. Jackson and Mrs. Acreman were appointed delegates to the conference to be held in Victoria on October 22 and 23. A masquerade and Hallowe'en dance will be held in Charters Hall on November 2. Mrs. Acreman to be convener. A silver cup was presented to the infant son of Mrs. A. E. Constant. Tea was served by the hostess.

Seven Cents

a pound . . . dry weight

$1.00 for 15 pounds or less



Everything washed with fresh, rainsoft water, and pure, mild soap—

Table and bed linens, face towels, and other flatwork beautifully ironed—

The rest of your things returned damp, just right for ironing, or to be starched and hung on the line—

That is our Thrif-T Service which has taken the toil of washday out of so many homes.

Everything Washed
All the Flatwork Ironed

THINK of it—all your washing out of the way—all the heating and lifting and carrying of water; the rubbing and wringing of heavy clothes saved—the most difficult part of your ironing done—linens snowy white, beautifully smooth and crisp, just as you do them yourself—and only the wearing apparel left for you to iron—all this help at a cost of only a few cents a pound. Bride-to-Be Is Given Beautiful Present

CUMBERLAND, Oct. 12.—Miss Lilly Banks entertained at a delightful cup and saucer shower in the home of her parents on Thursday night in honor of Miss Allison Mann, whose marriage to Mr. Hector Treen takes place on Monday. Music and contests occupied the guests for the major portion of the evening and refreshments were served. Mrs. Banks and Mrs. Mann presiding at the urns and Misses Lilly Banks and Beth Mann serving. On behalf of the invited guests, Miss Banks presented to the bride-to-be a number of beautiful cups and saucers, the gifts being enclosed in a prettily decorated parcel. Among those invited were the Misses Allison Mann, Jean Johnson, Beth Mounsbury, Isabel Herd, Edna Geary, Vincen Auchenvole, Adelaide Gebhart, Dena and Jessie Baird, Margaret Stewart, Margaret Gillespie, Mesdames Emily and Meadames Meigle, Mann and Banks.

* * *

Mesdames Walker, Goodall, Westfield and Brown were hostesses at a miscellaneous shower on Thursday night in honor of Miss Mann at the home of Mrs. Brown. Games occupied the many guests present for the early part of the evening when Mrs. Slaughter winning the first prize, Mrs. Beveridge the second and Mrs. Janes the consolation. In a guessing competition that caused much merriment, Mrs. Westfield was declared the winner. After refreshments had been served, little Dot Brown and Margaret Goodall drew into the room a prettily decorated wagon loaded with a large number of miscellaneous gifts, both useful and ornamental. Miss Mann thanked them for their beautiful gifts and for the many expressions of good wishes. The remainder of the evening was spent in games and music, and Mrs. Freeburn delighted the guests with a well-rendered solo and later in the evening in company with Mrs Brown, sang a duet. Mrs. Hudson presiding at the piano. A very delightful evening ended with the singing of "For She's a Jolly Good Fellow."

* * *

Mrs. E. R. Hicks, Mrs. Nash and Mrs. McLean were hostesses at a miscellaneous shower in the United Church Hall on Friday night in honor of Miss Mann. There was a very large number of the members of the Cumberland United Church present, Miss Mann being an ardent worker of the church. During the evening the young son of Mrs. Nash and the daughter of Rev. and Mrs. J. H. Hewitt drey into the hall a prettily decorated wagon loaded with the miscellaneous gifts. Miss Mann thanked them for their beautiful gifts and for the many expressions of good wishes extended to her.

Deep Cove Personals

Miss Ethel Thornton, R.N., leaves on Sunday for Mission.

* * *

Dr. Parker and wife, of Los Angeles, spent the week-end visiting the doctor's cousin, Mr. J. Meldrum. Dr. Parker will build at the cove next year, having purchased some waterfront property.

* * *

On Monday the Deep Cove Social Club will hold its opening social and dance in the hall. Excellent prizes are being offered for the winners at cards, and during the social hour songs and recitations by Victoria artists will be heard. The club is to be congratulated on its splendid gift in the hall, and the proceeds will go toward that end.

* * *

The Tennis Club dance, the last event of this season, will be held in the Deep Cove Hall on Friday, October 18.

* * *

In the passing away of the late Arthur Thornton, Deep Cove district loses a friend of many years. Mr. Thornton was a faithful member of the Anglican Church, and took an active interest in its work until failing health compelled him to retire.

KEIMAN'S WOMEN'S APPAREL 732 YATES ST. LATEST FASHIONS MODERATE PRICES CASH PRICE

Mr. Frank Richardson, Major Cuthbert Holmes, Mr. Arthur Wedd, Captain Lathom, Mr. Roy Coodfriend and Major Bullock-Webster.

"It may be difficult for a camel to pass through the eye of a needle" says my name cynic, "but a fifteen-stone woman can go through her husband's pocket."

HIGH COMPRESSION GETS EXPLANATION

De Soto Official Briefly Outlines Meaning of Term Applied to Automobiles

"If you have ever watched persons at different times inflate paper bags and burst them with their resultant powerful explosive effect, you have noticed that the same amount of air blown into a small bag will give a louder and more powerful explosion than if blown into a larger bag. That is the principle upon which high compression automobile engines operate," according to Russel Paige, vice-president in charge of sales of the De Soto Motor Corporation of Canada, Limited.

"The matter of high compression is a significant one to automobile owners," he continues. High compression increases the ratio of fuel that can be transformed into useful work. It gives greater power and performance from the same amount of fuel and thereby increases the efficiency of the engine.

"In the development of the De Soto Six engine, Chrysler Motors engineers have succeeded in so perfecting the cylinder head, the shape of the combustion chambers, and the design of the entire engine as regards valve location, manifolding, crankshaft supports, etc., to the point where they are able to employ an exceedingly high compression ratio with consequent unusual volume of power.

"The advantage of the high compression engine is, of course, found in the remarkable results which it delivers," Mr. Paige concluded. "The results are astounding. With approximately the same fuel consumption as the low compression engine, it delivers greater power, greater economy, phenomenal acceleration, and an all-round performance that is startling in comparison with engines of lower compression."

MOTOR COLORING IS INTERESTING

Durant Finishing Experts Use Code Book of Tints Three Inches Thick

How would you like the job of affecting automobile colors from a book three inches thick?

Such a book is in use at the plant of Durant Motors of Canada, Ltd., in connection with painting and finishing Durant passenger cars. Known as the Durant color code, it is indispensable in meeting the modern trend in color harmonies and in creating beautiful effects on Durant models.

Whether we know it or not, color is one of the greatest delights of our lives—in fact an excellent way to judge the good taste of the average man and woman is by the colors of their automobiles.

Durant color experts carefully study the public's preferences from year to year. In deciding which are the most suitable colors to use from the standpoint of good taste, lasting beauty and all-year round service many important factors are taken into consideration.

Colors are formulated from the newest tones of the day and follow the Paris and New York modes in silks, with the result that there is a large variety of shades and combinations to work with.

But no matter what the mode dictates—no matter what color harmonies are finally decided upon for a new Durant model, the high standard of Durant quality in materials and workmanship is carefully maintained.

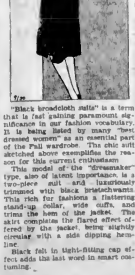
The local politician stormed up to the editor's home at a late hour and pounded on the door. When the editor appeared at the window above he shouted:

"I've read your foul slander on me and I've come to throw the liar back in your teeth."

"Wait, be a good fellow," said the editor, yawning, "and throw it in the bathroom window. I've left my teeth in there."

Fashion Fancies

By Marie Belmont



"Black broadcloth suits" is a term that is fast gaining popularity, significance in our fashion vocabulary. It is being listed by many "best dressed women" as an essential part of the Fall wardrobe. The chic suit sketched above exemplifies the reason for this current enthusiasm.

This model of the "dressmaker" type, also of latest importance, is a two-piece suit and luxuriously trimmed with black pretechwants. This rich fur flashes a flattering stand-up collar, wide cuffs, and trims the hem of the jacket. The skirt completes the flared effect offered by the jacket, being slightly circular with a side dipping hemline.

Black fall in tight-fitting cap effects adds the last word in smart costuming.

FOR EVENING WEAR

Delightful New Dance Frocks

To array yourself in one of these newest style Dance Frocks is to put yourself into the mood for dancing—they are so suggestive of lightness, brightness and "joie de vivre," with the sparkling bit of metal cloth so cunningly introduced into the dainty satin taffeta, soft velvet satin or filmy net. The sleeveless bodices and bouffant skirts are becomingly feminine and the newest pastel shades seem just right for girlish types. By the way, the new hemlines are circular and uneven—sometimes transparent and scalloped. Sizes for misses and women. Priced at **15.95**

A fine assortment of other Evening Frocks, shown in net, moire, georgette, transparent net and moire velvet, in bright and pastel shades; also in black.

Prices, $25.00 to $45.00 and Up

Institute for Blind Asks for Co-operation of Employers; Efficient Workers Supplied

The Canadian National Institute for the Blind has for its special purpose first to find employment for blind persons in which they can do as good work as those who can see and can prove efficient and valuable employees, and, secondly, after a job has been secured, to co-operate with and assist their clients in making a success of the undertaking and overcoming any difficulties that may be encountered.

In finding the right man for the job, and the job for the man, blindness is merely one of the many incidental factors. Other conditions such as the mental ability of the worker, his general health and temperament and the nature of the work, affect employability as much as lack of sight.

EFFICIENCY SOUGHT

The blind worker must aim at the same degree of efficiency attained by the average sighted employee in the same task. The factor of blindness will not be admitted as an excuse for slow or slovenly or inaccurate results.

The institute is more insistent on this point that the most exacting employer could possibly be.

Because of the fact that most persons are industrial workers, and since the blind group is merely a cross-section of the ordinary population, it is found that the problems of manual workers are far more numerous than those of the business or professional workers.

INSTANCE CITED

A case in point is that of the Steel Company of Canada. Contact was first established with the management of one of the company's plants in Toronto. After a number of conferences, permission was granted to the institute's representative to go through the plant seeking feasible operations that might be performed by blind workers.

Overalls were donned and a semi-automatic eight spindle tapping machine used for the threading of nuts was selected and demonstrated successfully to the extent that the manager and department foreman were willing to place the blind worker on trial.

The worker was trained in the operation of this tapping machine in the space of a few hours. He completely mastered the process, reaching average production in the same period as that required of a sighted apprentice, and is today a highly skilled and satisfactory employee, his earnings on a par with his fellow workmen.

This result was the more gratifying as the man so placed had had no previous experience with factory work of that character.

The task of the institute, however, is by no means concluded after placement has been effected. After care is absolutely essential for successful continuance. Contact must be maintained, both with the employing firm and the employed.

EMPLOYER PROTECTED

Wherever necessary with the worker is being trained for the job, the institute pays his living expenses until his earning capacity with the firm is demonstrated.

If for any reason the blind employee proves unadaptable, the institute undertakes to remove him, finding a new position for which he may be better fitted.

The employer is not taxed with responsibility for the perpetual care of the blind worker, and need not be concerned about his welfare when he outgrows his usefulness as an industrial unit.

This institute considers it of vital importance to foster the good-will of the employer, and his continued co-operation, to leave wide open every possible avenue of opportunity for the blind of the community, that the failure of any one chance individual may not be visited upon the group.

MANUFACTURERS AID

The Canadian Manufacturers' Association, both officially and through its president and individual members, has expressed its desire to fully co-operate with the institute in its placement programme.

Here, they feel, it is chance to aid in a real constructive, relief measure. Many men of large means and generous talent, are none the less antagonized by constant appeals for a charity that merely pauperizes instead of helping men unfortunate for one reason or another, to get on their feet.

It is the endeavor of the institute to develop this wider field of employment to a point where a place for all employable blind workers with an average productive capacity, can be found in the business and industry of Canada; and where, standing shoulder to shoulder with their sighted fellow workers, instead of in segregated employment, their sense of normal contact and friendly competition may be restored and maintained.

The Penn Athletic Club in Philadelphia, Pa., has a forty-yard indoor range for archery.

Work That Blind Men Can Do Well

This Blind Man Is Operating an Eight-Spindle Semi-Automatic Tapping Machine in the Toronto Factory of the Steel Company of Canada.

CHAPTER XVIII

The law office of Levinsky, Kogel & O'Rourke were doing a furnished, but impressive. A funeral stillness pervaded the place. The girl in the outer desk took Benny's name and whispered into a telephone then a pale, rubber-heeled young man appeared and conducted him to a private office.

Mr. Kogel rose from a desk and shook hands briskly. Benny did not like Mr. Kogel. He was small and quite bald.

"Sit down," he said.

Benny sat down, twisting his hat in his hands. There was another glass-panelled door. He wondered if Flo was in the next room. And his heart thumped.

"Now, then"—Mr. Kogel's voice was very oily—"about the divorce—"

Benny's mouth opened. "Divorce! What—"

"Certainly." Mr. Kogel smiled. "I thought you knew all about it."

"I—why, no." Benny was sunk.

"Our firm is representing Mrs. Darrell—Miss Sloane, that is. Naturally, you won't protest it. Miss Sloane is most anxious to get it over with, so, if you have no objections—and, of course, you haven't—we had better proceed at once."

"I—I'd—uh—like t' talk it over with her." Benny's eyes were pathetic.

"That," said the lawyer, still smiling, "would be unpleasant for Miss Sloane, I'm afraid. Just at this time, you know—with her club opening tomorrow night. No, I think we can arrange it satisfactorily between ourselves. Of course, you understand, in this state there is only one way to obtain a divorce quickly."

Benny nodded. He felt numb all over.

"If you will be in your room at your hotel about midnight, a person will call on you." Kogel's frozen smile had become very irritating. "This person will be paid by us, of course. It's just a formality. You needn't worry. Everything will be taken care of in the most dignified manner possible." His oily voice droned on.

Benny sat staring at the floor. He was no longer listening.

Back in his room at the hotel he flung himself on the bed and lay without moving for a long time. It would have been a relief if he could have wept, but his anguish was beyond tears. Salomy sat beside him, gazing at him compassionately. At length, she nudged him with a symphetic nose, and Benny put his arm around her and drew her close to him.

The telephone by his bedside rang shrilly. For several minutes he did not move, then, as the ringing continued, he sat up and lifted the receiver.

Mr. B. B. Hummel, the operator said, was on his way up.

Benny walked across to the dresser and, pausing in front of the mirror, combed his hair. It would never do to let Hummel know . . .

A knock on the door. The dapper little booking agent entered, swinging his bamboo cane. "Ah, there, Benny! How's the boy? You're looking great."

"Yeh?" Benny had not seen himself since that disastrous night at Eastbampton.

"Well," said Hummel, sitting down without waiting for an invitation, "I've called up a couple times—ya didn't know about it—but I couldn't get in touch with ya."

"I been pretty busy," Benny lied. "That's just what I come up t' see ya about—business." Hummel's mouth opened. "Divorce! What—"

"Certainly." Mr. Kogel smiled. "I thought you knew all about it."

"I—why, no." Benny was sunk.

"Our firm is representing Mrs. Darrell—Miss Sloane, that is. Naturally, you won't protest it. Miss Sloane is most anxious to get it over with, so, if you have no objections—and, of course, you haven't—we had better proceed at once."

"I—I'd—uh—like t' talk it over with her." Benny's eyes were pathetic.

"That," said the lawyer, still smiling, "would be unpleasant for Miss Sloane, I'm afraid. Just at this time, you know—with her club opening tomorrow night. No, I think we can arrange it satisfactorily between ourselves. Of course, you understand, in this state there is only one way to obtain a divorce quickly."

Benny nodded. He felt numb all over.

"If you will be in your room at your hotel about midnight, a person will call on you." Kogel's frozen smile had become very irritating. "This person will be paid by us, of course. It's just a formality. You needn't worry. Everything will be taken care of in the most dignified manner possible." His oily voice droned on.

Benny sat staring at the floor. He was no longer listening.

Back in his room at the hotel he flung himself on the bed and lay without moving for a long time. It would have been a relief if he could have wept, but his anguish was beyond tears. Salomy sat beside him, gazing at him compassionately. At length, she nudged him with a sympathetic nose, and Benny put his arm around her and drew her close to him.

The telephone by his bedside rang shrilly. For several minutes he did not move, then, as the ringing continued, he sat up and lifted the receiver.

"Will—"

"Well—what?"

"If I could only get a break." Benny exclaimed. "Just one break—ya know—I'd be—"

"It wouldn't do yo no good," replied the cynic of The Pen Alley. "Ya aaps a sap—with any kind of a break."

"That's a wisecrack, ain't it?"

"Think it or leave it," sighed his friend. "It ain't payin' me no interest."

"What's a matter with me?" Benny demanded.

"Ha!"

"I ask ya."

"Ah! I'm tellin' ya. Keep away from the women. Ya'll be that much ahead, anyhow. The rest can't be helped."

"Whatta ya mean, keep away from the women? Why don't you keep away from 'em?"

"It's different with me."

"Why?"

"I don't give 'em nothin," said Lew.

"A lot I give 'em!"

"You ain't got a lot—but what ya got, they get."

"How d' ya mean?"

"You guess—it's a cross-word."

"Listen," protested Benny, "it is my fault I married a girl?"

"It's your fault you married anybody!" Lew told him. "You could of been a burglar, if you wanted long odds."

"Just a pal, you are."

"The Chinese get the right idea," old Lew. "When a baby's born, if ain't a boy they drop it down a well!"

And for the first time in weeks Benny laughed.

"There's too many dames in the world for a guy t' waste any time mournin' over one." his friend continued. "All ya gotta do is put your head out of the window an' whistle."

"Not me, Lew. I guess I'm a one-woman man."

"There ain't such a thing." Adam was the last. An' it wasn't his fault, at that—he just got a bad break on account of the census figgers. Now look at me—"

"I can't," said Benny, "without laughin."

"Look at I ma." Lew persisted. "Ya don't see any women disturbin' my rest! I give 'em nothin'. I treat 'em mean."

The telephone rang. Benny answered. It was Peggy Page. "For you," Benny told him.

Lew took the telephone. "Hello? All right, I'll—a—." he said meekly. "I'll be right down."

"Yeh!" jeered Benny. "You treat 'em mean, you do!"

"Well"—Lew looked somewhat abashed—"I'll see ya later." And he hurried out.

(To Be Continued)

BRITAIN TALKING OF NEW ELECTION

Labor Government's Policy on India and Russia Believed to Be Causing Much Unrest

LONDON, Oct. 12.—There is already talk of a new British general election. The Saturday Review regards as distinctly disturbing the rumor that Rt. Hon. Wedgewood Benn, Secretary for India, complains making a tour of India. It classes this as a slight to the Royal Commission on Indian Military Reform, headed by Sir John Simon, now back in England preparing its report.

The Review wonders whether it is possible the Government is considering the India situation as the battleground for an election.

The Forward, a Socialist weekly published in Glasgow, refers to opposition mutterings about the Anglo-Russian Agreement and thinks it possible an attempt will be made to bring down the Government with another anti-Bolshevik scare similar to that which wrecked the previous Labor administration. It expresses the opinion that Rt. Hon. Arthur Henderson, Foreign Secretary, is not ready to revive the 1924 Anglo-Russian Treaty, as the Laborite do not desire to go down a second time on such an issue, preferring, instead, to fight the election on some big challenge to vested interests.

TARIFF BILL MAY PASS BY NOV. 20

WASHINGTON, Oct. 12 — Chairman Smoot of the Senate Finance Committee, in agricultural conference with President Hoover today, expressed confidence that the Senate would reach a final vote on the Tariff Bill by November 20.

NATIVE SONS OF B.C.

Victoria Post, No. 1, Native Sons of British Columbia, will hold a social evening next Wednesday, at 8.30 o'clock, in the Sons of England Hall, Broad Street. Members of Victoria Post No. 3, Native Daughters of B.C., will be guests on this occasion.

LOCAL MILLS FIND MARKET FOR PRODUCT

Manager of B.C. Worsted Mills Tells of Progress During Past Six Months—Conditions Encouraging

MANY ARTICLES ON SALE LOCALLY

"Considering that we have only been a going concern for a little better than six months, the B.C. Worsted Mills, Limited, have accomplished a good deal," Mr. Moore, manager of the plant, told a Colonist representative yesterday morning.

"Six months ago, we had no orders and had all our samples to make, and it was necessary to train and teach the business to the girls we employed. We could get no orders because the chief local users of our product had contracted in advance for their supplies with other spinners, which had to come before we could do business with them.

"Notwithstanding the handicaps which had to be overcome, and which really meant getting acquainted with conditions in the country, as well as other things, it might be of interest to the people of Victoria to know that all Jantzen swimming suits made in Canada during the past season were made from Victoria yarns. As they know, the Jantzen people are the leading world manufacturers of bathing suits. For eight months past, their sales amounted to $4,129,486, representing 1,248,244 suits, which meant an increase of 100 per cent over the sales of the previous season.

"The Jantzen mills have a branch in Vancouver, which has just been reorganized with the object of increasing the production of its bathing suits in British Columbia, the required yarns for which will be supplied by the local mill.

SUBSTANTIAL HEADWAY

"I feel we are accomplishing something," was Mr. Moore's comment. "Our product, also, has found considerable favor with local dealers. Our hand-knitting yarns are on sale at local stores and are preferred to imported yarns As for sweater coats in the latest shades of heather mixtures, imitated in Vancouver from yarns made in Victoria, they are on sale at all the better-class stores throughout British Columbia.

"We are gradually getting trained and efficient staff, and we get a continuous supply of orders and keep our girls in steady employment. It will enable us to maintain a well-ordered operation. While our progress up to the present has been encouraging under all circumstances, much remains to be done before it can definitely be stated that the industry can become permanently established. A number of things enter into the situation and extends over which we have no control may retard and hinder the development of the industry

The Happy Eyes of Tomorrow

For they will have had the full benefit of the scientific discoveries of today.

The Eye History of the world is peculiar. First came eyes that needed no help because they had no cause for being strained and were healthy by reason of perfectly natural environment. Then came the use of the lens to help a race whose eyes were commencing to fail.

And now comes real scientific advances—two of them. One, a new system of ocular training for the visual powers, psychologically and physically, bringing natural poise and vigor, making lenses less necessary than heretofore. The other, a better type of lens with correct vision throughout its entire surface, instead of giving correct vision only in the central area—as was the case with all glasses prior to those most recent discoveries.

So you see the eyes have cause to give thanks. Either they can be trained to overcome their own defects, or they can be fitted with better glasses than were possible before.

Both of the newer, better services are yours here—should your eyes need them.

How Kicking Horse River Secured Its Name

Extracts From Journal of Sir James Hector

The circumstances attending the naming of the Kicking Horse River (among as the means by which the first Canadian transcontinental railway passes through the barrier of the Rockies, are told in a letter received from Wellington, New Zealand, by Mr. J. R. Anderson from Mr. C. M. Hector, son of Sir James Hector.

Mr Hector says.

"I have heard that many strange accounts have been given to travelers, such as its derivation from Indian words and so forth, but the correct account is to be found in the 'Report of the Palliser Expedition, 1857-1860.' This report, on the exploration of British North America, was presented to both Houses of Parliament by command of Queen Victoria in 1860-1863. The Palliser expedition was sent out by the British Government to explore that part of British North America which lies between the northern bank of the River Saskatchewan and the frontier of the United States.—and to ascertain, whether one or more practicable passes exist over the Rocky Mountains within British territory and south of that known to exist between Mount Brown and Mount Hooker.

"Captain Palliser was in command of the expedition, my father, the late Sir James Hector, was the surgeon and geologist to the party. I have a copy of this report beside me as I write.

"I understand from Lady Hector that at least two copies are in Canada, probably in Alberta or in British Columbia.

"The report contains, besides a general account of the expedition, the detailed reports of the work carried out by the different members of the expedition on branch expeditions otherwise. It was on one of these branch expeditions, sent out by Captain Palliser, under the command of Dr. Hector (as he then was), to look for practicable passes through the Rocky Mountains, that the accident occurred which nearly cost Dr. Hector his life and which led to his men giving the name of 'Kicking Horse Pass' to the pass through which the C.P.R. now runs. This branch expedition set out on August 3, 1858.

"It passed through Old Bow Fort and followed up to Bow River until it reached the Vermillion Pass, through which it made its way to the head waters of the Kootanie River; thence by the Beaver Pass to the upper waters of the Columbia River. Here the expedition shortly came upon a large stream entering the Columbia from the north. The valley of this stream was followed up to the height of land and was found to provide a thoroughly practicable pass for horses or even for a railroad.

EXTRACTS FROM JOURNAL

"Turning to Page 106 of the detailed report, I extract the following from Dr. Hector's journal:

"August 29.—We had traveled a few miles when we came to a large flat where the wide valley terminated, dividing into two branches, one from the northwest (sic) and the other to the southwest.

"Here we met a very large stream equal in size to the Bow River where we crossed it. The river descends the valley from the N.W. (fifteen degrees W. of N. C.M.H.) and on entering the Beaver foot turns at a sharp angle and flows off to the S.E. (sic) (seventy degrees W. of N. by protractor, C.M.H.), through the other valley.

"Just above the angle there is a fall of 7—fifty feet in height where the channel is contracted by perpendicular rocks. A little way above this fall one of our pack horses, to escape the fallen timber, plunged into the stream, luckily where it formed an eddy, but the banks were so steep we had great difficulty in getting him out.

"In attempting to reatch my own horse, which had strayed off while we were engaged with the one in the water, he kicked me in the chest, but I had luckily got close to him before he struck out, so that I did not get the full force of the blow.

"However, it knocked me down and rendered me senseless for some time. This was unfortunate as we had seen no tracks of game in the mountains and were now without food.

"But I was so hurt that we could not proceed further that day, at least. My men covered me up under a tree and I sent them all off to try and raise something to eat.

"Peter (P. Bremner, C. H.) I sent up the mountain, in the angle of the valley, to the westward and see what the mountains were like to the West. He ascended 3,500 feet by the aneroid but did not get to the highest point. The men all returned at night without having killed anything.

"August 30.—The men are hunting again today. Peter and Brown found a large flock of white goats, but the only one they shot managed to get to the edge of a precipice and fell over, so that they got none of the meat. Nimrod went a long way after deer and came back quite lame, having run a sharp spike into his foot. He had seen the wapiti and had missed a fine buck. We were now in a bad way, as although I had kept a private cache, we had given five pounds of pemmican, which I now produced, it was only enough for one meal for us all. I intended, however, to make it last three days, by which time we should, by the help of God, be able to reach the height of land and get back to the eastern slope of the mountains where we would be able to find game.

"August 31.—Every morning just now we have had dense fogs that generally last till 8—10 o'clk, but the evenings are fine and clear. After traveling a mile along the left bank of the river from the northwest, which, because of the accident, my men had named the 'Kicking Horse River' we crossed to the other side. It was ninety to one hundred yards wide and almost too deep to ford. The cotton on horseback gave me great pain, but we managed to get along slowly till noon. We left the river a considerable distance to our right, following notched tree that Nimrod had marked the day before when out hunting, in order to show us the best way, as an Indian soon finds out the best way to carry a deer or wapiti. At nightfall we again struck the river, where it passes through a narrow defile and through which we found a well-marked trail.

"September 1.—Started early sending Peter and Nimrod ahead to hunt. The valley soon after starting got very wide, with extensive swampy flats and clumps of fine timber. The willows fringing the margins of these grassy swamps exactly resembled hedgerows enclosing green fields. Halted at noon latitude 51°16'30 North.

"September 2.—Started very early, as our only hope of getting any game was by reaching the east side of the mountain. Nimrod had again seen wapiti but the fallen woods were so difficult to hunt in that with his lame foot he only got a long shot which he missed. After five miles the valley terminated in a sudden slope covered with heavy pine forests, which we entered by good deal to cut large bioeberries that grew in abundance and which we were very glad to boil up with some crude of cashes and odd pieces of grease to make something like a supper for the 15 of us after very hard day's work.

"September 3.—This morning all the swamps were covered with ice a great glacier. Following it down we came, after five miles, to a large river which Nimrod at once recognised as the Bow River, and then I began to recognize the mountains above the valley (fifteen or twenty miles to the east, as the Castle Mountains. The descent from our camp, at the height of land of the pass we had just traversed, was very slight to the Bow River and cannot be more than one hundred feet. Nimrod soon started again into the woods and found a trail which he followed when he heard most furious fifting; in a short time he returned with a high state of glee, having shot a moose. If Nimrod had not killed the moose, the old grey horse would have had to be sacrificed that day."

In these short extracts you have not only the origin of the name "Kicking Horse Pass" but also an account of the discovery of the pass and of the severe conditions under which it was traversed by the first white explorers. Five passes altogether were explored by the Palliser expedition.

(Signed) C. M. HECTOR.

Presentation Made at Metropolitan Church

—Photo ready for Illness.

MR. EDWARDS REMOVED

Women's Home mission service is organized in Metropolitan Church, but has been celebrated by the chief and congregation with a big authority. Mr. Edwards' grandfather clock was presented, together with an illuminated address and testimonial.

URGES CAUSE OF RED CROSS SHOP

Mr. H. W. Hart Appeals to Local Firms Not to Divert Trade by Making of Poppy Wreaths

Mr. H. W. Hart, Hon. Organizer of the forthcoming Armistice and Poppy Day Celebration, made the following announcement yesterday:

"It has been brought to my notice that the Armistice appeal suffered considerably in past years through local firms making wreaths, which included a few Red Cross poppies, and selling them for Armistice observance.

"By charging less than the Armistice Period Committee considerable trade was diverted from the Red Cross Shop. Disabled veterans were deprived of work, and the sick and needy denied the assistance which the Poppy Fund effords.

"Armistice was won on pain, hardship and endurance, and France is hallowed by the graves of our comrades. Poppies form a link between the living and the dead, and I am confident the firms in question did not realize they were adding to the sufferings of veterans and taking away the sacred significance of our debt to the honored dead, by this competition.

"In the name of our comrades, whose memory is honored throughout the Empire at Armistice, we plead with all loyal citizens to leave the Armistice wreath and poppy business where it belongs—in the Red Cross Shop, where it provides help and comfort for those who have health and strength for the freedom of all."

ENGINEERS DISCUSS TREMENDOUS SCHEME

MARSEILLES, France, Oct. 11.—The most stupendous engineering scheme the world has ever known is in the process of being blue-printed by three leading engineers.

They have spent four years in a preliminary survey and in three years more will be ready to propose a plan which will change the entire map of Southern Europe, join the Mediterranean islands to the mainland and add large areas to the possessions of France and Italy and turn the Sahara desert into the world's most prolific garden.

At least a hundred plans for irrigating the Sahara desert have been advanced within fifty years but none so thorough as this one. The scheme is to build two superdams, one at Gibraltar and one at the Dardanelles and bottle up the Mediterranean until it becomes a fresh-water lake, supplied by the Rhonem and the Rhone rivers. Enormous pumps will be installed to force this water into canals leading to the desert.

The engineers' estimates present interesting figures. Figuring the surface of the Mediterranean at approximately 2,500,000 square kilometres, they claim that the two dams and the water pumped into the canals would account for 4,000 cubic kilometres of water, which would lower the level of the sea some five to six hundred feet.

This, the engineers point out, would mean a gain of some 450,000 square miles for the countries bordering on the Mediterranean. A study of the sea bed has convinced them that eighty per cent of this land would eventually be inhabitable. They also claim that half of the reclaimed desert would be fertile within twenty years.

They admit that tourists would be rather upset if they attempted to travel under the shade of an old Baedeker. The Adriatic Sea would be no more than a gulf. Trains would run along the dry canals of Venice. A nice automobile tour from Naples would be to Capri and then along the mountain road to Malta or Sicily. Marseilles would be a seating city of the past, some thirty miles from the sea.

Though the engineers admit that they do not expect the governments of Europe to take kindly to their scheme, they seem to be enjoying themselves.

Visitor (to baby boy)—And how old are you, my little man?

The Baby Boy (indignantly)—I'm not old at all. I'm nearly new.

At London Letter

New Play, "Jew Suss," Makes Great Hit—Gallery "First-Nighters" Wait in Queue for Thirty Hours—Hon. Anthony Asquith Opens "Pandemonium" Exhibition of Paintings—Notable Women on New Labor Government Described

By ELIZABETH MONTIZAMBERT

LONDON, Sept. 27.—(By Mail)—An unusually wide-spread interest was evinced before the premiere of "Jew Suss," caused partly by the peculiar position of the play, and partly because it was whispered that Matheson Lang was about to portray a character of much domineering force that he would test his masterly powers to the full.

The "first-nighters" for the gallery, characteristically English, began to gather for the first-night performance at about 2.30 in the afternoon, not of the day on which the play opened, but the day before. By the evening there were about fifty of them! In this instance the management provided them with coffee, lunch and tea, and photographs were in half the agent's shops, so they did not mind waited, and this time everyone got their money's worth, for not only the play—book, actors, staging—suited the theatre and complete success. And seats were sold out for months ahead.

The lead star of the evening was Peggy Ashmore, who played Naemi, the daughter, with, in her bearing sweetness of innocent love and terror that ere the attribution of unwakened youth. Many a woman in the audience must have recognized in that scene something that was and said and felt, yet forgotten, or that it was almost forgotten.

And the difference that an ideal in love was strikingly illustrated by Jean Maude as Magdalen (daughter of the Rabbi's wife) of the period. Youth that kills itself—and youth that lives—for love. It was a bit of contrast and exquisitely portrayed in both cases.

Frank Harvey was magnificent as the Duke, whether he sailed or as a soldier rolling with power and ingratiation. Veronica Turley was lovely in her small but necessary part, and a complete surprise after her appearance in "77 Park Lane." But, of course, every part is subservient to that of the Jew, who acts—as Matheson Lang acts—from the brain.

Leon Prachtwanger wrote "Jew Suss" as a play; it is for him and re-note it as a novel conspicuous for its lack of conversation. He deemed, it became a best-seller half year ago.

When Ashley Dukes was asked to dramatize the book, he "read it once and passed it over to Audrey Hammond, who laid waste to the scenery. Dukes chose the framework for the play, and a masterly framework it is. From a book of immense length he has chosen the five scenes that remain burnt into the mind, just the scenes you would wish remembered and cherished. As the play unfolded it seemed as though the book had come alive; almost you recalled that unwritten page of conversation that gives consummate art. The whole introduction lightly sketched with the sure, swift strokes of an expert craftsman. The Jew's rise to power and power, his ruthless love, the hot passority of the great lady that sealed his fate for good or ill, the life and death of his daughter, his revenge, and himself (a different character, destroying what he had built, his honor) faith, and the eclipse (which takes a quarter of the book) complete in a quarter of a scene. Recalling the long-drawn agony of the life tending to your mind by a hush, a prayer, a gesture. Across the lapse of a year since I read the book, nothing seemed left out.

The character of the Jew—proud, servile, humble, cunning, cruelty, generous, bold—sacrificing the woman he loved for his ambition, and himself twice over—for revenge and then for penitence in the triumphant creating of Feuchtwanger, Dukes and Matheson Lang. And Lang dominated the play as the Jew dominated the court.

In the hands of a lesser artist the play might have touched the danger point, for it is only sense drama, but at times that very melodrama that life itself sometimes springs upon us. But when the curtain fell on the fourth act, there was a long moment of silence before it broke into a great rush of applause. But the Jew's lovely little daughter remained dead. And I, like many others, was grateful for that simple bit of artistry, so often and so carefully omitted from the stage, where my accustomed hearts are grateful for a momentary illusion.

It is a play that no visitor to England will want to miss, nor need they I should imagine. If they come within the next year or two, and order their seats when they buy their steamer tickets!

WHERE PANDEMONIUM REIGNS

The fourth exhibition of the Pandemonium group of painters was opened last week by the Rt. Hon. Anthony Asquith, small and slight, who bears a marked resemblance to his mother, in spite of the fact that he has tawny curly hair, and wear a full and complexion to match. His speech was either very carefully prepared or a stroke of genius, it was so unbeatingly apt, and so delicately turned, and ended while every one was enjoying it.

The group, which began with four friends, members of the same school of art, chose its name because nobody was following the same ideas. Senor Barbrous has an amusing style, rather like that of the old fashion prints where our mothers wore bustles. He is distinguished for soft colors of singular delicacy. I was greatly entertained by his picture entitled "Crossing the Rubicon."

A WOMAN OF IMPORTANCE

One of the most interesting members of the new Labor Government is Miss Pickton-Turbervill, O.B.E., who represents in a rather dramatic form a phase of the evolution in thought and government in England today. Miss Pickton-Turbervill grew up in a stronghold of Conservative tradition and training. But her forbears were forthcoming folk who invaded England with Norman William and settled in Glamorganshire, where the family still lives (Coety Castle (of which they took possession in 1091) is still standing. But later they moved to Ewenny Priory (built by the Normans, and one of the monasteries suppressed by Henry the Eighth), distinguished by the only cathedral that is private property, and which stands within its old grey walls.

Coming straight from school to her fathers' estate, the young girl took a burning interest in the bodily and spiritual welfare of the workmen employed on the Vale of Glamorganshire. She not only walked up and down reading the Bible aloud to them at their work, but her planning and installed decent reading and living rooms for the men, who had been herded together in inventory fashion. Brought up with several brothers, she had more than a dash of the masculine points of view. She carried a well - balanced mind through a wide range of experience which covered social work in many of the poorest parts of London; six years in India with the Women's University Settlement as missionary and lecturer; a great deal of work for women in the church, some of it in partnership with Maude Royden, and years of service with the Y.W.C.A. and the International Council of Women. She is vice-president of the World's Y.W.C.A., did outstanding work during the war in regard to the conditions under which women were working, was the first vice-chairman of the Consultive Committee of all the important women's organizations, formed by Lady Astor in 1921, is a member of the council of the League of Nations Union, and has written a number of well-known books on social and religious subjects. Her abilities are widely recognized as a lecturer, writer and thinker, not only in England and abroad, but also in Canada, which she has visited twice.

Oddly enough her politics were those of environment, rather than conviction, till she began to feel strongly that it was in Parliament that she could go most deeply to the roots of things, and do most for women. She joined the Labor party in 1918, a proceeding which she describes with a twinkle as "the triumph of conviction over truth conviction." At the last election she successfully contested the Wrekin division. The Prime Minister himself spoke at some of her meetings, and brings her out as a sane judgment and a wide experience, but something of a prophetic vision in the old of her party.

Miss Pickton-Trubervill is a handsome woman of commanding presence, tempered with a disarming smile. She lives in a tiny delightful house in Cayfere Street, Westminster, which she converted from a lot of tiny rooms into a house. Cayfere Street itself (about a span long) is typically Westminster. It houses one shop, one office, two houses about to be pulled down, two houses just put up, and two modern palaces on one side and on the other, six little houses like sturdy lay-sisters whose dark frocks (of old bricks) are smartened with the gay 'kerchiefs of their doors and shutters of brightest hue.

Miss Pickton-Tubervill's is the corner house, with an elbow in Smith Square. A step to the left, and you are in the Houses of Parliament, a step to the right and you may hang over Lambeth Bridge, watching the glittering lights that set off one of the loveliest views in London, and see the moon rise over the river.

Many Canadians know and love this little house, which is sometimes to let when its mistress is away. Mr. H. W. Baldwin, secretary to the Prime Minister of Canada, and his sister occupied it for some time when they were in England; and Mr. Thomas Thodi, of Calgary, has twice made it his headquarters while in London, collecting treasures for his antiquarian collection.

A SPLENDID DISPLAY

Messrs. James Shoolbred & Company have carried out a very successful display of Canadian produce, organized by the Department of Trade and Commerce in London. But many Canadians would like to see something of a less impersonal nature carried out, that would show the human side of Canada in a way that could not help to be interesting to the women shoppers. It is splendid, as well as Biblical, to be known by our fruits, but it should not be difficult to give an object lesson to the country and its provinces, that everyone could carry home with a new understanding.

A CANADIAN SOPRANO

Madame Jeanne Duseau, who has been greatly acclaimed in Canada, who recently sang before Their Excellencies Lord and Lady Willingdon in Ottawa, where she was entertained by the Prime Minister, will make her first appearance in London at Wigmore Hall on October 15.

Lieutenant-Colonel A. E. Harris, Royal Canadian Artillery, has arrived in England and will attend the Senior Officers' School, Sheerness.

Captain G. P. Morrison, R.C.A., is in London, stationed for some months in connection with certain military duties.

Flying Officers A L. James and F. O. Wall, R.C. Air Force, have recently arrived in England. The former will attend an aeronautical engineering course at the Imperial College of Science and Technology, the latter, a flying instructor at Sealand as the R.A.F. Central Flying School.

Recent callers at the office of the Agent-General for British Columbia include Mrs. Reginald deW. Freeman, Mr. and Mrs. J. W. R. Adams, Mr. and Mrs. F. R. Adams, Miss Margaret Calbrick and Miss Margaret Adair.

Take Photographs While Down on Floor of Ocean

NEW YORK, Oct. 12.—Spirits, mermaids, seven and a half months young; if she could talk would have some tall tales to tell her Chicago sons of her playing and sleeping on the floor of the Atlantic Ocean. She returned recently with her father and mother, Mr. and Mrs. J. H. Williamson from an expedition to the Bahama Islands during which her father collected specimens for the Chicago Field Museum and made photographs on the ocean floor from a special flexible tube.

They often took Sylvia down in the tube with them while they were making photographs, Mr. Williamson said, and she slept peacefully on the ocean floor where it was cool and quiet. Mr. Williamson said he had shipped three carloads of specimens to the Field Museum, including several reels of movies taken from the tube.

20,000 Shoes Stock Must Go!

Highest Grade Stock of Men's and Boys' Shoes Must Be Sold

At 9 o'clock tomorrow morning our doors open on the greatest shoe sale of years. With the block sold over our heads we have had notice to vacate, and we are forced to clear our entire stock on this short notice.

Don't Forget, Everything Must Be Sold

600 Pairs Boys' School and Dress Boots. Regular from $2.50 to $7.50 Price— **$1.95, $2.95** and **$3.95**

480 Pairs Men's Work Boots, tans and blacks, all styles and sizes. Regular up to $7.50 for **$3.95**

90 Pairs Men's Boots, Dr. Reid's Cushion-Sole Boots, in calf and vici kid. Regular $14.00 to $14.00 for **$6.95**

300 Pairs Men's Boots, tan and black. Hartt's and Gold Bond makes. Regular $12.00 to $14.00 for **$6.95**

900 Pairs Men's Boots in the following makes: Slater's, Dr. Specials and Arch Defenders, for **$6.95**

2,000 Pairs Men's Oxfords in all styles and sizes, tan and black, for **$2.95** and **$3.95**

200 Pairs Men's Oxfords, black and brown, all sizes and widths. Just arrived from England from the makers of the famous Cable Shoe, for **$6.95**

350 Pairs Men's Oxfords, tan and black, all sizes and widths. Very latest styles. Smart dress shoes for young men, for **$6.50**

350 Pairs Men's Fancy Oxfords, sport last. These have just arrived in for Fall and early Spring trade. For **$6.50**

300 Pairs Men's and Boys' House Slippers. To clear at from **95c** to **$2.35**

This is a closing-out sale on VERY short notice. Therefore we cannot exchange or refund money.

Doors Open at 9 A.M.

Accurate Details Of Former Ships Presented to Navy

Major Longstaff, Convener of Maritime Committee of B.C. Historical Association, Donates Interesting Photographs and Descriptions

To Form Permanent Record Of Early Days in Esquimalt

THE value of maritime history in its application to the training of naval officers of the British Empire has come into its own lately at Whitehall and elsewhere, the Admiralty being strongly insistent on the advantages to be derived by the officer of today from a study of the means of navigation and methods of warfare of the officer of yesterday.

The recent presentation to the officers of the Royal Canadian Navy at Esquimalt of a number of framed photographs of ships, together with their full descriptions and an accurate summary of the history of each, has, therefore, an added significance. This presentation was made by Major F. V. Longstaff, convener of the maritime committee of the B.C. Historical Association, and will not mark the first time by any means that the association has proved of material assistance to the naval and military forces of the Province. The result of Major Longstaff's presentation will be that the descriptions and records of these ships will be available for all time to the officers of the Esquimalt station.

TO BE PERMANENT RECORD

To the wardroom of the Royal Canadian Naval Barracks (H.M.C.S. Naden), Major Longstaff has presented photographs of H.M.S. Constance, Gorgon, Boxer, Cormorant, and a double photograph of H.M.S. Rattle and Zealous. These items are to be made a permanent record and presentation, and retained in the wardroom while the barracks are in commission, as is the case with presentation pieces of plate.

Two framed photographs of torpedo boats and torpedo boat destroyers have also been presented to the wardroom of H.M.C.S. Vancouver. These will be retained while the ships in commission. In the event of her being decommissioned they will go to the senior successor destroyer, if any, or to the wardroom of the Naval Barracks.

The first of the photographs is of the frigate Constance, which was the first British man-of-war to enter Esquimalt Harbor, arriving on Tuesday, July 29, 1846. The photograph is taken from a pencil sketch which is now in the Provincial Archives.

The Constance was the second ship of her name and was launched at Pembroke in the year 1846, having a tonnage of 2,132, a length of 186 feet, a beam of 52 feet 4½ inches, and a draft of 18 feet 4 inches. She carried fifty guns, and was converted into a screw driven vessel with 500-horsepower engines in the year 1862. She was commissioned for the Pacific station at Devonport on August 3, 1847.

H.M. FRIGATE GORGON

H.M. Paddle Frigate Gorgon was built at Woolwich in the year 1837, and was finally broken up about the year 1865. At that time she measured 1,108 tons, which would give her a displacement, as now calculated, of about 1,412 tons. She was fitted with copper boilers and had a nominal horsepower of 400. She was entered in the Navy List as a six-gun steam vessel and spent all of her time on the Pacific station in the waters of Central and South America.

Another picture reproduced from a photograph in the Provincial Archives is of H.M. Frigate Sutlej. Launched at Portsmouth in the year 1855 as a wooden screw-driven frigate, she measured 3,068 tons. Had a horsepower of 500, a complement of 500 and was armed with thirty-five guns. She was commissioned as a private ship at Portsmouth on September 18, 1862. In the following October she was fitted with a poop and became the flagship of Rear-Admiral White, C.B. She arrived in Esquimalt harbor on June 13, 1863.

The photograph shows Rear-Admiral Hon. Joseph Denman on the bridge of the vessel and Mrs. Denman on the poop. Among others in the group is Lord Charles Beresford, who at that time held the rank of midshipman. About the time that the picture was taken the Sutlej had returned from Cheapeek Sound, where she had been chastising some Indians for the murder of white sailors. Her name is not found on the Navy List after the year 1868.

AN EARLY IRONCLAD

Another photograph is of H.M.S. Zealouse built in the year 1863. Begun as a wooden line-of-battle ship at Pembroke, she was cut in two, lengthened and covered with four and a half-inch armor plating, backed by thirty-inch teak. She was launched in the year 1863, measured 8,027 tons and carried twenty guns. The Zealouse was commissioned for the Pacific station in 1866 and arrived at Esquimalt on July 18, 1871. On the day before the Colony entered the Dominion. Standing on her poop in the photograph is a flag officer who was probably Admiral Hastings, after whom Hastings Street, Vancouver, was named.

Then comes a photograph of H.M. gunboat Boxer, lying in Victoria harbor somewhere about Christmas Day, 1870. This photograph was taken by Mr. Maynard. The Boxer was launched at Deptford in the year 1867, measured 446 tons and was armed with four guns. She was commissioned for the Pacific station on November 2, 1868, and was recommissioned at Esquimalt harbor on February 10, 1872.

OPENING OF DOCK

Another photograph is of the formal opening of Esquimalt dry-dock by H.M.S. Cormorant on July 20, 1887. The tenth ship of her name, the Cormorant was built as a composite sloop at Chatham in the year 1877. She measured 1,193 tons, had a length of 179 feet, a beam of 36 feet, a complement of 138 and carried six guns. She was commissioned at Portsmouth on May 26, 1885. The formal opening took place in the presence of Lieutenant-Governor Nelson and Rear-Admiral Sir M. Culme Seymour.

The torpedo boat destroyers Virago and Sparrowhawk were both built in the year 1895. They had a length of 210 feet, a beam of 21 feet 7 inches and were driven by twin-screw engines developing a speed of thirty knots. Both of these ships arrived in Esquimalt harbor in January of the year 1896 and during their time on the Pacific station were detailed for local defence purposes.

The last of the photographs presented is of Torpedo Boats No. 38 and No. 40. These vessels were built by Yarrow in the year 1887 and were fitted with one torpedo tube. They arrived in Esquimalt harbor on July 31, 1888, during the scare of war with Russia which was prevalent at that time.

William H. Vanderbilt was discussing Winter resorts at a Newport luncheon.

"Of course," he said, "we have better Winter climates than the Riviera right here at home, but all along the Riviera the hotels are good.

"Now, our Southern hotels, when you get off the beaten track—well, I'll tell you a story.

"A Southerner advertised his hotel as a Winter bower of roses and humming birds. A New Yorker read the advertisement, and the name of the Southern town, Osawatomie, sounded very attractive and cold World to him, so he wrote and asked for terms.

"The Southern hotel man hurried home to his wife with the New Yorker's letter.

"Mother, he panted, here's a letter from a New Yorker. He wants to come down here for the Winter but he asks if we got a bath. What'll I tell him?

"Tell him the truth," the hotel man's wife said. "Tell him if he needs a bath he'd better take it before he comes."

Modern Young Man (after kissing a modern girl)—I'll be perfectly frank with you. You're not the first girl I've kissed by a long shot.

Modern Girl—And I'll be equally frank with you. You're a great deal to learn, even at that.

Sparrowhawk and Virago at Esquimalt

HER Majesty's Torpedo Boat Destroyers Sparrowhawk and Virago were built in the year 1895, and arrived at Esquimalt Harbor in 1896. During their time on the Pacific Station they were detailed for local defence purposes. The above photograph is one of those presented to the wardroom of H.M.C.S. Vancouver by Major F. V. Longstaff, Convener of the Maritime Committee of the B. C. Historical Association. The nearer of the two vessels in the picture is flying the flag of the Rear-Admiral.

FIRE PREVENTION WEEK CLOSES

Successful Propaganda Has Been Carried Out in Check Loss by Outbreaks

Yesterday was the end of Fire Prevention Week, October 6 to 12. Fire prevention has been the idea behind the insurance agents and companies throughout the Dominion of Canada to remind property owners to make their premises safe and so keep the fire waste from increasing.

In British Columbia three cities have been destroyed, Vancouver in July, 1886, caused by neglected clearing fires, the destruction of New Westminster, October 10, 1898, caused by sparks igniting hay storage, and the city of Fernie, in 1916, from forest fires.

Common causes of fires from spontaneous combustion are oily paper, waste, benzine, rubbish, oily rags and paint materials, and from thoughtless handling of matches, gas fires, materials and chemicals, electricity, pipe ashes and cigar stumps.

Are we as careful as we should be? Many fires are the result of carelessness and are therefore preventable. Instruction will induce carefulness, eliminate ignorance and result in the removal of conditions which cause fires or help them to spread.

The Victoria and District Fire Insurance Agents' Association requests the public to study the following suggestions which have been tabulated by the Dominion Fire Commissioner, as by their adherence to same a large proportion of preventable fires will be eliminated:

1—Have all flues and chimneys properly cleaned before attempting to use them.

2—Look very carefully at the chimney or flue at the point just above the peak of the roof, where the chimney goes through, as the lower part may have settled and the upper portion, being held up by the roof timbers, may have pulled away, leaving an open space or break in the chimney that will permit sparks slipping through into the attic or concealed space.

3—Be sure that all flue holes that are not to be used this year have good metal stops, as innumerable fires are caused by sparks through papering over unused pipe holes in chimneys.

4—Clean the ventilating collars around all flues, removing all lint, cobwebs and dust, leaving nothing in the ventilator, in this way permitting the air to cool the pipe where it goes through.

5—Be careful that a supply of wood is not piled up in the yard in such a manner as to carry fire to your house in case your neighbor's house should burn.

6—It is best to keep all light wood, kindlings and boxes, in sheds, stables or basements, in orderly piles, and not in have papers or excelsior mixed with it.

7—Extra precaution should be used in the handling of gasoline. In the Winter months all windows and doors are closed, eliminating the possibility of the air blowing the inflammable vapors away.

8—Never use gasoline inside the house for cleaning, and when compelled to use it for any other purpose do not forget that you are handling a dangerous explosive which may endanger your life and property.

9—Remove all dry grass from your premises before someone carelessly throws a match away.

10—Do not dry clothing and inflammable materials above or near a hot stove.

Decide NOW to Enter for Annual Local Examinations

Pianoforte, Singing, Violin and all Orchestral Instruments

Though these examinations—open to the pupils of all teachers and held by competent and impartial examiners—the standing of a student may be ascertained and progress tested. They are also preparatory to the diploma and degree courses in music, which, taken from McGill, the national university of Canada, are recognized everywhere as of the highest standing and through them it is possible to qualify as teacher of Vocal Class Music in Schools and Colleges.

Theoretical examinations will be held on or about May 1st, and Practical Examinations during May and June at various centres throughout Canada. Preparations for the examinations should be commenced at once and further information regarding the different grades, music to be prepared, fees, etc., and application forms may be obtained by applying to the local

Secretary, Dr. J. E. Watson, 1007 Fort St., Victoria,

October Heavens, Illustrated by Chart

8:30 P.M., October 30.

By "ASTRAL"

AT the beginning of this month the sun was about three degrees south of the Equator, and this is being increased to slightly over fourteen degrees at the close. On the 1st the sun rose at 6.13 a.m. and set at 5.32 p.m., whilst on the 31st it rises at 6.58 a.m. and sets at 4.56 p.m. The duration of daylight is consequently forty-two minutes less at the close than at the beginning of the month.

New moon occurred on October 3 and full moon will occur on October 18. The only two planets that can be seen this month are Jupiter and Venus, both in the latter half of the night. Mars and Saturn have got too far to the west for observation. Venus rises at 3.30 a.m. on the 1st of the month and an hour later on the last day, so her glories will be only for early risers. Jupiter, however, is coming into more favorable position for observation as the days go by, and by the middle of the month will rise as early as 6 p.m. Thus around midnight she will be in good position for observation. Her four brightest moons make an interesting object for study in a small telescope or a good opera glass. It will be noted also that crossing the disc of the planet, parallel to the plane in which the moons are situated, are streaks upon her surface. These are atmospheric markings due to the fact that her rapid axial rotation, about 26,000 miles per hour at the equator of the planet, draws the atmosphere out into parallel streaks. It will be noted also that the diameter parallel to these streaks—that is, the equatorial diameter—is considerably greater than the polar diameter.

The accompanying chart portrays the heavens as seen at 10.30 p.m. on the 14th, 10 p.m. on the 22nd, or 8.30 p.m. on the 30th of the month. If suspended at the centre and allowed to droop down all around, the stars and groups will be readily identified when the chart is held directly overhead.

Prominent almost overhead, though a little to the south, is the great square of Pegasus formed by the three bright stars of Pegasus and the bright star of the neighboring constellation Andromeda. It is a very good starting point to locate other groups, as it is so easily identified. The sides of the square average about thirteen degrees and, remembering that the full moon has an angular diameter of half a degree, one can soon fix upon it.

Leading off from alpha Andromeda at the northeast corner is a line of bright stars which form the constellation Andromeda proper. The group is supposed to represent a lady, but many faint stars, much too faint for the average eye, must be seen to round out the figure. According to mythology, Andromeda was the daughter of Cepheus and Cassiopeia and, like many another fond mother, Cassiopeia boasted that her daughter was fairer than all others—in this case fairer than the sea nymphs. This attitude was offensive to Neptune, who dispatched a monster of the deep to ravage the seacoast. Cassiopeia, terrified at the prospect, besought the aid of the all-powerful Zeus, who ruled that her daughter, Andromeda, must be sacrificed to appease the wrath of the sea god. Consequently Andromeda, amid great lamentation, was chained to a wave-washed rock, there to await the coming of the sea monster to devour her.

In addition to the bright stars in the group there is a fussy object, seen near the cross which marks the *gwerhead* point, which is none other than the great nebula in Andromeda. It is understood to consist of multitudes of faint stars so far removed from us that their light is blended as a suffused glow when it reaches us.

To the south and east of Andromeda are three constellations, Triangulum, the triangle; Aries, the ram; and Pisces, the fishes. All of these can be located with the aid of the chart.

Further around to the east; indeed almost about due northeast at the hour mentioned and halfway up from the horizon, may be seen the Perseus group situated in the Milky Way. The bright star beta Persei or Algol, as it is often called, has a dark companion which every two days and twenty hours eclipses it as it moves in the orbit about it. This is an interesting object for amateurs to follow.

Music and Stage

Comment on Current Events

By BEATRIX F. CAMERON

A modern Frenchman says "Music is a breath of sound which passes by and is gone."

William Armes Fisher, in an article of recent date, "What is Music?" says in part: "Nearly three centuries ago, old John Playford said that 'Music is an art unsearchable, divine.'

Someone else has called music "the enchantment of sound," but why are we enchanted? This question goes far beyond aesthetics or acoustics. It overlaps all history, for among all nations, in every stage of human progress, music in some form is found.

From the lowest stages of barbarism to the highest stratum of culture music has played its part in the religious and social life of every people.

Not only is music of all the arts the most direct expression of emotion, but it has also the power of awakening emotions, and in arousing or quickening a mood.

What is this power? Why should one combination of sounds exalt and another depress?

The musician will say "Music is music." The psychologist is baffled. The listener contents himself with either being bored, or with statements of personal reactions to music and its performance. The composer is inclined to analyse the art in which he is creative. The preacher will probably seek to identify music as morality and religion. The expressionists—or those who interpret musical compositions—tell us that music is the language of the emotions, and in this direct outpouring of man's inmost thoughts and feelings lies something of the glory of music and its infinite variety.

Details of the Metropolitan Opera season of 1929-30 was made known last week in the prospectus issued by Director Gatti-Casazza. The season will last twenty-four weeks, and in addition to the regular repertory there is a list of seven operas and revivals. The one opera new to American audiences is "Fedra," composed in the '90s, but not yet produced in this country. It is one of the most effective of the operas of Rimsky-Korsakoff. There will be a revival of "Don Giovanni" and Verdi's "Luisa Miller," which has not been heard at the Metropolitan for many years, will be given under the setting such as the Metropolitan alone can provide.

Lucrezia Bori will sing in Charpentier's "Louise," and Maria Jeritza in the title role of "The Girl of the Golden West." Beethoven's "Fidelio" will be directed by the new German conductor, Josef Rosenstock, who replaces Arthur Bodansky for the German opera.

The first performance of Grossen's opera "Judith" recently took place at the Royal Opera House, Covent Garden.

It was especially significant because it was the product not only of one of the most distinguished British composers, but of his collaboration with a great English man of letters. Mr. Arnold Bennett's libretto would alone attract serious attention. It is a powerful piece of work, well adapted to musical treatment because of its swiftness of action and directness of expression. It is one of those rare instances in opera where composer and poet meet on equal ground.

The collaboration of Bennett and Goossens will compare favorably with that of Maeterlinck and Debussy.

The music is the strongest and most striking piece of work written by Goossens, and reveals a new side of the composer's personality. The violent tragedy of the slaying of Holofernes by Judith is accompanied by a score that is intensely dramatic and colorful, and although it follows the story faithfully in every particular, the whole impresses the hearer as a magnificent symphonic structure.

Those persons who are especially interested in chamber music will be pleased to hear of a work written by Walter William Cobbett, of London, called "Cobbett's Cyclopaedic Survey of Chamber Music."

This work is to be in two large volumes, of which the first has been published by the Oxford University Press. It is intended to be "a complete survey of the world's chamber music," ignoring those prejudices of race, nationality and school which menaces the best interests of art."

There is an interesting preface by Sir Henry Hadow, and the rest of the book is made up of contributions of a long list of musical writers of many countries. There are articles devoted to the several schools of Germany, France, Britain, Czechoslovakia and the United States. American composers are pretty completely considered, as well as the work of American chamber music organizations, of which Americans have good reason to be proud.

Peter Jorsy, or Willard Jorsy, as the writer knew him, has not dazzled his entire life to impersonating Queen Victoria, as he is doing at the present time in "Cape Cod Follies," which has arrived on Broadway. Jorsy gained his first experience on the stage trouping through France after the Armistice with a piece called "Tout Sweet," by some unknown genius. After playing repertory in Canada he appeared with Margaret Anglin. Then, he toured for three years with Jane Cowl and found a place in "What Price Glory."

Watching a friend try to impersonate Queen Victoria induced him to attempt the feat. At first he did it for his own amusement, but he found that it was a profitable business when requests to appear at clubs and parties—for a substantial fee—began to come in.

The two-piano recital relies many difficulties which do not exist for the pianist appearing alone. The performance of every phrase must be flawless, the slightest wavering is magnified and it demands a precision of attack that can be accomplished only when two exceptional musicians are playing at the two pianos.

Myron Jacobson and Berthe Poncy touch a high artistic plane in their two-piano work.

Mr. Jacobson is a composer as well, and his songs are sung by Sophie Braslau, Fedor Chaliapin, Nina Morgana, Lucrezia Bori and Geraldine Farrar, among many other singers.

Mr. Jacobson was chosen by Rimsky-Korsakoff to coach the stars for the first performances of the operas "Coq d'Or," and "Pan Voyevoda" which had their premiers in Petrograd in 1902 and 1909.

They have been rather perplexed over in London as to what they should call their musical version of "A Connecticut Yankee at the Court of King Arthur," but they have arrived at a solution. In the United States the title was "A Connecticut Yankee," but it was felt that that name would mean nothing to a British audience. The tentative title of "Sandy" was chosen, but that was felt to be inadequate. So now they have gone back to the original title, which must be a great joy to the electric light company.

MAN-MADE TORNADO

NEW YORK, N.Y., Oct. 8.—In his quest for speed, man has succeeded in ridding a self-made tornado. That, says Dr. G. B. Pegram, Columbia University physicist, is what the recent British flight at 388.6 miles an hour announced to.

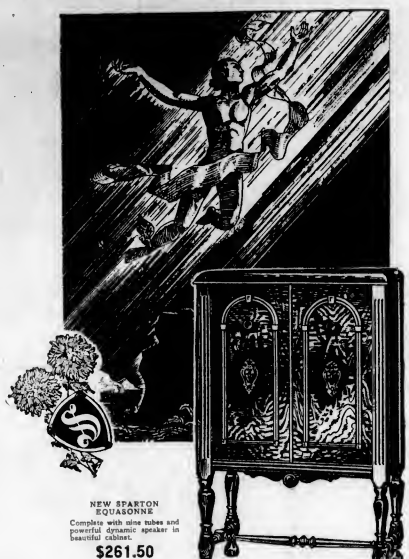
Anyone who has seen a tornado with a force capable of driving a straw into a plank, can realize the speed attained by A. H. Orlebar, captain of the British Schneider Cup team, as he averaged 357.7 miles an hour in four successive spurts over Calshot. About the only difference was that Orlebar's plane created its own "tornado." In this instance called air resistance. A real tornado has a calculated velocity of about 400 miles an hour near the vortex. That's how fast the funnel whirls around.

In Orlebar's flight the plane had the velocity, but if the plan had stuck his hand out of the cockpit the consistence probably would have been the same as when a twister hits a fence post. Orlebar's speed was approximately a mile in ten seconds.

"It wouldn't be safe to travel in anything faster than seven miles a second," says Dr. Pegram, who is dean of Columbia's engineering school. The traveler would fly off the earth into infinity." And, he might have added, eternity.

"Can a wife forgive a husband's past?"

"Usually, if the husband gives a present."



NEW SPARTON EQUASONNE
Complete with nine tubes and powerful dynamic speaker in beautiful cabinet.
$261.50

On Wings of Fame

AGAIN SPARTON soars to new heights—each year has marked another SPARTON triumph, but now, as never before, the new SPARTON 1930 EQUASONNE has placed a fresh idea of value before the buying public. Wonderful reproduction of every mood and tense of music, startling selectivity, together with cabinet work of artistic design are brought within the reach of all at a price amazingly low.

If you have not already seen this magnificent set, call today. See, hear, and be convinced. It is now on display.

Autumn Novelties for Matron and Maid

Paris Combines Grace and Chic in New Fall Millinery

THE trend in millinery, as seen in the Paris salon, is undoubtedly away from the severe and toward the feminine. This is apparent in almost every type hat and is in strict accord with the more graceful silhouette.

The new flat soft furs find their niche in the millinery mode, and are executed with the same dressmaker details that characterize them in coats. Fur, even in collars, is very flattering to the face, therefore in a hat. At the upper left is a shining example, literally and figuratively, of what Cloupy has done with brief schwanta in black. The crown has been cut in sections and fitted, not too snugly. The narrow upturned brim follows the lower line of the crown to a point just beside the eye, then it arches to a graceful peak directly in front. The Chinese influence is seen in a cone of silk cord which finishes the crown at the top.

The softening influence has invaded both the tailored and the sports mode. The tailored hat cares not be too simple and ungarnished, but it must be new ensemble. Agnes has very delightfully incorporated the tailored, the sports, and the graceful in her chic turban, which is seen at the lower left of the picture. The tweed is fitted well and softened by gentle curving over the ears. The trimming, quite the new mode, the designer selected bright wool yarn and twisted it easily on a line that suggests a raised brim.

The bonnet, it seems, will be always with us. It is, however, a becoming type of hat to most faces and can be had in any number of styles. A simple and chic version of the bonnet uses felt for the basic shape, nicely moulded to the outline of the head, with the brim longer at the sides and tilted in the front. A soft velvet bow breaks the round, hard line at the top of the crown and comes softly over one ear.

Another variation of the turban, which is a delightful blending of the youthful and the sophisticated is seen in the satin hat in the centre. This is the design of an American couturiere, Florence Walton. The crown is tucked above one eye, for all the world like the aboriginal raised eyebrow. The satin is crossed low in the back, and then brought to the side in pert loops.

Satin is used again at the extreme right. This is an Agnes version of the fisherman theme. Absolutely no lifthming is used, the soft limp lines of the satin, falling on the sides to shoulder length, rob the skull cap crown of too harsh lines.

Paris Mirror of Fashions

By ALICE MAXWELL APPO

MOST novel and smart of the new collections is the manner in which soft furs are handled—manipulated like fabrics. Breitschwanta and broadtail are easily used in this way. Lelong makes a jacket suit of black broadcloth with a tie collar, wide cuffs and hip section of breitschwanta widely scalloped and applied as if it were a supple silk.

Shoulder bows are in fur. August Isbernard uses one of these for a suit and adds a fur frill at the bottom of the three-quarter-length coat. This frill very obviously is gathered, as is also a sleeve puff in fur. Patou employs fur bow to finish the neck of some of his suits.

Incrusted bands of material are very marked in Patou's new day and evening dresses. These bands cross the hip and terminate at the hem, sometimes widening out to form godets. Fabric straps in Grecian effect also are a detail, the straps starting from the shoulder and crossing at centre front to continue around to the hip at each side.

Gloves have become a pronounced factor in the effectiveness of a costume, particularly in evening dress. Worth showed a coral red mousquetaire type with a white satin gown having a coral ornament at the side.

Maggy Rouff specialized in suede mousquetaires of flesh tint, while Bernard et Cie added a touch of black in the embroidered back of flesh gloves having two self bracelets rather high up on the arm. These were fastened with jeweled black buttons.

Some jewelry seen in the late Summer collections is very unique. Marcel Rochas covers beads with leather to make novel necklaces of very original design.

Vionnet's large chokers are in reality wooden beads with cords from them passed over them. The speckled feather in natural brown is particularly attractive. Stones do not always serve in the creation of modern jewelry.

PARIS—The August openings in all houses stress the new silhouette. The natural waistline is seen in all types of garments in all kinds of forms. Sportswear and the informal afternoon and street frocks use belts a great deal for accentuation. The formal afternoon frock and the evening gown are not fitted at the waist.

Chanel uses mink bands on a blue velvet evening gown which features culottes. The culottes are fur trimmed, also.

Fur is used by Irene Dana in a black lace frock. An inset of seal was set in the lace cape, which featured deep scallops.

Lace is being used largely, almost all of the better known couturiers showing at least one lace model. Cherui uses black lace in a tailored frock wherein inverted pleats give a circular effect to the skirt. A row of graduated black satin buttons reaches from collar to hips, and black satin pockets are placed at the sides above pleats.

Patou showed a dinner frock of large lace with a deep pointed decolletage. An Eton jacket effect ends in points at the back, and bands of the lace are used to outline the decolletage back and front.

Chanel uses black lace in ruffles on a long fitted bodice. The skirt is circular and a matching scarf is shorter than usual.

Color in laces is an innovation that is stressed. Violet was seen a great deal, even in daytime frocks. Green in yellow tones and a bluish shade is very good. Red figures prominently in all shades, from coral to a deep wine, much favored by Chanel. Pink is coming in, almost entirely for evening wear. Brown is being shown in neta. Grey is favored by Patou and Lelong, and blue is another Lelong favorite. Black continues for afternoon and evening and white and the ecru shades are used for trimming.

Patou introduced two new purple tones: light and dark dahlia. The light shade is a deep rose orchid, and the dark is almost a grape shade, having no brilliance, but a soft dull finish.

Tweeds and other woolen fabrics feature tailored details. The full length frock of wool seems to be superseding the silk blouse and wool skirt. Vionnet, however, uses crepe in yoke and sleeves of a wool frock that is part of an ensemble.

Cloth coats show fur trimming very extensively. Fur is not used in great quantities, but distributed. The band of fur at the bottom was seen only rarely.

The neckline is seen in very diverse types. The evening décolletage is unique. Vionnet uses a draped neckline with one shoulder covered in soft folds and the other marked by a fine strap of material. Cherruit prefers the diagonally one-sided line, cut low, while Patou favors the pointed triangular effect.

Hats are featuring more trimming than hitherto. Soft bows are used to a great deal, particularly on felts. Satin seems to be a good second to velvet in the fabric hat.

New Lines Feature Ease

IT cannot have been so long ago that Fashion used to lead her followers about, docile and admiring, no matter what her mood. Those were the days when women got the reputation of the one for dressing against their own and everybody else's good judgment. Designers ruled us. There is no doubt about it, and we may as well admit our past while pointing to our Elinors present.

It is true that there will always be fashion designers, but we have rid ourselves of the fashion dictator. The couturier in France and the American designer here have recognized that comfort is a factor not to be disregarded in smart wearing apparel. With the increased business invasion of the American woman, their largest purchaser, they have given careful consideration to her problems. She must look smart and neat; the laundry and cleaning angle must be considered, freedom of movement is necessary to the office worker; durability is important; and last, but not least, fresh fashions must be created for each season.

The October openings in Paris revealed as their most important feature, the normal waistline. In harmony with this innovation is the elongated silhouette. The natural waistline on most of the models seen is shown subtly but effectively. Belts are used to mark it. This does not mean they are drawn taut. They are merely placed higher. The sketch at the upper left shows another form of the lengthened waist line. The front of the frock shows no break in line at all, the pleating of the back and the trim half-belt designating a slight curve at the waist.

There is naturally a more daring touch to the evening frock. The flare, which has been popular for a group of seasons, is accentuated by trimming or appliques near the knee. This is done in the less fine creations by bows, a design of brilliants or something of that sort. In the frock lower left, is seen an example of a more exotic type. The knee is quite definitely emphasized here. A band of shirring catches the fullness of the skirt above the knee, and releases it within a few inches to an increased flare.

The chic coat at the top, right, and the simple frock below are influenced by the natural waistline. It is interesting to note the difference in execution. The coat uses a belt and the frock, of a soft pliable material, relies upon cut and fit. The short cape on the coat is but one of the multitude of types favored for Fall. The woman who can wear a cape is very fortunate, since the trend assembles may boast a full-length cape instead of a coat. Fur capes are returning in favor, also.

The frock at lower right is one of the best examples of the moderate and practical version of natural waistline and long silhouette. The flare starts low, and the skirt, while fitted at the hips, is not voluminous. Lingerie touches at the collar and pain slim sleeves add little the slim and feminine mood.

Long Coats of Wool in New Ensembles

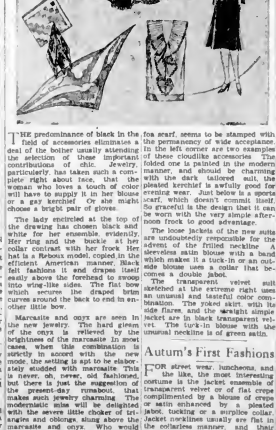
PERFECTION in coloring and weaving has moved tweed, in a short space of time, to high importance as a Fall dress fabric. When it is combined with a coat of the same material, it goes practical as well as chic.

The tweed ensemble of this season has gone considerably further than the same type of garment which was popular last year. Dressmaker details, careful bits of tailoring and the application of fur lend an air of richness and charm to the wool ensemble.

London Trades elects a coat which follows the new curving line of normal waist line and long silhouette ending in a scalloped hem. To this is added soft fur trimming at collar and cuffs and the flare of gored fullness. Brown tweed is used in the creation and repeated in the lower half of the lining. The frock is entirely tailored and straight of line. Tan tweed is used in the application of fur lend an air of richness and charm to the wool ensemble.

Jane Regny uses a knitted wool fabric having a tweed-like appearance to make the youthful frock at the lower right. Scallops and the natural waist line assert the feminine influence here The coat shows a wealth of fine tailoring at the neck and the creation and repeated treatment of the lapels The soft, full color of fur makes an attractive frame for the face and the furnes with lingerie touches at sleeves and vestee.

Black in a New Role



THE predominance of black in the field of accessories eliminates a deal of the bother usually attending the selection of those important contributions of chic. Jewelry, particularly has taken such a complete right about face, that the woman who loves a touch of color will have to supply it in her blouse or a gay kerchief Or she might choose a bright pair of gloves.

The lady encircled at the top of the drawing has chosen black and white for her ensemble, evidently. Her ring and the buckle at her collar contrast with her frock Her hat is a Rebous model, copied in the efficient American manner. Black felt fashions it and drapes itself easily above the forehead to swoop into wing-like sides. The flat bow which secures the draped brim curves around the back to end in another little bow.

Marcasite and onyx are seen in this jewelry. The hard gleam of the onyx is relieved by the brightness of the marcasite In most cases, when this combination is strictly in accord with the new mode, the setting is apt to be elaborately studded with marcasite This is never, oh, never, old fashioned, but there is just the suggestion of the present-day romabout, that makes such jewelry charming. The modernistic mine will be delighted with the seven little chaps of triangles and oblongs, along above the marcasite and onyx Who would recognize the ugly jet of, well, say thirty years ago in the smart narrow oblonged thet alternate between the sharp crystal triangles?

The chiffon handkerchief, like the fox scarf, seems to be stamped with the permanent stamp of wide acceptance In the left corner are two examples of these doublike accessories. The folded one is painted in the modern manner, and should be charming with the dark tailored suit, the Fall and Winter have advantages of the sleeveless blouse mode, but the happiest combination is, of course, with the brief jacket. The sportsuit, the formal suit and the afternoon ensemble will be infinitely comfortable if the blouse shows a little sleeve at the top.

Chanel shows two widely different types of silk frequently in a outlier sack and the a mere inch or so of the sleeve. The sportsuit is velvet suit at the left is completed by a metal clech blouse, with the belt just a little above the natural waist line The skirt is circular and the coat very simple, using straight lines and no trimming

The Jean Patou suit uses pleats in the front of the skirt for fullness, and self material epaulettes for trimming on the jacket. The coat is rather full and swings free from the shoulders. The blouse is of one of the new jerseys, with a mere breath of a sleeve and three bows of self material skilfully tied.

The youngster with the Lindbergh complex will be delighted with a suit of suedelike fabric. The blouse in windbreaker style, closing with a zipper and having two brave pockets The trousers are really leggings and also have zipper fastenings A helmet-like cap completes the costume and junior is ready for any breeze.

Autumn's First Fashions

FOR street wear, luncheons, and the like, the most interesting model is the jacket ensemble of transparent velvet or of flat crepe complimented by a blouse of crepe or satin enhanced by a pleated jabot, tucking or a surplice collar. Jacket necklines usually are flat in the collarless manner, and their hemlines vary between hip and finger tip length. The color contrast of brown with aquabluel, black with yellow or peach, or blue with a pink yellow is very smart.

Short Sleeves in Fall Suits

SUMMER, probably the most delightful of seasons in temperate climates, has been gradually influencing the year-round mode. The first step was the departure, in Fall fashions, from sombre colors and heavy fabrics. True, there is little of the pastel coloring of Summer discernible in Autumn models, but there are rich golds, warm reds and bright blues. Various tones of yellow, when used with brown, blue or black, have also found favor and the evening mode uses myriad Summer colors and Summer fabrics.

The sleeveless blouse of warm weather also proved its worth as effectively for the last two years that the couturiers have very wisely included it in their Fall showings. These blouses are worn only with a jacket, usually one of the hip length variety. Almost any type of Fall suit may take advantages of the sleeveless blouse mode, but the happiest combination is, of course, with the brief jacket. The sportsuit, the formal suit and the afternoon ensemble will be infinitely comfortable if the blouse shows a little sleeve at the top.

Chanel shows two widely different types of silk featuring a outlier sack and the a mere inch or so of the sleeve. The sportsuit is velvet suit at the left is completed by a metal clech blouse, with the belt just a little above the natural waist line The skirt is circular and the coat very simple, using straight lines and no trimming

The Jean Patou suit uses pleats in the front of the skirt for fullness, and self material epaulettes for trimming on the jacket. The coat is rather full and swings free from the shoulders. The blouse is of one of the new jerseys, with a mere breath of a sleeve and three bows of self material skilfully tied.

The youngster with the Lindbergh complex will be delighted with a suit of suedelike fabric. The blouse in windbreaker style, closing with a zipper and having two brave pockets The trousers are really leggings and also have zipper fastenings A helmet-like cap completes the costume and junior is ready for any breeze.

Two Favorites Of the Fall

CERTAIN distinctive models particularly favored and esteemed by stylists do not necessarily prove to be ordinary as a season gets under way.

The black coat, for example, always is the choice of the discerning yet it never is seen in such numbers in a world of women with a penchant for color as to lose its fashionableness and its charm.

If black is the best foil for one's coloring, the black coat designed in the princess silhouette will not be an unwise choice for the Autumn. Its possibilities are seemingly limitless in the types of fur with which it may be adorned Black fox and black bear are the ultimate in becomingness, while caracul or the flat furs have a decided sophistication

The evening gown of sheer metal assumes a leading role in formal attire, combining as it does the softness of chiffon with the glint of the beauty of the material exacting a classic simplicity of cut Supple metal fabrics are read in crepes that lend the modern effect achieved by shirring the slim sleeves and full fullness flaring from a low position.

Fur Trims Street Frocks

A TRIMMING note to seek in the New Autumn street dress of silk crepe is a bit of fur. Perhaps it is just a slender little tie—one or two perky bows. It may be a crushed collar of fur or merely ruffs. Flat furs of course, are used for this chic decorative touch, the most favored being ermine, galyak and clipped caracul. Should the chosen frock be black, the fur is likely to be white. Beige fur lends brightness to dark browns in estin and crepe. Bush shades as the Autumn reds are smartest with black fur.

Color Combinations

A rusty reddish brown is at the top of the list among early Fall colors. Many appealing contrasts are seen in new models for spring, as, for instance, beige and brown, beige and chartreuse, yellow black and chartreuse, as well as rose and red chartreuse yellow is effective with brown, or green with the latter shade, and grey is used with a dull blue Brown with turquoise is an important color harmony.

Mistress—"The main thing here is honesty. The last maid stole the silver spoons."

New Maid—"You needn't fear anything from me, ma'am. I'm bound ever for a year."

Seen in the City Shops

Some of us think all colored bed linen too much of a muchness, yet we like color in the bedroom. Pastel bordered white linen, the borders hemstitched, has been created for the milder minded housewife, and they are very attractive.

A tailored nightgown ensemble uses coral crepe de Chine. The contrasting band, which forms a V neckline on the gown, is in a lovely shade of blue. The jacket is very long, coming to the knees, and in combination, with the gown a very smart tailored negligee. A tiny applied rose in coral is placed at the V of the gown and on the lapel of the jacket.

A really practical jewel box is one with four long narrow compartments for necklace and three shorter ones, which are also large for bracelets, ring or earrings. The box is very flat and will fit nicely into any drawer. It is attractive enough, by reason of its brocadelh finish and charming print cover, for the dressing table and is lined in velvet.

The kiddies would be delighted with a gay lamp for the nursery. A table lamp with a bustle base, rather modern in architecture, shows a grave parade of elephants. The shades of parchment in a dark tone is painted with a group of children at games.

Society and Women's Affairs

Society Notes From Vancouver

VANCOUVER, Oct. 12.—Another charming debutante has made her entry into the formal society of Vancouver in the person of Miss Margaret Jean Carder, who, with her mother, Mrs. E. D. Carder, received a large number of guests at a coming-out tea and reception this afternoon. The tea table, prettily arranged with Autumn leaves and a silver basket containing Michaelmas daisies, was presided over by Mrs. J. M. K. Letson, Mrs. C. E. Disher, Mrs. W. F. Coy and Mrs. Richard Goese, while tea was cut by Mrs. Joseph Seeley and Mrs. John McShaw. Serviters were Miss Eleanor Cowan, Miss Cecil Hopkins, Miss Marion Macdonald, Miss Alice Smith, Miss Peggy Spohn and Miss Sallee Carter.

Tea for Visitor

Mrs. Scott, wife of Archdeacon Scott who addressed the Canadian Club on Thursday and came to the Coast in his connection with the dedication of the cathedral at Victoria, was the guest of honor at a tea given by Mrs. Robert Leighton. Others present were Mrs. Gillies, Mrs. W. M. Rose, Mrs. Leslie Coote, Sister Frances, Mrs. Heathcote, Mrs. Edward Leveson, Mrs. Lemoyne, Miss Pelly, Miss Walter Perrin, Mrs. E. G. Blackwell, Mrs. Mackenzie, Mrs. Campbell Johnson and Mrs. Michael Wilkinson Brughouse.

Luncheon Hostess

Mrs. J. W. Stewart was a luncheon hostess on Wednesday when she entertained for Mrs. Charles Henshaw of Caulfeild, who has recovered from a long illness. Friends invited to meet Mrs. Henshaw were Mrs. Reginald Chaplin, Mrs. W. E. Brougham, Mrs. J. M. Lefevre, Mrs. Herbert Drummond, Mrs. H. E. C. Carry, Mrs. E. P. Davis, Mrs. Alfred Maron, Mrs. E. W. Hamber, Mrs. W. E. Hodges, Mrs. Charles Lowson, Mrs. Mackedie, Mrs. Leon Dreyfus, Mrs. J. W. McFarland, Mrs. Gordon McLaren, Mrs. Angus Stewart, Mrs. Austin Taylor and Mrs. J. P. Pell.

Farewell for Travelers

Mrs. F. M. Kelly gave a luncheon party in farewell to Mrs. J. C. Hogg and Miss Helen Hogg, who are leaving in the near future for the East. Covers were laid for fifteen at a table charmingly arranged with yellow and orange chrysanthemums. Those present were Mrs. George Smith, Mrs. George Lindsay, Mrs. Graeme King, Mrs. Leslie Creery, Mrs. A. Lefurgey, Mrs. P. De Wolfe, Mrs. Eric Hall, Mrs. Gordon Smith, Mrs. Ashton Bell-Irving, Miss Naomi McMillan, Mrs. Temple McMullen and Mr. Joe Howe.

Fatally Injured on Her Wedding Day

MRS. COLIN KEMP ANDERSON

Twenty-four-year-old daughter of Mr. and Mrs. W. B. Trower, Montreal, who was fatally injured in a motor crash near Montreal, four hours after her wedding ceremony.

Mrs. R. J. Cromie, Mrs. Neil House, Mrs. J. H. Constantine, Mrs. Pierce and Miss Barbara Hogg.

For Mrs. Barnard

Mrs. Harry Barnard was the guest of honor at a luncheon given by Mrs. Andrew Lang on Wednesday when others present included Mrs. B. T. Rogers, Mrs. C. E. Thomas, Mrs. Mayne Hamilton, Mrs. Bushnell, Mrs. William Parrell, Mrs. Herbert Hulme, Mrs. William Parrell and Mrs. George Cowan.

Entertains at Tea

Mrs. Ernest Rogers complimented her sister, Miss Betty Cowan, at a tea on Thursday afternoon when Mrs. Ursula Malkin and Miss Betty Burns presided at the tea table.

Tea Hostess

Mrs. Roy Jamieson entertained at tea on Thursday in honor of her mother, Comtesse de la Riviere Catania, who returned here during the Summer after spending a year and a half in Europe.

In Victoria

Mr. and Mrs. J. A. Curran have left to spend a few weeks in the Capital.

For Miss Cowan

After spending the past few months at Kamloops Miss Betty Cowan was the guest of honor at a dinner given by Mrs. George Cowan when covers were laid for Mr. and Mrs. Arthur Bell-Irving, Miss Naomi McMillan, Mr. Temple McMullen and Mr. Joe Howe.

Goes to England

Mrs. E. B. Clegg has left for a visit to England.

Victoria Visitor

Mr. J. B. Barker, Jr., of Victoria, is here to meet her husband, who has been spending the Summer at Stewart.

In Seattle

Mrs. Foster Hunting, accompanied by Miss Janet Drysdale have been spending a few days in Seattle.

From Ganges

Miss Diana Crofton has arrived here from Ganges Harbor and is visiting Mrs. Frank de Mille. Her sister, Miss Doreen Crofton, is also here, the guest of Mrs. J. B. Farquhar.

Dinner Hostess

Mrs. Robert Gellatly was among the dinner hostesses of the past week, entertaining on Thursday.

At Deer Lake

Mr. and Mrs. Charles Beeching have removed from Gilford Street and have taken up their residence in their new home at Deer Lake, Burnaby.

Go to Victoria

Miss Frances Gatewood and Miss Mary Gatewood left on Wednesday for Victoria, where they went to meet Miss Frances Frazer, who has been travelling in the Orient. They returned by the Aorangi.

At Harrison

Major B. C. Sweeny is spending a few days at Harrison Hot Springs.

Hostess at Dinner

Miss Mildred Clark was a dinner hostess this evening, honoring Miss Jessie Lambert, who, with her father, Col. A. E. Lambert, is to leave next month for Europe. Guests included Miss Marion Robertson, Miss Enid Clark, Miss Lila Malkin, Miss Sheila Lambert, Miss Winifred Hendry and Mrs. Alec Swanson.

Navy League Chapter Plans Children's Ball

The regular monthly meeting of the Navy League Chapter, I.O.D.E., took place on Thursday afternoon in Headquarters, Union Building, with the regent, Mrs. Mortimer Appleby in the chair. The members were pleased to receive a gift of the consecration service ritual of the new Christ Church Cathedral from the municipal regent, Mrs. Heisterman Gillespie. The educational secretary, Mrs. Alice Thomson, reported that bursaries in connection with nominal education for soldiers' children had been donated this year, also that the I.O.D.E. patriotic calendars were now obtainable. It was decided to order one hundred.

On motion of Mrs. Gordon Smith it was unanimously agreed that the amount required from each chapter to complete the quota for British Columbia for the I.O.D.E. War Memorial should be forwarded immediately.

The chapter, having purchased two of the handsome books, "Our Island Story" and "Round the Wonderful World," from the National Chapter, it was decided to present them, in the name of the chapter to the Sea Cadets to form a nucleus of a library for their use.

Mrs. Gordon Smith was asked to carry the chapter's vote at the semi-annual meeting of the Provincial Chapter at Chilliwack. Arrangements are under way for the children's annual fancy dress ball, to be held at the Empress Hotel on December 27 for the fifteenth year in succession. This being its fourteenth week planned by the C.P.R. it is expected the ball will be a greater success than ever. The following members are cordially welcomed back into the chapter: Mrs. T. A. Johnston, Mrs. Aubrey Kent, Mrs. A. Walker and Mrs. Hugh Lowder, of Shanghai. Mrs. Appleby, regent, president of the Seamen's Institute Ladies Guild, extended a special invitation to the members of the chapter to the birthday tea at the institute. The meeting then adjourned.

PRO PATRIA BRANCH ENTERTAINS AT THE AGED MEN'S HOME

An excellent evening's entertainment was provided the inmates of the Old Men's Home by the entertainment committee of the Pro Patria branch of the Canadian Legion on Friday evening.

A lengthy and interesting programme was carried out, consisting of songs by Comrades Haines, Cobbett, Weatherall, Crawford and Brook, violin selections by Comrade Linton Quaile; clarinet solos by Comrade Winterburne; piano selections by Miss Roberta Quaile; banjo selections by Mrs. Schofield; dances by Miss Frances Merryfield and Miss Lily McPhe. Comrade F. Merryfield gave a splendid exhibition of sleight of hand and disappearing tricks. Comrade G. Schofield was the able accompanist. Each item was well received and many encores were called for and given.

At the close refreshments and dainty eats were served, in which members of the Women's Auxiliary assisted.

The inmates of the home cordially thanked the entertainers and the committee for providing them with such an enjoyable evening, and expressed the hope of another visit from them.

Comrade T. Davies, chairman of the committee, presided over the gathering and extended the best wishes of the committee to the inmates.

Sidney Social News

Mr. and Mrs. J. Greenwood Beacon Avenue, and Miss Lilah Pohl, Fifth Street, left on Monday on a six weeks' motor trip to Mexico.

Mr. Boyd, who has been spending the Summer months on the Prairie, arrived here this week to make a short visit to his daughter, Mrs. A. Hankin, Beacon Avenue.

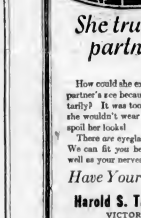
Mr. N. Fraser, of Victoria, is spending a week here and is the guest of Mr. and Mrs. J. Mason, Fifth Street.

Miss Lillian Lidgate returned to her home on Fourth Street on Tuesday after a holiday spent with relatives in Vancouver.

Miss Pauline Clanton returned home last Saturday after spending a few days with relatives in Vancouver.

Mr. Hugh Wylie, of Vancouver, a former resident of Sidney, is spending a few days here, renewing old acquaintances.

Miss Doris Blackburn, Fifth Street, left on Thursday to spend the remainder of the week visiting friends in Vancouver.



She trumped her partner's Ace!

How could she explain that she trumped her partner's ace because her eyes blurred momentarily? It was too humiliating to confess that she wouldn't wear glasses for fear they would spoil her looks!

There are eyeglasses becoming to every face. We can fit your beauty. Your mirror as well as your nerves will endorse the result.

A BLAKFORD SHOE FOR WOMEN

The Short Coat Takes Its Place in the Fall Lineup

THE college girl on the flurried shopping tour which precedes the new term, and who is particular that in that very economical state which follows Summer vacation, will recognize the boon of the ensemble. Two things for one, and each of them complete, appeals to economy—both financial and chronological.

The short jacketed ensemble is particularly effective on the young girl. Her older sister or her cousin or her aunt would look very well in the little suit at the left. In Oxford green cloth with its smart coloring and crisp surface is chosen for the tailored skirt. Kick-pleats supply the fullness and suggest flitting around the hips. The jacket swings loose and straight from the shoulders. The blouse is simple, of the tuck-in variety, and completely unlined. Its pleated collar for trimming Canton crepe fashions the blouse, which lends a feminine dignity to the tailored lines of the suit. The graceful lines of the Canton crepe frock in Independence blue, which is seen second from the left, are suggested for the larger woman. The vertical line is used very skillfully in this model and the horizontal lines at the hip are broken by the circular flare. Transparent velvet is applied at the scallops of the long collar and at the edge of the flare. The same material is used behind vertical tucks of the Canton crepe of the blouse.

The formal version of the short jacket ensemble is shown in the center. Soft flame are combined in a soft material—satin. It is especially effective in black, with the graceful circular skirt, to which the blouse is attached. The jacket falls loosely from the shoulders and the lapel ends straight at a three point button. The blouse, in eggshell, falls gracefully in front to be visible under the jacket. This form of jacket is acceptable for street wear, but it is much more effective for bridge or tea, when it may be worn minus the jacket in a two-piece dress.

Very jaunty is the little sports suit, second from the right. Navy blue sheen fashions skirts and jacket with a blouse of Canton Canton. The skirt drops from the moulded hip yoke to the brisk lines of inverted pleats, a pocket on each side might hold a gay kerchief. The jacket features tailored details in the treatment of collar and lapels. The blouse, of the tuck-in variety, has the only soft note, the short jabot below the collar.

Canton crepe and georgette combine in the unusual ensemble at the extreme right. An all-over embroidery is used on the jacket in a dainty design. The design is repeated in a band at the bottom of the pleated skirt. The yoke of this skirt is very attractive in the applied band that curves upward at the front. The blouse, of white georgette, is a tuck-in, and features a scarf collar finished in three rows of brightness.

Mr. Jacobson's "You Brought Me Flowers" has just recently been translated into the English by Deema Taylor and has been included in the Brown Newman collection of modern Russian songs published by the Oliver Ditson Company.

Some of the artists with whom Mr. Jacobsen has been associated are Paul Althouse, Florence Austral, Fredric Chaliapin, Arthur Middleton, Tocha Seidel and Reginald Werrenrath.

APPEAL TO AID CHILDREN'S HOME

Found Day Is Planned at Children's Aid Society Premises on October 18

The board of directors of the Children's Aid Society has asked the ladies of the board to hold a "Found Day" at the Home on Friday from 3 to 6 p.m. The Home is situated at 1294 Pandora Avenue which is back a block east of the Christian Science Church. At this gathering gifts of fruit, vegetables, groceries, clothing, etc., will be most thankfully received by the ladies. Tea will be served during the afternoon, and an excellent musical programme has been arranged, at which several well-known local artists have promised their support. There are thirty-six children in the Home, twenty-seven boys and nine girls, and these are under the charge of Miss McCloy, who has had years of experience and training in this class of work. The Home is run on nonsectarian lines, and therefore the board appeals to all to help this good work forward and try and bring as much sunshine as possible into the lives of these little ones.

LADIES' MUSICAL TO PRESENT PIANISTS

Mme. Bertha Poncy and Myron Jacobson to Appear in Recital Next Wednesday Evening

Mme Bertha Poncy, who, with Myron Jacobson, will give a two-piano recital on Wednesday next for the Ladies' Musical Club at the Shriners' Hall, View Street, was born in Geneva and graduated from the Conservatory of Geneva as first prize medal winner. She studied piano with one of the great artist pupils of Liszt, Bernhard Stavenhagen.

After Geneva she graduated, with first prize diploma, from the Scholas Cantorum at Paris, where she studied composition with the great French composer, Vincent d'Indy, and piano with Blanche Selva.

All the press notices of the two piano recitals given by Mme Poncy and Mr. Jacobson give them credit for being distinguished musicians and so mutually sympathetic, so completely attuned to one another, that their playing seems the operation of one intelligence.

Both faculty technicians, Mr. Jacobson and his talented wife also share a feeling for style, for the niceties of musical interpretation, and they have perfected an admirable ensemble.

They will play on their Victoria programme two numbers that have been mentioned in every notice of their work.

Myron Jacobson is not only a pianist of rare ability, but his compositions are used by a great many celebrated artists. He was born in Russia, and began his musical career there. He studied under Rimsky-Korsakoff, and after the latter's death with Liadov. For many years he was connected with the Grand Opera Theatre in Petrograd, and also with the Italian Grand Opera Company of that city.

He came to America three years ago, and previous to coming to Seattle he lived in Chicago. He was during these later years that he has been connected with Carl Fischer, Oliver Ditson, Chappie, Johnson, and Zimmerman as publisher for songs which are printed in several languages.

"R. J." of the Vancouver Daily Province, of October 30, 1928, said these artists: "Mme Poncy played Mr. Jacobson distinguished themselves. They gave the Handel 'Concerto in B Flat Major,' with lightful comments, musical subtlety and phrasing, keen rhythmic sparkling, beauty of tone and technique unanimity.

"In the excerpts from Rachmaninoff's 'Second Suite,' Mme Poncy and Mr. Jacobson gave further pleasure. The artists were enthusiastically received."

Prudence Says So

A Recipe for Green Tomatoes—A Way of Pickling Onions —Suggestions for Tea and a Dessert

Do not pass by green tomatoes, which are now plentiful; they have the power to add tasty dishes to your menu. Green tomato nutlets are delicious. Cut large tomatoes into slices and drop them into boiling water; to which soda has been added in proportion of one teaspoon to a quart of water. Let stand for five minutes and sprinkle salt, pepper and sugar. Roll each slice in breadcrumbs, then in egg and a little milk, again in the breadcrumbs and saute in bacon fat until brown. Serve round a mound of rice and garnish with bacon strips and parsley. A green tomato cream soup is also very good and is made exactly as ordinary tomato soup.

Pickled White Onions

Take any quantity of small white onions and cover with hot water. Let stand until cool and peel. Cover with brine made strong enough to float an egg and let stand for twenty-four hours. Pour off the brine and let drain for another twenty-four hours. Place in a jar, adding a few pieces of rock ginger and small pepper corns, cover with vinegar and set aside for two weeks, when they will be ready for use.

Scotch Pancies

Mix together two cups rolled oats one cup cocoanut, one cup chopped peanuts three eggs well beaten, one and a half cups sugar and one teaspoon of vanilla. Drop in small flat patties on a greased baking tin and bake for about ten minutes.

Fudge Cake

Cream together half a cup of butter and one cup of sugar. Add one well beaten egg and two squares of melted chocolate. Sift together one teaspoon of salt, three-quarters of a teaspoon soda, two cups pastry flour and one teaspoon baking powder. Add alternately with the mixture and lastly add one cup of sour milk and one teaspoon of vanilla.

Mushroom Cutlets

One pound of fresh mushrooms, canned 2lbs, two cups of bread, four ounces of grated breadcrumbs, season with salt, pepper, a little bit of nutmeg, stir the whole smooth, mould into small flat cutlets, dip in egg and breadcrumbs and fry.

Golden Pudding

One tablespoon of flour, half a cup of sugar, three eggs, one pint of milk and a little vanilla. Heat the milk in a doubleboiler, add the sugar, flour and yolks of the eggs (which have been beaten) and cook until thick. Flavor to taste. Slice oranges and sprinkle them with sugar and pour the mixture over when it is not too hot. Whip the whites of the eggs, stir into them a little sugar and pour on top of the custard. Brown in a quick oven.

Use Assistance Of Institutes, To Collect Data

In an effort to bring all the factors possible into the work of collecting material for the archives of the province Mr. John Hosie, Provincial Librarian, is inviting the Women's Institutes to assist in this work.

Mr. Hosie is arranging with women's institutes all over the province to gather complete data on the various settled districts. Each institute will write the history of its own district, and the assembled information, will be of great value to the provincial archives and to future historians Mr. Hosie said.

To assist the institutes in this work Mr. Hosie has prepared a memorandum for them, showing what information should be included in the local histories. They will show first the date and circumstances of the district's original discovery, when it was first settled and by whom, the communications, the mining, agriculture and lumbering and similar facts. In this way the archives will gain much information which could not be obtained otherwise.

"Gavel of Friendship"

An interesting ceremony will take place in the hall of Victoria Lodge No. 1, I.O.O.F., on Monday evening when the members of Dominion Lodge No. 4 will attend in a body and present the traveling "Gavel of Friendship." There will be a programme and refreshments and all Oddfellows will be made welcome.

Vancouver Island

FORESTERS OF NANAIMO ARE GIVEN DATA

Health Insurance Act of Old Country Explained by Bro. W. F. Fullerton, of Victoria

TO FAVOR SIMILAR ACT IN PROVINCE

NANAIMO, Oct. 12.—At an enthusiastic gathering of Foresters representative of all the courts in Nanaimo and district, held on Friday evening, Bro. W. F. Fullerton, P.D.C.R., gave an instructive address on state health insurance from the British act, and adaptable to the requirements of the province.

The speaker went into full detail as to the history of health insurance as in vogue in Belgium and Germany, carried out on military lines, then finally discussed the greatest, democratic and most beneficeful health insurance act in existence, brought into effect by the Lloyd George Government in 1919. In which the A.O.F. experience and tables were adopted. After the lengthy address a general discussion took place in which leading citizens took part, and finally a resolution was adopted that the Foresters of Nanaimo would present their case before the commission in favor of an act similar to that of Great Britain.

At the close of the meeting a request was made that all fraternal societies of Nanaimo should be given the opportunity of hearing all the facts concerning health insurance as presented by the speaker, who promised at any time to address such a meeting of societies other than the A.O.F.

PIONEER NIGHT PLANS ADVANCE

Metchosin Women's Institute Will Honor Early Settlers of District

METCHOSIN, Oct. 12.—All arrangements for Pioneer Night at Metchosin Hall, Friday afternoon, October 25, have been completed by Metchosin Women's Institute of the province. The occasion is also the twenty-first anniversary of the organization.

His Honor R. R. Bruce, Lieutenant-Governor, will open the exercises, and Mr. C. H. Dickie M.P., also a pioneer, will address the pioneers. Mrs. Wilfrid Ord has kindly consented to give reading, and the musical programme will be furnished by Miss Charlesola, of Saanich, and the Arion Club Quartette.

Following the refreshment hour old-time dances with a real "fiddler" to furnish the music, and Scottish dances piped by Major Wishart will close the festivities. Metchosin will be out in force to welcome all visitors.

JUNIOR INSTITUTE CLUB TO WELCOME SENIOR INSTITUTE

KEATTING, Oct. 12.—The South Saanich Junior Institute Club held its monthly meeting at the home of the Misses Margaret and Doris Mitchell on Tuesday evening. Miss Nellie Styan presided, and the minutes and correspondence were read by the secretary, Miss Doris Mitchell. The financial report of the dance held recently by the girls of the club, which proved most gratifying. The main business of the evening was making arrangements for the entertainment of the South Saanich Senior Institute in the near future. Committees being appointed to take charge. The next meeting will be held at the home of Mrs. W. Bate, Central Saanich Road.

Mr. and Mrs. A. Wright and family, of Beach Road, have left the district to take up their residence at Westholme.

LADIES' AID OF SIDNEY UNITED CHURCH MEETS

SIDNEY, Oct. 12.—The monthly meeting of the Ladies' Aid of the Sidney United Church was held at the home of Mrs. Lee, Third Street, on Wednesday afternoon. The president, Mrs. H. G. Homewood, occupied the chair, and opened the meeting at which there was a good attendance of members. The secretary read the minutes of the previous meeting, at which were adopted, and the financial statement was presented. Business matters, correspondence were attended to, and the report was given regarding the serving of the refreshments at the Saanichton Fair.

Ways and means of raising further funds were discussed, and after several suggestions had received attention, it was decided to hold an Armistice tea in the Wesley Hall on Monday afternoon, November 11. Mrs. J. Wilkinson was appointed convener of the afternoon tea, with an able committee to assist. It was decided to have a touch-and-take stall, with Mrs. McNeil in charge. The home cooking and candy stall was put in charge of Mrs. A. Critchley and Mrs. Lees. A feature of the afternoon will be the anniversary cake, a fruit cake made as a birthday cake representative of the eleven years of peace, which will be sold in dainty containers. During the tea hour a musical programme will be presented, and fortunes will be told from the tea leaves.

The success of former affairs given under their auspices assures the aid that the tea will be well patronized. The meeting adjourned to meet next month, November 13, at the home of Mrs. S. Brethour.

SWEDISH LOGGER KILLED IN CAMP

COQUITLAM, Oct. 12.—Gustav Tisl, twenty-three, Swedish logger at Camp Nine of the Abernethy Lougheed Lumber Company, Ltd., was instantly killed on Friday afternoon when hit on the head by a log that slipped from a log which was being hauled in by the docker system. A verdict of accidental death was returned by a coroner's jury at Alco on Friday night.

Mrs. Murray Buried

NANAIMO, Oct. 13.—The funeral of the late Jane Ann Murray was held yesterday. Many friends and relatives attended the funeral. Deceased for many years was a resident of this city and was widely known. The funeral took place at 3.30 o'clock from the D. J. Jenkins Chapel, where Mrs. Beskie conducted a most impressive ceremony, in which was included two favorite hymns. Miss Annie Dunsmore attending at the organ. The pallbearers were laid at rest in the family plot, Nanaimo Cemetery, and the following friends, including two sons, acted as pallbearers: Archie and Ernest Murray, R. Dunsmore, R. Burns, J. Muir and C. Moore.

Old Lady (meeting sailor on country road)—Sir, do ye know my son Jack in the Navy?

Sailor—Which ship is he serving in?

Old Lady—What! Be there two?

Believes Colonel McAlpine Is Safe

CONFIDENCE that Colonel McAlpine and his party are safe, though perhaps "frozen in" on one of the islands in Northern Hudson Bay, was expressed by Mrs. R. P. Baker, of Fort Colborne, wife of Colonel Robert Baker, who is a member of the missing party. "It seems impossible that both machines could crash at once, and if one had crashed the other would surely have come out for help," Mrs. Baker said. The photo shows, left, Mrs. Robert P. Baker, and, right, Colonel Baker with his two sons, Rob, left, and Burt, right.

Regimental Orders

CANADIAN SCOTTISH

Battalion Orders, No. 23, by Lieut.-Col. D. R. Martin, D.S.O., Commanding 1st Battalion (18th C.E.F.) the Canadian Scottish Regiment, Victoria, B.C., October 14, 1929.

1. Recruiting: Recruits possessing the necessary qualifications will be enrolled on the strength of the battalion on Monday and Thursday nights, preparatory to the yearly training. Enlistment gives opportunities to train in drill, rifle shooting, Lewis gun, Vickers gun, physical training, bayonet fight, signalling, gymnastic work and various athletics. The battalion has a full complement of military equipment, outdoor and indoor miniature rifle ranges, fully equipped gymnasium and swimming bath, and club quarters for the use of its members.

Vickers Gun Section, Signal Section, Company and Platoon Commanders are requested to complete their training by October 31.

2. Training: The period of training for the battalion will commence on Monday, October 28, when a balloon smoker and concert will be held at the Drill Hall. The honorary colonel, His Honor the Lieutenant-Governor of British Columbia, has kindly consented to be present and will present certificates and bronze prizes with during the past year.

Vickers Gun and Signalling Schools. Names of those who wish to take these courses, particulars of which will be published in due course, should hand in their names to the Orderly Room as soon as possible.

62. Attestations: The undermentioned men, having been duly attested, are taken on the strength of the battalion and posted to companies, the dates shown opposite their names:

No. 1005 Pte. C. A. McLellan, No. 1 Company, 4-7-29.

No. 1006 Pte. D. M. Hogarth, No. 3 Company, 10-7-29.

No. 1007 Pte. R. Hunt, No. 3 Company, 15-8-29.

No. 1008 Pte. F. M. Nixon, No. 3 Company, 7-10-29.

No. 1009 Pte. R. Caldwell, No. 4 Company, 7-10-29.

No. 1010 Pte. W. Caldwell, No. 4 Company, 7-10-29.

63. Appointments and Promotions, to be Acting Sergeants:

No. 837 Cpl. J. A. McCallum, No. 2 Company.

No. 839 L.-Cpl. J. L. Hensley, No. 3 Company.

84. Struck off training strength:

No. 639 A.-Sgt. A. M. Robertson, H.Q. Company.

No. 684 Sgt. E. S. Chalmers, H.Q. Company.

No. 626 Sgt. R. J. Hill, No. 4 Company.

No. 591 L.-Cpl. H. Pixton, No. 4 Company.

No. 844 L.-Cpl. A. M. Miller, No. 4 Company.

No. 653 Pte. A. Rogerson, No. 4 Company.

No. 837 Pte. D. S. Braidwood, No. 4 Company.

No. 852 Pte. C. C. Pirmatone, No. 4 Company.

No. 853 Pte. I. K. Kerr, No. 4 Company.

85. Transfers:

Lieut. B. H. Lamont from No. 3 Company to No. 3 Company.

86. The following information from District Orders is published for the information of all concerned:

Proficiency in riding:

Major P. B. M. Wallis M.O., passed.

Capt. H. McMillevrin, pass.

Capt. S. Robertson, pass.

Capt. V. O. P. Barton, pass.

Capt. C. D. O'Halloran, pass.

Results of examinations held at Camp Hill Barracks, Esquimalt, B.C., on May 22, 23 and 25, 1929:

Capt. H. Thurburn: D (1), Part I, pass; D (1), Part II, pass.

W. A. R. HADLEY, Major,
Commanding No. 1 Company.

Burgess Bedtime Stories

Thalessa Goes Hunting

By THORNTON W. BURGESS

In criticizing pray be slow,
There's always much you do not know.

—Old Mother Nature

"If you please, what is your name?" asked Peter in his most polite manner of the strange insect on the vine tree.

"You will remember he had mistaken her at first for a snake.

"If you really must know, my name is Thalessa," replied the stranger.

"That's a pretty name," said Peter. "Shall I call you Tess or is your whole name?"

"No," was the prompt reply. "My whole name is Thalessa Lunator."

"Shall I call you Lunator?" asked Peter.

"Do," said Thalessa.

"Lunator, I want to seem too curious," continued Peter, "but did I understand you to say that you are a member of the fly family?"

"One branch of it," replied Thalessa. "I belong to the branch known as Ichneumon flies."

"Thanks," replied Peter. "I guess that's a little too much for my tongue. I'll just call you Thalessa and leave it at that. What are you walking around on the trunk of this tree as for? You appear to be very uneasy."

"I am hunting," replied Thalessa. "Hunting for what?" asked Peter.

"For a place to lay an egg," replied Thalessa.

"Oh!" said Peter. "That's it. I should think that place was as good as another on that tree-trunk."

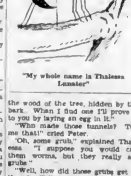
"Why do you think the egg on the tree-trunk," said Thalessa. "I must first find the tunnel."

"The tunnel, the tunnel!" repeated Peter. Thalessa's words puzzled. "What tunnel?"

"The tunnel I am to lay my egg in, of course," replied Thalessa. "In fact, I suppose there's more than one I'm merely got to hunt around a little while and I'll find it."

"Really!" said Peter. "I don't know, but anyone with half an eye can see that there's no tunnel in this tree."

"Yes, I guess you haven't even got half an eye," said Thalessa in a tone that made Peter feel as if he had made a mistake.



"My whole name is Thalessa Lunator"

The wood of the tree, hidden by the bark, is filled with holes. I'm going to lay my egg in it."

"Why make those holes?" asked Peter. "Tell me that!" cried Peter.

"Oh, some grub," explained Thalessa. "I suppose you would call them worms, but they look like grubs."

"Well, how did these grubs get in there? Tell me that!" demanded Peter.

"From eggs," replied Thalessa. "There is an insect called a Horntail, which you may recognize by the wasp. Just as you thought I was. It bores a hole way into the wood, and in there the eggs are laid in a place where such grubs grow. The grub grows a tunnel which becomes home for the grub when it hatches. If nothing happens to it, it makes a tunnel there and at last comes out a Horntail just like its mother. This time he's way out from the end of the burrow through the bark. A lot of these tunnels in a tree are very bad for it. They weaken it. If I can once find one of these tunnels, that grub never will come out. Because me now, I must go on hunting," and immediately began hunting about over the bark of the tree.

ECONOMY—A dominant world topic, the intricacies of which drive millions into daily ferment.

SAFETY—Thought of which strikes poignantly every time we shy at a banana peel.

SPEED—To get anywhere. To do, say, think, see, hear or learn anything today without speed is about as simple as eating jelly with a pin.

COMFORT—What drives us out to the woodshed, through the cold, grey, biting sleet at dawn, except the hope that, if perchance we do survive the return trip to the kitchen, the fire will eventually produce comfort.

RELIABILITY—Without which nothing is assured.

MR. MORGAN GIVES HIS OWN VERSION

Intended to Infer the Peace River District Was Unsuitable for Certain Types of Settlers

MONTREAL, Oct. 12.—"I am not making the usual plaint about having been misunderstood and misquoted," said the Hon. Ivan Morgan, son of an English Earl and social service worker, when interviewed on the Canadian Pacific liner Duchess of Bedford, prior to his departure for home. "But I would like to point out that your Canadian reporters' sense of humor resulted in a good story that was based upon only part of my criticism of the Peace River country.

My statement that the Peace River country is not a fit place for a settlement of lowmnnrd and small holders from the Old Country, has brought down criticism upon me from Dr. Sperro and Sir John Martin Harvey, both of whom spoke, and very rightly so, in laudatory terms of Canada, but neither of them had any more to go on than the naturally adverse reports of which I said.

LACK OF "PUBS"

"And much was made of my remarks about the lack of 'Pubs', in fact, I am afraid this has been adopted by one side or the other in local politics in some parts. I am not criticizing what I said, and the only criticism, if you like to call it that, of Canada that I shall make when I get home, is that the Peace River district does not lend itself to settlement by the type of English townsman with whom my work in England brings me into contact. The man who is used to eight hours work a day, who likes to go to the movies or the local 'pub' after his work is done, is most emphatically will not make good there. But there is plenty of room for him in other more settled parts of Canada.

WILLING WORKERS

"The Peace River district is more decidedly the place for a man who is willing to take off his coat and work. It is a place for men who have hope and 'guts.' For instance there are sixty boys I am interested in who are aiming to come to Canada. Of that sixty there are fifteen who could make good in the Peace River country.

The Hon. Ivan Morgan, who is a tall young man, well tailored and marks about the back of 'Pubs' in fact, I am afraid this has been adopted by one side or the other in local politics in some parts. I am not criticizing what I said, and the only criticism, if you like to call it that, of Canada that I shall make when I get home, is that the Peace River district does not lend itself to settlement by the type of English townsman with whom my work in England brings me into contact. The man who is used to eight hours work a day, who likes to go to the movies or the local 'pub' after his work is done, is most emphatically will not make good there. But there is plenty of room for him in other more settled parts of Canada.

RECORD FOR BAIL

WINNIPEG, Oct. 12.—Magistrate R. B. Graham created a new record for the Winnipeg police court yesterday when he set bail for Charles Gaisky, charged with a serious offence against an eighteen-year-old girl, at $300,000. The bail demanded is higher than any amount set by a magistrate of the city police court for any case.

BEER is a food

SIR W. ARBUTHNOT LANE, world renowned surgeon, said: "Beer should be the drink of the Nation," and at a recent conference at Liverpool he further stated fact that those well-known and established brands of beer, according to analyses by expert chemists, are beyond doubt proven to be of excellent standard and quality.

Reminiscences of the Bute Inlet Massacre

ADVENTUROUS LIFE OF MORRIS MOSS

The aborigines of British Columbia were not particularly hostile toward the paleface in the early days of the white invasion as they were toward the early settlements on the Atlantic coast. Occasional attacks were made on isolated pack trains and massacres took place. Ambushes were not frequent but sometimes they occurred. Notable massacres occurred in Chilcotin (1864), at Bute Inlet (1865) and on the West Coast at Nootka (1803).

Among the pioneers who had thrilling experiences with affairs of this sort was Mr. Morris Moss. Probably no single individual in the early history of the Province came into closer contact with adventurous experiences of this kind than did he.

Mr. Moss was born in London and came to British Columbia across Panama Isthmus, arriving in 1862. He went first to Cariboo, being attracted by the gold excitement rife at that time. He took a consignment of merchandise to Quesnel Mouth, but did not succeed in marketing his goods to satisfy profit. Returning to Victoria in 1864 he loaded a shipment of merchandise of various sorts on the Hudson's Bay Company's schooner Labouchere and set out for Bella Coola. Three smallpox had killed off nine-tenths of the Indians, and again he failed of success in his venture.

TRIES AGAIN

He returned to Victoria, leaving his merchandise at Bella Coola in charge of a clerk. He had a chat with Governor Sir James Douglas and was appointed Government Agent for the Northwest and was gazetted a Justice of the Peace, although he never was sworn in the latter office. He then chartered the schooner Newman and set out on a tour of the Northwest, having been induced by a Mr. Stewart to land supplies at a camp near Kokuma on the West Coast.

He landed the provisions and then sailed for Quatsenna (Quatsino). The people in Stewart's camp were greatly excited over the accidental shooting of Mr. Munro, which had occurred a few days before his arrival. This was nearing the end of November, 1864.

The crew of the schooner consisted of Captain Walters, Ben Spain, the mate, and three Indians. Rough weather had set in and the Indians, finding that he was determined to go on, deserted the boat. They were detained eight days but on the eighth started out, the gale still blowing.

He had not proceeded far when the mainsail and jib blew off and the water casks were thrust overboard. A thick fog set in. They drifted about at the mercy of the waves for three days, fog continuing during the whole time. On December 4 they struck a rock. Waves dashed over the vessel, and they had to cling to the rigging. They could see nothing but breakers ahead and the captain sang out, "Every man for himself, I'm going to breast the breakers."

ALL REACH SHORE

All hands jumped off, and by chance all got ashore. They climbed some rocks, found a level place, and awaited daylight. It snowed that night, the first snow of that season. When daylight came they found they were on a small island which, when the tide was out, connected with another island by a narrow neck. This turned out to be the Island of Lochaboo to the westward of Safety Cove. They were without matches or water, but during the day managed to drag in two or three sacks of flour which had floated off the schooner. The following day, with a lucky low tide, they managed to salvage several other articles of food stuffs which had drifted to the beach. Among other things was a keg of gunpowder into which the water had penetrated only about a quarter of an inch. They found also a flintlock gun. With these they managed to start a fire by shooting into dry moss and blowing the sparks into flame. They kept this fire burning continuously for three months, during which time they were compelled to remain on the island.

BUILD LOG HUT

They occupied the next few days in collecting what they could from the wreck, the gale having subsided. They salvaged thirty or forty sacks of flour, some canned meats, dry-goods and a quantity of liquor. After salvaging all they could from the wreck, they turned to the construction of some sort of habitation. They rolled a few logs upon one another for walls and used the forestail of the boat for a roof. They remained from December until February, and, on exploring the island, found that all the Indian inhabitants had died of smallpox, skeletons being found everywhere. They discovered also several great clam beds, which added greatly to their stores and comfort.

They erected signal poles on several parts of the island and one morning, while eating their frugal breakfast, they were delighted to hear the shouts of some Indians. They saw a canoe with three Indians who had been attracted by the signals. They were at first loth to come ashore, but Mr. Moss recognized one of them as Yellow Charlie, whom he knew. He came ashore and agreed to take them to camp, forty miles distant.

When they arrived at Bella Bella a small sloop owned by a Mr. Sebastapool came in. Walters and Spain accepted his offer of conveyance to Fort Simpson, but Mr. Moss wanted to go back to Bella Coola. The Indians promised to take him over in a canoe, but he soon found himself a prisoner among the Bella Bella tribes.

The island on which the Indians lived was merely a large rock on which there was neither wood nor water. The reason for their living there was their fear of the Haida Indians. As there were many hundred dogs roaming round the island it was impossible for them to be surprised by night.

Mr. Moss remained a prisoner for over a month, parting, day by day, with some article, even down to clothing, in exchange for food and water.

IS RESCUED

One day Mr. Moss discovered some Kemoquiot Indians who were about to proceed to Bella Coola and by means of promises induced them to take a letter to a white man, there informing him of his position. In a week from that date an answer came in the form of forty canoes filled with friendly Bella Coola Indians and seven or eight white men, who came with the intention of fighting, should there be need. The Bella Bellas were scared, and begged to make friends with the invaders. Moss then returned to Bella Coola where he found the clerk he had left in charge sick in bed, and unable to account for about half the stock left in his charge. This loss, added to that of the schooner, totaled about $2,000 and almost made Moss give up frontier life. The schooner Amelia changing in, he returned to Victoria to the great surprise of his friends, who had felt convinced he was lost.

Shortly after his return to Victoria news came of the terrible massacre at Bute Inlet. An indignation meeting was held in the theatre, and it was resolved to send an expedition to avenge the massacre of the whites. In an instant one hundred men had volunteered, among whom was Moss. A letter was sent to Governor Seymour, at New Westminster, telling him of what had occurred and offering the services of the volunteers.

The reply thanked them for their offer but stated that the Mainland would supply its own volunteers. A private letter to Moss, however, requested him to assist and advise. He attended several meetings of the Legislative Council, at which it finally was decided to send fifty men from New Westminster and fifty more from Cariboo. Mr. Moss was attached to the Westminster corps, under Judge Brew, and proceeded with them to Bella Coola.

PUNITIVE EXPEDITION

When about fifty miles from this destination they were met by a canoe coming down. Among its occupants was Barney Johnson, who had been left by Mr. Moss in charge of his stores, with several other whites. They came aboard and informed the volunteers that a short time previously they had started out with three pack trains for Cariboo. On the way they were met by Indians who informed them of the Bute Inlet massacre and advised them to turn back as they should share the same fate. Alexander Macdonald, who was packing his own outfit and whose partner was already some eighty miles ahead, refused to turn back. During the night the number of Indians increased greatly, and next day they intimated clearly they meant mischief.

The whites built stockades with their pack saddles and cargoes and dug rifle pits. They kept the Indians at bay for two days, but were determined to abandon their cargoes and strike out for Bella Coola with horses only. They made an early start next morning but soon found their retreat cut off by Indians who commenced firing at them from ambuscades. Macdonald, Cliff Higgins and Pete McDougall were shot dead, but the others managed to escape, all carrying lead in their bodies.

Not knowing that the whites at Victoria already were aware of the Bute Inlet massacre they started out to inform them of their own outrage. They met the warship and turned back with it to Bella Coola where Mr. Moss took charge of the landing of men, horses and provisions and the subsequent freighting of these by canoes and Indians up the river.

Upon arriving at the head of navigation a council was held, and it was found that the commissariat was insufficient for a sustained campaign. Mr. Moss volunteered to return to the warships and bring up a fresh supply. After securing provisions he enlisted four white men and returned with them and provisions to the head of navigation.

When within a few miles of a place then inhabited by the wild men left the canoes and made for a trail that led to a cabin erected by Moss a year before. Here, to their surprise, they found an interior Indian whom Johnson and McCraney recognized as one of those who had done the shooting at Bulldogs. The Indian made for his gun in the corner of the house but was disarmed immediately, his gun being found loaded with double charges of buck shot. Next day Moss brought the Indian down to the warships and delivered him up a prisoner.

Moss then returned to Stewey and arrived two days after McLean had killed. Negotiations were going on for the surrender of the murderers, but it was found that two of them were off in the mountains, and Moss, with Pre nom, was sent to try and effect their capture. They got on the trail of the fugitives and would have brought them in had not their provisions given out.

On their return to Stewey Moss had a letter from Judge Brew stating that the main body, having accomplished their object, he will, the capture of the chiefs of the murderers, they would return in a week. The captured murderers turned out to be the same who had committed the Bute Inlet massacre. He ordered Moss to proceed to Bella Bella and arrest an Indian there who was wanted as a witness to a murder which had taken place two years before. This was accomplished easily. The expedition then returned and the men were paid off.

MURDERERS CAPTURED

The following Spring Mr. Moss went North again on a prospecting tour, and while at Bella Coola succeeded in capturing the two Indian murderers who had escaped him in the mountains the year before. These were taken to New Westminster, where one was hanged and the other pardoned.

Mr. Moss then was appointed Indian Agent and Deputy Collector of Customs for the whole Northwest Coast, which position he held for three years. He quit Government employ in 1887 and built a fur store and residence at Bella, and while there discovered what was called the Hebrew Mine. He refused $25,000 for his interest, and never made a penny from the claims.

Later Mr. Moss went to Omineca during the excitement there, and afterward to Alaska, but in none of these did he signally prosper in the life of adventure. The later party broke up at Fort Wrangell and Mr. Moss returned to Victoria where he built up a large fur business in the city. He owned a couple of sealing boats and found, at that period of his life, that it is possible, in spite of misadventure, to get off on the right side of fortune.

In spite of his prosperity the lure of the mines always held an attraction for him, so that, in June 1897, he went to Denver, Colo., to participate in the fortunes then lighting gold seekers in that state. He died there in 1894. One son remains alive to carry on the traditions of his family.

The world admires promising men but does business with those who pay cash.

The Cleaner for Every Room in Your Home

The ROYAL PURIFIER

The Royal PURIFIER is years ahead of the times. It is a cleaner that not only brings a new thoroughness to the cleaning of rugs, upholstered furniture, mattresses, drapes and everything—not only polishes bare floors, tiles, linoleum—but actually STERILIZES in a pleasant, immaculate way.

The Royal PURIFIER is more than an electric cleaner. Healthfulness is assured by this revolutionary cleaner that actually eradicates disease germs that lurk in every crack and corner of the most carefully cared-for home.

$3.50 Down

To introduce this advanced home cleaner we offer in the first buyers annually low down and a pleasing introductory price. The PURIFIER, more than an electric cleaner, costs no more than an electric cleaner. $3.50 down—and a small addition to your next few monthly light bills gives you the finer, more powerful, more USEFUL electric cleaner.

May we show you the Royal PURIFIER in your own home? There is no obligation and you will not be urged to buy. But we do want you to see this new and better Royal.

If he's your partner he's worth insuring

FORGET for a moment talk about financial embarrassment if your partner dies, or the effect upon the business, and consider this: If he's your partner, he's worth insuring; if you're his partner, you are worth insuring.

If your business is worth anything, it can stand the premiums. No matter how prosperous you may be jointly and severally, a nice block of money for your own or your partner's dependents, should the occasion arise, is always welcome. If you buy Limited Term Endowment insurance and live out the term, it will be nice to have the money to divide between you. And don't forget that, should an emergency arise, you can raise money on the policy.

We have a representative in this district who specializes on business and partnership insurance. He will gladly call and discuss the matter with you without being importunate if nothing comes of it.

Phone him to call or write for our booklet entitled "For the Last Time" which deals with certain phases of Business Insurance. Address:

A Message to Every Well-Dressed Woman

We Hold the Secret . . .

WE lay at your disposal the triumph that years of experiment have brought us. New clothes for old is the offer we make, for our methods will perform miracles in bringing back life and lustre to material and garment. Heavy Winter coat, hat or gloves, frock or lingerie, no article is too dainty, no fabric too coarse, to be subjected to our scientific cleaning process. Call us now and our salesman will arrive at your door, ready to receive the garment or article you wish to entrust to us. Every moment it is in our plant it is protected against loss by fire or accident, and it will be returned promptly on the promised hour.

WE keep the spots off the world

Backache

Can Be Stopped often in a few hours. If you are losing pep, health and strength from Getting Up Nights, Backache, Bladder Weakness, Burning, Leg or Groin Pains or Rheumatic Aches, why not try the Cystex 48-Hour Test? Get Cystex (pronounced Sis-tex) today at any drug store, for only 60c. Money back if you don't soon find pains gone, sleep fine, feel younger, stronger and full of pep. (Advt.)

Pile Sufferers

You can only get quick, safe and lasting relief by removing the cause—congestion of blood in the lower bowel. Nothing but an internal remedy can do this. Hemo-Rectal Suppositories are a local, Lanchester's Non-Acid, a laxative tablet, is guaranteed to quickly and safely banish any form of Pile misery or money back. MacPhetan Drug Co., Vancouver Drug Co., and druggists everywhere sell it with the guarantee. (Advt.)

Some New Facts About Sun Learned at May Eclipse by Astronomers at Sumatra

Though months have elapsed since astronomers made their observations of the total eclipse of the sun had during January last, and scientists have been working on the data of the Einstein theory, they are not yet able to give their conclusions on the theory. But a preliminary report of the results has been received author of the eclipse by John A. Miller, who headed the Swarthmore College expedition to Sumatra, discloses in the following article some of his findings

By DR. JOHN A. MILLER

Director of Sproul Observatory, Swarthmore College, Swarthmore, Pa., who headed the expedition to Sumatra to observe the total eclipse of the sun last May.

(Copyright, 1929, by the North American Newspaper Alliance)

An important part of our programme during the forty minutes and fifty-eight seconds the sun was in total eclipse at Takengon, Sumatra, May 9, was to obtain photographs for testing the Einstein theory.

To make this test two operations were required. First we had to expose plates during the eclipse to record photographically the stars in the vicinity of the sun, and second, we had to photograph this same field of stars at a time when, due to the motion of the earth, the sun does not appear in this field but occupies some other place in the sky. This second plate we call a comparison plate.

The centre of the sun on eclipse day covered a certain point in this field of stars, and of course it is the same point on the comparison plate. Let us call this point the centre. The Einstein theory predicts that each star in this field of stars will be farther from the centre on the plate taken eclipse day than it is on the comparison plate.

We are gratified that it was clear enough and the air steady enough at eclipse time to photograph the stars. The comparison plate was made in Swarthmore in December, 1928, five months before the eclipse. It will be some months before the work of measuring the plates and reducing the measures will have been completed.

On our best plates we have photographed stars as faint as 8.3 magnitude—far too small to be seen by the unaided eye—in the field around the sun. They show that the air through which they were photographed was not entirely steady but the images are good and can be measured with a fair degree of accuracy. The number of stars on the plates is sufficiently large to give a fairly good test of this much-discussed Einstein theory but some months must elapse before we can say whether these plates show if the theory is true or not true.

AN 80,000-MILE PROMINENCE

A striking feature shown in one of our photographs made with our sixty-three-foot camera is a great prominence on the eastern edge of the sun. This prominence appeared very bright, even to the unaided eye. The prominence is 80,000 miles high, more than ten times the diameter of the earth. It has a base 140,000 miles long. The prominence was changing its shape very rapidly—so rapidly that one could see how much it had changed by comparing (with the unaided eye) plates made four minutes apart.

This statement carries greater significance if one recalls that the scale of our photograph is a little more than 100,000 miles to the inch. That is, if a certain detail of the picture had changed by one-tenth of an inch, the corresponding detail in the prominence had moved 10,000 miles during the four minutes that had elapsed between exposures. Prominences in general are, as has been shown with the spectroscope, composed of hydrogen, helium and calcium gases. We did not make a spectrum of this one. They are studied more effectively in regular observatories.

The plate made with the sixty-three-foot camera show that in the main the corona was comparatively simple, but there are some very complex regions too. Our photographs show well the general shape and structure of the corona. There is an abundance of fine, normally-shaped streamers. The presence of five long straight streamers is the most striking feature of this corona. The longest one can be traced on the photograph to a distance of 3,000,000 miles above the centre of the sun. This is an unusually long streamer.

It will be recalled that we barely missed the clouds on eclipse day. Had the eclipse occurred ten minutes earlier or a half hour later we should have accomplished nothing. As a matter of fact the plates show that it was clearer about mid-totality than near the beginning or near the end of totality.

PLATES WERE DEVELOPED

There seems to be a general impression prevalent that eclipse observers take their plates to their home observatories for development. Eclipse observers as a rule develop their plates at the eclipse camp the night following the eclipse. It would be very unwise to do otherwise, particularly in the tropics. The high temperatures and the greater actinic power of the atmospheric causes photographic plates to deteriorate very rapidly. All the plates that we took with us were sealed by the manufacturers in airtight tin boxes, which were not opened until the day the plates were put into the plate-holders. The eclipse plates were taken from their tin boxes the night before the eclipse.

We developed our plates in a dark room we had built in our camp before the eclipse. It lacked many of the modern conveniences found in the dark room of a laboratory. It had chemical cases, chemicals, weighing scales, thermometers, glass cutters, etc. We had taken with us developer trays large enough to receive our largest plates, eighteen by twenty-two inches. For washing our large plates we had built in the dark room a concrete vat in which were fastened racks which held the plates while washing.

Running water was driven through the vat in such a way that the circulation was very satisfactory. We had no ice. We could have had ice by transporting it by truck for 125 miles. It was extremely difficult to keep the developer at the proper temperature. We lighted our dark room with electric lanterns run by storage cells we had taken with us from the United States. We dried our plates in a canvas shelter so arranged as to induce currents of air to blow through it. This took the place of an electric fan. There was no electricity in Takengon.

Can you imagine the intensity of the moment of developing an eclipse plate? There flies through one's mind all the things one should have done as well as those things that one should not have done for weeks before the time and at the critical moment. One thinks of the vagaries of the weather man. The interest is akin to that with which the surgeon watches his patient come from under the anaesthetic, or a chemist watches his test tube. But the surgeon and the eclipse observer have only one trial. Just these conditions for trying it again will never be repeated. The blackened image begins to appear. It is the thrill of a lifetime.

We developed our plates as I have said. One could tell something of the quality of them by examining them with a hand magnifying glass. We knew before leaving camp that they held some of the information we sought.

Colonel Pope Hennessy, military attaché of the British Embassy, was dining in a fashionable Washington restaurant. Pale birds were served. The tiny and delicious morsels lay on slices of toast.

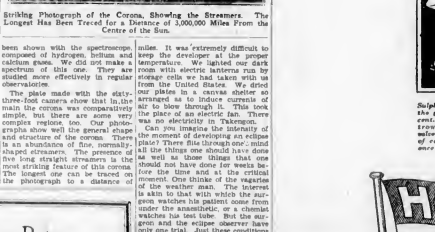
"Poor little things!" said Colonel Pope Hennessy's host. "Seems a shame to kill 'em, don't it? How do you suppose ever murder enough rice birds to make a portion?"

Colonel Pope Hennessy turned over an individual rice bird with his fork.

"I don't know," he said, "unless they use insect powder."

"I think I hear an alarm of fire!" said a bored husband, watching a very dull play. "I must go and see where it is." His wife, whose hearing was less acute, made way for him in silence. "It wasn't fire after all," he said on his return. "Near water, either!" said his wife caustically.

Prominence on the Surface of the Sun, 80,000 Miles High and 140,000 Miles Long, Photographed by Swarthmore College Expedition at Total Eclipse in Sumatra. These Prominences Are Composed of Hydrogen, Helium and Calcium Gases.



Striking Photograph of the Corona, Showing the Streamers. The Longest Has Been Traced for a Distance of 3,000,000 Miles From the Centre of the Sun.

Health and Diet Advice

By DR. FRANK McCOY

THE VALUE OF MEAT

New patients who come to me so often say, "I don't know why I am sick—I almost never eat any meat." Thus they show that they think the only important dietetic problem is meat. When they say they do not use meat.

Meat is a most important and necessary item of food when used correctly. While meat has been written on this subject from the standpoint of the vegetarian, my firm conviction is that we need to study the uses of starches, sugars, and other foods, equally as well as to understand about the proper and improper uses of meats and other proteins.

It may be well to point out certain theories to account for the fact that meat has been given such a "bad reputation."

About one-fourth of a pound each day is enough to satisfy the body's requirements. Those doing hard manual labor may be able to use as much as a half pound of meat daily.

As to the use of all other vital foods the use of meat must be well regulated. The reason why meat is often considered harmful is because it is almost always used in improper combination with other foods. Meat should be combined only with the non-starchy vegetables, as an overacidity of the stomach is produced whenever bread or potatoes are used with meat. This hyperacidit plowers the blood's alkalinity and produces various types of acidosis.

I want to tell you how to correctly use meat so that it can properly be included in your menus. The one who likes meat but has not used it because of bad results will be surprised to notice the difference between the effects produced by eating a meal of meat, spinach, celery and bread, and after the same meal with the bread left out.

One cannot be a fair judge of whether meat will agree with him or not if he uses only fried meats, as even the healthy man must take twice as long and use twice as much energy to digest fried meats compared with those which are broiled or roasted.

Many people are vegetarians because they do not care for the flavor of meat, and it is easy for them to believe it is bad for them if they eat it only in bad mixtures, or prepared in such a manner as to disguise the natural flavor. Many who will not eat a steak may eat hash or chop suey and enjoy the taste of these dishes. Then when they suffer from indigestion the fault is laid on the meat, and many do not stop to think that the trouble has come from insulting the digestive organs with such bad mixtures.

Good rule of fresh meat should supply the body with excellent protein material with which to build cells and repair wastes. When too much meat is used, or in improper mixtures with other food, or when prepared improperly, it may serve as a source of trouble to the system and prove as harmful as excessive use of the carbohydrates.

Correspondents wishing to communicate with Dr McCoy should address letters Dr. Frank McCoy, c/o McCoy Publications, Inc., 680 South Ardmore Avenue, Los Angeles, California.

Regulate the Bowels and You'll Be Healthy

Overcome Constipation and Keep the System Free of Wastes

MOTOR HALITOSIS COSTS MONEY

Sulphur-forming acids in the gasoline cause 50 per cent. of valve and bearing trouble. Look to your valves! If they show signs of corrosion, change at once to our Home Gas.

VILE smelling fumes from the exhaust give the first warning of approaching engine trouble and costly repair bills. The engine is suffering from Motor Halitosis, caused by sulphurous corrosives in the gasoline; if this condition is not corrected it will quickly lead to corroded and pitted valves and bearings . . . and a big bill for repairs. Avoid these troubles by using pure gasoline.

HOME GAS
The Standard of Quality

Guaranteed free from corrosive sulphur compounds

Market Demand for Eggs Exceeds Current Output

Shortage on Prairies Forces British Columbia to Ship Surplus Supplies—Trading With Old Country Expected to Take Place

Egg market conditions continue to show an upward trend in prices as fresh receipts have fallen off in all producing areas. Extras especially are affected according to the Egg and Poultry Market Review. The two large consuming centres, Montreal and Toronto, are experiencing a strong demand for extras and with the reducing of receipts their demands are much in excess of the supply.

Owing to a considerable shortage on the Prairies, British Columbia has been called upon to ship all the surplus supplies of pullet extras it can possibly spare to Eastern buyers. Although shippers throughout the province have little surplus stocks, they are shipping all the eggs they can spare to the Eastern markets. At the majority of Prarie points where pullet extras cannot be had, the dealers are using their storage supplies to make up for the deficit.

Eastern shippers state that some inquiries are coming from Great Britain for storage eggs. While there is no advice yet of any actual sales, Eastern shippers report that some contracts will be made in the near future with the Old Country. Although it is understood that some contracts for export eggs were made from Ontario distributors, the majority of the consignments for Great Britain are being sent from British Columbia.

Given normal weather conditions during the Winter months, the storage egg situation should become fairly sound but with the probability that large quantities will be shipped from the Western Provinces, should the Winter be mild, Eastern shippers state that they will take on some of the export trade.

As far as the local end is concerned the receipts of fresh eggs have been only fair, but pullet extras and peewees are increasing in numbers as is the demand. A large carlot left the Island for the East during the latter part of last week. Dealers are quoting producers the following: Extras, 45; firsts, 46; pullet extras, 36, and peewee seconds, 25 cents a dozen. The wholesale prices are as follows: Extras, 48 to 50; firsts, 43 to 45; pullet extras, 39 to 41, and peewee seconds, 27 to 29 cents a dozen.

Retailers are quoting about five cents a dozen more on each grade. Whether or not the prices will advance in a week or two as predicted could not be definitely known yesterday by local poultrymen.

DOUKHOBORS IN PORTO RICO CAMP BEHAVE

Better Conditions Are Reported by Provincial Police From Camp of Fanatics

PROPOSED YMIR TROUBLE HALTED

The provincial police are beginning to withdraw the guards from the Doukhobor encampment at Porto Rico, where the fanatical section of these people moved when they were forced to leave the vicinity of Nelson. This is being done in view of the fact that the Doukhobors are beginning to manifest a disposition to conduct themselves rationally.

For a time, after being moved to the old settlement at Porto Rico, the party utilized the buildings that were there just as they found them, without showing any disposition to make them comfortable. They are now beginning to repair the buildings and stop up the window openings that were without anything to prevent the wind blowing through.

A move to make a demonstration at Ymir a little time ago was checked by the police who, after they had reasoned with the fanatics, were rewarded by finding that they went back to Porto Rico and settled down quietly again.

It is the hope of the police that these Doukhobors may disperse before long and return to their homes.

Those in jail who made trouble by refusing to eat are altering their attitude, and ceasing to give trouble.

CHICAGO, Oct. 12.—Race results at Hawthorne track today follow.

First race—Six furlongs:
Hidden Thoughts (Marsum) $4.00 $3.00 $3.00
Roycrofter (Ralbert) 3.00 2.60
Ladentelle (Deprema) 1.00
Time 1 16 3-5. Also ran: Col. Sprague, Strike, Omardale, Fidelle O., Kay Gibson, Knockabout, Col. Drane, Aunt Melia, Easer Play. Scratched: Paul Severs, Golden.

Second race—Six furlongs:
Old Bill (Kellom) $14.00 $6.00 $4.00
Homewood (Laidley) 10.00 6.00
Alec Woodcliffe (L. Jones) 6.00
Time 1 16. Also ran: Walter R., Coral Rose, Blue Blood, Little Asbestos, George Green. Scratched: Agnes Wynn, Al Sabath, Laddy Go, Ethel Sherlock, Plaza Real, King Bank, Nobody Home, Lady Lanis, Go Away.

Third race—Mile and seventy yards:
Tee Cracker (L. Jones) $6.00 $3.00 $2.00
Cabildo (Martin) 10.00 6.00
Patti Louise (May) 3.00
Time 1 48. Also ran: Robert J. E., Flo O'Neill, Ellen H., Golfs Go Now, Royal Sport. Scratched: Kennedy.

Fourth race—Mile and seventy yards:
Bill Looney (Fry) $22.00 $15.00 $6.00
Lightning Jones (Landell) 6.00 6.40
Sidney Grant (Chiva) 6.00
Time 1 46. Also ran: Netty, Pebble, Who Wie, Narelle. Scratched: Sear Cry.

Fifth race—Mile and quarter:
Enonymous (Martin) $1.00 $1.00 $2.40
Mykachee (May) 6.00 6.00
Nam (Halbert) 4.00
Time 2 11 1-5. Also ran: Pat Field, Webster, John Johnson Jr., Gay Lotharie. Scratched: Magdalene, Frightful, John Peel.

Sixth race—Mile and one-sixteenth:
Wacker Drive (Kelum) $14.00 $4.00 $4.00
Stelvo (Parmele) 6.00 3.00
Bel Rome (Shrop) 3.00
Time 1 51. Also ran: Lindel, Sue, Laundryman. Scratched: Jack Alexander.

Seventh race—Mile and one-quarter:
Ted Healy (Martin) $4.00 $3.00 $2.40
Open Os Shut (Arrsad) 6.00 3.00
Majos (May) 2.40
Time 2 10 1-5. Scratched: Nome, Julie H., Chechesso, Sligo Branch, Mat McGloner. Scratched: Inker, Aviator.

MERCUR AND HALL DOUBLES WINNERS

Defeat Van Ryn and Gorchakoff to Capture Mexican Title—Mercur and Van Ryn in Singles

MEXICO CITY, Oct. 12.—Fritz Mercur, of Bethlehem, Pa., and Gilbert Hall, of South Orange, N.J., won the men's doubles championship of Mexico City today, defeating the American Davis Cup players, John Van Ryn and Ben Gorchakoff, Occidental College star, in the long final match by scores of 10-8, 9-8, 3-6, 7-8, 6-2.

Edith Cross, San Francisco, and Marjorie Gladman, of Santa Monica, Cal., captured the women's doubles championship by beating Dorothy Williams and Josephine Cruickshank, of San Francisco, 8-4, 6-4.

In the semi-finals of the men's singles Gorchakoff defeated Mercur, 2-6, 7-5, 6-4, 6-3. Van Ryn qualified to meet him in the final round by defeating Hall, 6-3, 6-4, 7-5.

Large Number Ride in Hunt Club's Meet

The Victoria Hunt Club had its third and most successful meet yesterday afternoon. There were nineteen riders in the field and the course was the best one taken this year.

Mrs. Alan Swinton, who led the field for some distance, again had the honor of being first at the kill, duplicating her victory of the first meet.

The course, starting in the Uplands, went across to the present flying field, taking in several hedges, fences and ditches. From the aerodrome the hunt followed the trail for about half a mile in the fields adjoining Shelbourne Street and then struck off to the left in the direction of Cedar Hill. The hare was nearly caught in Uplands but managed to double and make an escape.

J. R. Scoby acted as M.F.H. and Jack Bessonette was the hare.

Membership is increasing and the club is now on a sound financial basis. Information as to future meets may be had by telephoning 1303 or 5418R.

EASTERN RUGBY

Finals of Eastern Canadian Rugby yesterday follow:

Hamilton 8, Argos 5 (Big Four).
Windsor 12, Hamilton Seconds 8 (O.R.F.U. Intermediate).
Balmy Beach 7, Camp Borden 1 (Senior O.R.F.U.).
Montreal 3, Ottawa 4 (Big Four).
Sarnia 21, Varsity 5

Kendry—I hear you're going to be married, old man. Congratulations.
Bentley (sadly)—You're too late, old man. I'm married.

PIN SPILLERS TO COMMENCE PLAY MONDAY

M.P.P.'s Will Officiate at Opening Ceremony for 1929-30 Season on Arcade Alleys

CITY AND FIVEPIN TEAMS WILL ROLL

With James W. Beatty and H. Despard Twigg, members of the Legislative Assembly, officiating, the 1929-30 season with local maple smashers will be ushered in on the Arcade Alleys at 8 o'clock tomorrow night. The season promises to be one of the most successful in many years. It is presumed that more new bowlers than ever before will be seen in action on the Arcade Alleys this Winter, both in the five and ten pin games.

The opening fixtures carded for tomorrow night include a City League match between the Jokers and James Island and a Fivepin League encounter between Spencer's Diamonds and the Huskies.

The complete list of games for this week in the Fivepin League follows:

Monday—Spencer's Diamonds vs. The Huskies.
Tuesday — Jokers vs. Colonist Scribes.
Tuesday — Times vs. Colonist Typos.
Wednesday—Ups and Downs vs. Elks.
Thursday—C.N.R. vs. Colonist Nut Quads.
Friday—Eagles vs. Poodle Dog Cafe.

Schedule fixtures for the City and Commercial Leagues released last night by President C. Chislett follow:

CITY LEAGUE

Oct. 14—James Island vs. Jokers.
Oct. 18—Night Owls vs. Colonist.
Oct. 24—James Island vs. Night Owls.
Oct. 25—Colonist vs. Jokers.
Oct. 31—Jokers vs. Night Owls.
Nov. 1—Colonist vs. James Island.
Nov. 7—James Island vs. Jokers.
Nov. 8—Night Owls vs. Colonist.
Nov. 14—James Island vs. Night Owls.
Nov. 15—Colonist vs. Jokers.
Nov. 21—Colonist vs. James Island.
Nov. 22—Jokers vs. Night Owls.
Nov. 28—James Island vs. Jokers.
Nov. 29—Night Owls vs. Colonist.
Dec. 5—James Island vs. Night Owls.
Dec. 6—Colonist vs. Jokers.
Dec. 12—Jokers vs. Night Owls.
Dec. 13—Colonist vs. James Island.
Dec. 19—James Island vs. Jokers.
Dec. 20—Night Owls vs. Colonist.
Jan. 9—James Island vs. Night Owls.
Jan. 10—Colonist vs. Jokers.
Jan. 16—Jokers vs. Night Owls.
Jan. 17—Colonist vs. James Island.

COMMERCIAL LEAGUE

Oct. 15—Rogues vs. Restorer.
Oct. 16—Poodle Dog Cafe vs. James Island.
Oct. 17—Colonist vs. Royal Arcanum.
Oct. 21—Poodle Dog Cafe vs. Restorer.
Oct. 22—Colonist vs. James Island.
Oct. 23—Rogues vs. Royal Arcanum.
Oct. 28—Rogues vs. Poodle Dog.
Oct. 29—Royal Arcanum vs. James Island.
Oct. 30—Colonist vs. Restorer.
Nov. 4—Restorer vs. Royal Arcanum.
Nov. 5—Rogues vs. James Island.
Nov. 6—Poodle Dog Cafe vs. Colonist.
Nov. 11—Poodle Dog Cafe vs. Royal Arcanum.
Nov. 12—Restorer vs. James Island.
Nov. 12—Rogues vs. Colonist.
Nov. 18—Rogues vs. Restorer.
Nov. 19—Poodle Dog Cafe vs. James Island.
Nov. 20—Colonist vs. Royal Arcanum.
Nov. 25—Poodle Dog Cafe vs. Restorer.
Nov. 26—Colonist vs. James Island.
Nov. 27—Rogues vs. Royal Arcanum.
Dec. 2—Rogues vs. Poodle Dog.
Dec. 3—Royal Arcanum vs. James Island.
Dec. 4—Colonist vs. Restorer.
Dec. 9—Restorer vs. Royal Arcanum.
Dec. 10—Rogues vs. James Island.
Dec. 11—Poodle Dog Cafe vs. Colonist.
Dec. 16—Poodle Dog Cafe vs. Royal Arcanum.
Dec. 17—Restorer vs. James Island.
Dec. 18—Rogues vs. Colonist.

BILLIARD LEAGUE WILL START SOON

Interservice Cue Loop to Hold Meeting and Draw Up Plans for Coming Season

The Interservice Billiard League, which operated so successfully last season with teams from the various service clubs competing in it, will soon swing into action according to the information received yesterday. Plans for the coming season will be discussed at a meeting to be held in the near future.

Last year three sections, "A," "B" and "C," were in operation with teams from the Britannia Branch, Veterans of France, Army and Navy, 16th Canadian Scottish, and Pro Patria represented. The Veterans of France captured the "A" section honors and lost out in the final of the provincial play-off against a strong team from the Mainland. Britannia Branch captured the "B" and "C" divisions after some keen competition.

Teams from the same clubs are expected to enter the league again this season, while a few more additional squads may be received from the different regiments and battalions at the Armories.

B.C. Synod Passes Many Important Resolutions

Leading Presbyterians of Province Express Views on Liquor Laws, Scottish Church Union, Lord's Day Observance, Marriage Laws, and Bible Society Work

Accompanying are some of the resolutions passed at the Synod of British Columbia, which closed its meetings in Vancouver on Thursday evening:

SCOTTISH CHURCH UNION

1. "The Synod of British Columbia desires to join hands with the members of the Presbyterian family throughout the world in felicitating the two great Presbyterian churches in Scotland on having effected a union of their forces into one organization, even as the various bodies of Presbyterians in Canada, being the same in doctrine and polity, achieved this result in 1875. This Synod expresses the confident hope that the Scottish union will make for larger success in Christian work in Scotland and assist in other portions of the world where churches of the same doctrine and polity exist. The Synod, while expressing this view, is not to be understood as advocating unions where essentials in doctrine and polity have to be sacrificed, as was the case in Canada in 1925.

GOVERNMENT SALE OF LIQUOR

2. "The Synod, believing that it is the duty of Christians to see that their country is properly governed, deplores the fact that there exists in this Province, by permission of law, businesses and practices which are detrimental to the progress and well-being of the land. This condition of things exists with the tacit or open consent of all political parties and is dangerous to the whole life of the Province. Governments act in regard to such matters according as the people manifest their will, and we urge our people to do their utmost to put an end of the tragedy of the Government sale of liquor, the unspeakable degradation of the beer parlor and the destructive orgy of race track gambling which pollute the whole social atmosphere of the Province and injuriously affect both old and young by their deadly influence.

3. "The Synod desires to express its appreciation of the action proposed to be taken by the Attorney-General of the Province to have the Marriage Act so amended that due notice shall be given beforehand of each marriage ceremony and to secure that the celebration of the marriage service shall be only by persons duly qualified, authorized to conduct same, and thus to remedy conditions which might be injurious to the home and family life of the Province.

BIBLE SOCIETY WORK

4. "The Synod expresses its strong appreciation of the work of the British and Foreign Bible Society and the Canadian Bible Society and commends them to the liberal support of our people. The circulation of the Book is of the utmost consequence to the well-being of the country, and the Synod expresses the hope that ere long the efforts being made to have this supreme literature read in the schools of the Province may be crowned with success. Atheism, which is the seed of anarchy, is being secretly taught in different parts of Canada by atheistic organizations and it can be best met and neutralized by the circulation of the Word of God in its purity and power.

LORD'S DAY OBSERVANCE

5. "The Synod notes with satisfaction the fact that a Dominion-wide movement for the better observance of the Lord's Day is in progress, and is pleased to note that the Dominion postal authorities intend to help the movement by the use of the obliteration stamps with the words "Observe Sunday" on mail matter for a period. The Synod earnestly counsels our people to avoid the irreligious, thoughtless, unpatriotic and destructive uses of the Lord's Day which are so prevalent amongst us and which, as history proves, are the invariable prelude to the moral degradation of a country.

ISLAND KING FINED $3,000

Victoria, B.C., Motorship Accused of Smuggling Aliens to San Diego Following Investigation

IMMIGRATION HEADS REFUSE CLEARANCE

SAN DIEGO, Cal., Oct. 12.—A tale of a disgruntled "hungry" crew and of a sea captain who asserted he was "imposed upon" to release three alleged alien stowaways upon arriving here Tuesday was revealed today when immigration officials questioned Captain P. Main and several members of the British motorship Island King.

The investigation was made in connection with the learning of details of alleged alien smuggling activities, brought to the attention of immigration officials by certain members of the crew, according to reports by Mr. Dan S. Kuykendall, inspector in charge of immigration here.

Today Captain Main was closeted with the Federal officers and was reported by Kuyendall to have given "the absolute facts of the case." These, as stated by Captain Main, according to Kuyendall, were to the effect that the stowaways boarded the Island King at Panama, without the captain's knowledge, and that the captain was "prevailed upon" by the stowaways and members of the crew to turn loose the stowaways when San Diego was reached in violation of the immigration laws.

Following questioning of Captain Main local customs officers, upon notification by the immigration authorities, refused the clearance of the Island King, originally scheduled to have sailed for Victoria, B.C., this evening, and immigration authorities assessed a $3,000 penalty against the ship, according to Kuyendall.

LACONIA CARRIES LINEN OFFICIALS

Delegation of Twenty En Route to Canada to Study Merchandising

MONTREAL, Oct. 12.—The official delegation of twenty, representing the Irish and Scottish linen industry, which is coming to this country to study modern merchandising methods at the behest of the Prince of Wales, will arrive here via the Cunard liner Laconia on October 14. An elaborate programme has been prepared, with the assistance of British diplomatic and consular representatives in this country, for the instruction and entertainment of the delegation. A large public luncheon on October 18, which will be addressed by leading American industrial figures, is the first and principal event on the schedule.

Mr. Hugh R. Ross, of Ross Bothers, Limited, and chairman of the Irish and Scottish Linen Guilds, will head the delegation. Among others, he will be accompanied by Major S. H. Hall Thompson, M.P., High Sheriff of the city of Belfast, Messrs. William Andrews, James G. Crawford, Captain J. C. Herdman, Sidney J. Fraser, G. A. Parkes, F. M. Sinton, John Black, Fred S. Beveridge, Hugh Hill Campbell, Thomas Coote, J. S. Lamont, W. Galbraith Mathewson, Frank MacLean, W. B. Robertson, Herbert Shilliday, Douglas Smyth and S. Clark, secretary of the delegation.

The coming of the delegation is significant of a considerable revival of Irish and Scottish linen manufacturers, the oldest textile industry in the world, which, in common with other fabric industries, suffered from consequences of the war. The complete recovery of linen, however, is assured because its peculiar qualities and uses, and the impossibility of creating a synthetic substitute, make it virtually noncompetitive with other cloths.

Parley Stopped Through Lack of British Seamen

GENEVA, Oct. 12.—Progress of the international conference on Maritime questions was stalled today while the delegates from many countries warmly debated whether British seamen are really represented in the conference.

This controversy has grown out of the British shipowners' refusal to participate on the grounds that the British Seamen's Union has no spokesman in the workers' delegation of their country. The shipowners of other countries are unanimously supporting the position of their abstaining British colleagues and are passing a resolution which says that in similar conferences hereafter on maritime problems the Seafarers' Union shall have direct representation.

ARENA CARNIVAL TO BE NOTABLE

ROTARY CLUB EVENT WILL BE SPECTACULAR—RINK TO BE BLAZE OF COLOR

Celebrated Skating Stars and Ice Acrobats Secured—Hundreds of Tableaux

On Saturday, November 9, the Victoria Rotary Club will hold its third annual ice carnival at the Arena, and already active plans are on foot to make this the most spectacular ice event ever seen in Victoria. Several of the most famous skating stars and ice acrobats on the continent have already sent in contracts to appear. Of principal interest is the securing of the greatest comedy duo in America, Bennett and Shipstad. Those who attended the ice carnival last year will remember the team of Shipstad and Johnston. The Shipstad who appears this year is a younger brother and possesses a bag of ice tricks all his own. He is, without a doubt, the greatest boy spinner in the world. He does five different spins without stopping, making something like eighty turns. Miss Bennett, who comes as Shipstad's partner, is equally versatile.

With special lighting to make the big rink a fairyland of color, and with hundreds of costumed skaters to take part in the various tableaux and other spectacles, everything is being done by the Rotary committees to make this year's carnival the most spectacular ever held in Victoria.

AMBASSADOR ON HOLIDAY

NEW YORK, Oct. 12.—Sir Esme Howard, British Ambassador to Washington, who accompanied Premier Ramsay MacDonald to New York, sailed today for a month's vacation on the Isle of Tobago, British West Indies.

An attorney recently received an amusing, if cynical, letter from an educated Indian client, who desired him to collect a debt.

After two pages of meticulously correct English the letter concluded:

"If you cannot collect the debt by fair means, try legal proceedings."

Eustace—"Do you speak Latin?"
Erica—"No, I've never even been there."

BOBBY FOULIS WINS JUNIOR GOLF TOURNEY

Turns in Remarkable Card in First of Quarterly Events Held at the Uplands Golf Club

GERALD LYTTON IS RUNNER-UP

Playing a brand of golf that would be a credit to a city champion or even a professional, Bobby Foulis, Jr., captured the first junior tournament held by the Uplands Golf Club yesterday by touring the layout in 72, two over perfect figures, which, with his handicap of three deducted, gave him a net 69, one stroke in front of his nearest rival.

Foulis was closely followed by G. Lytton, who turned in a card of 95-25-70, and Nigel Tomlin with a 100-29-71. However, the winner's card deserves special mention as be played one of the best rounds ever handed in by a junior member. Jack Melville, another youngster in his 'teens, checked in with the only other card under the eighty mark. He had a 77 and took fourth place, with his handicap of three deducted.

Foulis reached the turn in thirty-nine strokes and then unloosed some beautiful golf on the homward jaunt, which he negotiated in thirty-three. By his victory he takes possession of the perpetual trophy donated for the occasion by R. L. Challoner and F. C. Dillabough, captain and vice-captain respectively, of the club.

Miss Mary Leith headed the female entry list by finishing up with a net 89. Gerald Lytton was awarded the prize presented by Walter Oravlin, the club's professional, and Jack Melville took the other prize given by Mr. Oravlin.

There were twenty-one entries and the golf displayed more than justifies the match committee's decision to make this competition a quarterly affair. The next one will be held in January.

	Gross	Hdcp.	Net

TILDEN DEFEATED BY JEAN BOROTRA

American Champion, Playing for Britain, Goes Under in Thrilling Struggle

LONDON, Oct. 12.—William T. Tilden II was beaten by Jean Borotra, of France, in a thrilling tennis match at the Queens Club today. The scores were 16-8, 8-7. Although Tilden has usually been able to defeat Borotra, he was clearly outplayed by the Frenchman.

The American champion is representing Britain in a series of international matches between the leading tennis club of France and England.

Tilden suffered another reverse in doubles when be and P. L. B. Spence, of South Africa, were defeated by Borotra and Olasser, of France, 6-8, 8-6, 6-1. France won the series with ten matches won to Britain's five.

VANCOUVER SPORT

VANCOUVER, Oct. 12.—Football results here yesterday follow:

ENGLISH RUGBY
(Miller Cup Series)

Rowing Club A 6, Varsity 3.
Meralomas 8, Ex-Kings 6
Seaforths 11, Ex-Georges 6

SOCCER
(Vancouver and District League, First Division)

Vancouver United 0, St. Saviours 2.
St. Andrews 1, North Shore United 3.
New Westminster Royals 3, Kerrisdale 0.

JUNIOR FOOTBALL

Results of Junior Football League matches played yesterday follow: Y.M.O.A. 2, Sidney 6; Oaklands 2, Esquimalt 1; Royal Oak 10, K. of C. 2.

Evidence Proves Less Smuggling Of Liquor Now

WASHINGTON, Oct. 12.—Evidence that the Government is succeeding in its intensive campaign to stop liquor smuggling across the Canadian border was seen by officials today in figures made public by Assistant Secretary Lowman of the Treasury. "Quite a reduction" in the amount of liquor cleared from Canadian ports for the United States in the vicinity of Detroit was reported by Mr. Lowman, who has charge of the Treasury's prohibition enforcement efforts. Only 48,645 cases were cleared last month, he said, in comparison with 94,520 in August and 184,430 in September, 1928.

WILL ATTEND REUNION

NEW WESTMINSTER, Oct. 12.—His Honor Lieutenant-Governor R. Randolph Bruce has accepted an invitation to attend the reunion of members of the 47th Battalion, C.E.F., here on October 26.

Learning to Know History of Locality

Sunday Afternoon Ramble Round Shoreline of Esquimalt

Last Sunday afternoon, October 6, an interesting walk was taken by a group of young people who have banded themselves together for the purpose of studying the natural and historical features of Victoria and its environs. Under the leadership of Mr. C. C. Pemberton, president of the Natural History Society and a member of the local features committee of the British Columbia Historical Association, the party assembled at the south end of the Postoffice, where they viewed the photograph of old-time Victoria which has been set up there by Mr. French, and contrasted the present with the past, while observing the natural features brought out in this fine picture. Following the Wharf Street waterfront, they came upon the site of the old fort, and found sprouts of oak marking the places of the fine old trees whereon, according to Sir Henry Crease, Sir James Douglas posted the notices proclaiming the erection of the fort; this clump of scrub oak was seen near the Marine and Fisheries Building. The old Hudson's Bay Company's store and wharf, Bastion Square, historic places in the early days where passengers arrived from London and San Francisco, were visited.

The old Hudson's Bay store is said to have been built of brick which came from England around the Horn, and it was here that all the shopping was done in the early days. Among the old buildings is the site of the first Colonist office, and much interest was taken in attempting to decipher the inscriptions on the walls of the stores, some of which are quite clearly visible.

Proceeding to Johnson Street, a picture of the one-time beautiful ravine was conjured up, but having passed from its stage of flowery banks and running stream to an objectionable insanitary ditch, it had been gradually filled in. The harbor was crossed, over the new bridge, while reminiscing of the time of the first bridge, and later the ferry boat by which one crossed for a fare of ten or twenty-five cents.

HISTORIC MACAULEY PLAINS

The Indian Reserve, now the Industrial Reserve, was contrasted in its present flourishing condition with the old cedar huts, which were portrayed in Paul Kane's wonderful painting of Fort Victoria, showing also the Indian war canoes, with the vociferating crews, in the foreground of the picture. Skirting the shore line to Head Street, a curious oak was observed near the golf links, an oak the trunk of which has grown to envelop rock masses in an extraordinary manner.

Some fine old Douglas firs were next observed, showing a peculiar feature; where the bark had been cut off the trunk the vigor of the trees had supplied strange burls and healings. From the heights of rock at this point the aircraft and traffic of the harbor was seen; two planes alighted while the party kept to the eminence. Continuing on their way, the contrast between pines and firs was studied; one fine old tree, much damaged, had assumed a peculiar trident shape following the loss of its stem and upturning branches; the causes of this condition were discussed. McLaughlin Point, named after the famous Dr. John McLaughlin, in charge of the Western Division of the Hudson's Bay Company, was next reached; thence to Macauley Point, named after Donald Macauley, in charge of Viewfield Farm for the Puget Sound Agricultural Society (H.B.C.), who was accidentally drowned in the Esquimalt Harbor in 1866.

Here the party paused in admiration of the remains of the beautiful stretch of woodlands, and the natural features of dry open plain contrasted with the moisture laden wooded portions; their meditations were disturbed by shouting, which showed them their danger of being bombarded by golf balls. Moving on, a fine stand of native poplars (Trichocarpa) was discovered, a fallen trunk measuring twenty feet in circumference. Soon the party left the road, and reached Saxe Point, which is named in association with Coburg and Gotha Points in Esquimalt Harbor, after H.R.H. Prince Albert of Saxe-Coburg and Gotha, Royal Consort of Queen Victoria. The great length of Douglas fir roots, extending along the ground in search of water, was commented upon. One battered weird fir showing almost human intelligence sending branches out of the wind, these in turn throw up young shoots to endeavor to replace the original stems, battered to pieces by the wind.

Very striking specimens of large arbutus trees were much admired with their bright red stems and vivid green foliage. It was also easy to see from their straggling shape that they had originally grown in a forest of dense firs and had successfully battled for light with their former competitors now dead and gone. Further beautiful woods showed many phases of plant life, among them weird living stumps, causes of which aroused much controversy in early ages in Europe.

AT NAVAL YARD

In one of the streets traversed, a beautiful archway formed by two arbutus trees, due to another victorious contest for light as a consequence of their ability to dodge sideways in chase of it, elicited enthusiastic admiration. The party then came to the sleepy and deserted naval part of Esquimalt and listened to an account of the halcyon days of the British Naval Station. Arrived at the dockyard, the beautiful grounds and historical buildings were visited by kind permission of the authorities, and the early days were recalled of the landing of the wounded from the British and French ships which engaged the Russians in the Crimean War in 1855. The afternoon was greatly enjoyed and it is proposed to hold such meetings at intervals during the coming months. Anyone wishing to join in these expeditions may obtain further information by telephoning 1673L.

PRESBYTERIAN CHURCH MAKES STEADY GAIN

Secretary of Board of Administration Is Speaker at Local Churches Today—Growth Since Disruption

500 CONGREGATIONS ADDED SINCE 1925

Since the disruption of 1926 the Presbyterian church has made substantial progress, and the 793 non-concurring congregations which resolved to be "continuing" Presbyterian churches have grown by 505 to about 1,300 congregations.

Of expansion in many directions Rev. O. M. Dunn, of Toronto, secretary of the Board of administration of the church, who is registered at the Strathcona Hotel, brings a record in the course of his visit to Vancouver Island, following attendance at the Provincial Synod last week. Mr. Dunn explains that there are now 180,000 members of the church, representing an adherence of over half a million people. He quoted statistics to show the growth in number of ministers, elders, families and individual members in the past four years, and of the expansion of the mission stations at home and abroad. There are about 200 home stations in the newer parts of Canada, and active foreign mission work is carried on in Formosa, two sections of India, Manchuria, with the Koreans in Japan, and in British Guiana.

Budget needs are being well sustained in spite of the great problems presented by the adjustment of the church to the division of 1925, and the payments to the end of September were $31,000 in advance of the corresponding period of 1928. Thirty-five of the forty-three Presbyteries into which the church is divided in Canada have exceeded their payments as compared with last year.

Mr. Dunn will speak at St. Andrew's, St. Paul's, Knox and Gorge churches today. He came west from the Maritime Provinces meeting at Stellarton, N.S., and after conducting gatherings in British Columbia, will go to the Alberta Synod meeting in Edmonton, that of Saskatchewan in Moose Jaw, and of Manitoba in Winnipeg, afterwards visiting New Liskeard, Ont., before returning to Toronto.

EMINENT MEN SEND MESSAGES

CONGRATULATIONS ON NEW CATHEDRAL RECEIVED FROM THREE CONTINENTS

Former Archbishop of Canterbury Writes—Governor-General Sends Good Wishes

Messages of congratulation and good wishes upon the consecration of the new Christ Church Cathedral have been received by the Bishop of Columbia from interested persons in many lands. The architect, Mr. J. C. M. Keith, has also been the recipient of many expressions of felicitation.

His Excellency the Governor-General of Canada, sent the following message to the Bishop:

"Warmest good wishes on opening of new cathedral. Trust that Providence will amply bless your great work."

From Bishop Perrin, second Bishop of British Columbia, and now in his eighty-first year, came this telegram from London:

"Thanks be to God. Heartiest congratulations on wonderful success. I rejoice in spirit with you all."

Other messages, by telegram and letter, have been received from many holding high positions in church and state in the British Empire, the United States, Japan and China.

IMPORTANCE REALIZED

Among the most significant comments in the correspondence received was the following remark made by Baron Davidson, former Archbishop of Canterbury, who wrote:

"I have always felt that those who take the really large view of either imperial or ecclesiastical possibilities are entitled to think that before many generations are passed, the region of British Columbia may be one of the world centres. How vital, therefore, that it should be well cared for at this time."

TO INQUIRE INTO OBSERVER STORY

WASHINGTON, Oct. 12.—Investigation of the story that Mr. Frank B. Kellogg, while Secretary of State, called in officers of the Bethlehem Shipbuilding Corporation and demanded they drop their connections with William B. Shearer, the $25,000 "observer and reporter" of the shipbuilders at the 1927 Geneva Naval Limitations Conference, was determined upon today by the Senate Naval Investigating Committee.

Modernization Restores Values

ALTERATIONS MAKE ATTRACTIVE HOME

Four Walls and Roof of Old-Timer Becomes Attractive in New Dress

When the cottage in the illustration was first built a good many years ago, it was considered to be one of the most attractive residences on the street.

And the owners had taken pains to make its surroundings as pleasant as possible. The two wooden flower boxes on the front porch attest to this statement.

And yet as time passed the appearance of the house came in sharp contrast to the cottages that were later constructed in the neighborhood. The shelf-like porch with its flattened roof and round wooden pillars was like a thousand others. The house itself was a plain box with a pitch roof. The windows lacked character and individuality. Decorative appeal had been lost when an uninspired carpenter set in place the plain, narrow sash.

A study of the house as it appeared after being touched by modernization shows that the greatest changes were made in the porch, and the windows and trim. As a matter of fact, these are entirely new.

Instead of a narrow porch across the front, a square porch with an enclosure of wood with a steeply pitched roof and a shingled gable was constructed. The pillars at each outside corner were made of brick one-half of the height, the balance being white painted wood. The architrave is also painted white, giving the whole an effective appearance.

The narrow single windows are gone. In their stead are new sash and trim wider and not so high. Today the high narrow windows are a sign that the building was constructed years ago.

The white painted trim sets off the windows through contrast with the stained shingles that are used as siding.

Upstairs over the front porch the old narrow window has been superseded by an opening filled with two sash. This arrangement allows an abundance of natural light to invade the bedroom fitted snugly under the rafters.

The building illustrates the effectiveness of shingles as siding, for here the rich tones of the stained shingles give the dwelling a comfortable, homey atmosphere.

Just a Neat Little Cottage Rebuilt for Two

This Little Cottage Shows What Can Be Done to Make Four Walls and a Roof Into a Charming Home. Before and After Views Like Those on This Page Show the Possibilities That Are Set Forth in Modernization.

STEPPING STONES MAKE NEAT WALKS

Coloring May Be Added With Mineral Pigments, Giving Attractive Results

A touch of the artistic may be introduced into the walk in the back lawn by using stepping stones instead of the more formal concrete walks. Such walks are usually curved across the lawn and add a charming touch to the vista of lawn and shrubbery.

Stepping stones are inexpensive. They may be purchased already cut to shape or may be made by your contractor. These stones are irregular in design and may be colored with mineral pigments. Often the stones are left white, thus making a sharp contrast to the green of the lawn.

A common way to place such stones is to place them in the desired position on the lawn, cut around the edge of each stone with a sharp-pointed knife or trowel, lift out the sod and remove sufficient dirt to allow the stone to set in place with a half-inch clearance above the level of the lawn. After the stone has been tamped into place, fill in around the edges with loam.

Grass seed should be immediately sown so that in time the stones will be entirely surrounded by lawn.

Production of non-alcoholic carbonated beverages in Canada during 1928 amounted in value to $10,477,821, an increase of 22 per cent over the $8,713,471 reported for the previous year, which in turn was 16 per cent greater than the output of $7,496,504 in 1926, according to figures made public by the Dominion Bureau of Statistics at Ottawa.

The 347 plants in operation during 1928 were distributed by provinces as follows: 146 in Ontario, 102 in Quebec, 20 in British Columbia, 18 each of New Brunswick and Nova Scotia, 17 in Saskatchewan, 14 in Alberta, 10 in Manitoba and one in Prince Edward Island.

Capital employed in the industry stood at $11,650,836; employment was afforded to an average of 1,967 people to whom $2,407,861 was paid in salaries and wages, and by manufacturing processes $3,972,178 was added to the value of purchased materials which cost $4,705,604.

Some Doors Begin to Cost . . . . after they are hung

SOME doors cost more after they are hung than their initial cost, besides the inconvenience and trouble of rehanging and planing down. You can avoid all this trouble and expense by having LAMINEX doors—scientifically built up—carefully inspected—and absolutely guaranteed trouble-proof.

LAMINEX doors will cost you less and give you better satisfaction. Look for the yellow label.

City's Older Sections Are Rejuvenated by New Plan

One of the significant aspects of the Home Modernization Movement is the cumulative effect of the effort. The modernizing of one home in an old neighborhood becomes a startling point from which startling ramifications result.

The older residential sections of the city are filled with homes that were up to date back in the days of the World's Fair. The frames of these houses are sturdily constructed and the workmanship that entered into the residence is excellent.

But they are hopelessly behind the times in many respects. Their exteriors are usually depressing, being bare, ugly and stodgy. The interior appointments are fully in keeping with the exterior. Old-fashioned electric light fixtures, obsolete plumbing, ill-arranged rooms and bars, cramped stairs give a hint of the general state of most of these homes.

These houses are valuable and could be duplicated only at the expenditure of many thousands of dollars. The houses are too well constructed to be summarily discarded. Yet their general condition is such that they are hard to sell. On a slow market it is often impossible to get a price near their true worth.

Real estate agents report that many well constructed but old-fashioned houses in rundown neighborhoods are sold for the value of the lot on which the house stands.

Modernization will help these old houses. A small amount of money placed in improving the exterior lines of the buildings will increase immeasurably their values. Modernizing the interior of the dwelling not only aids in increasing the comforts of living but makes the old place an attractive-looking home.

A newly modernized home in a rundown neighborhood stands out from its neighbors. It becomes the subject of favorable comment, of admiration. Other home owners in the neighborhood aspire to place their homes in a similar class and soon a distinct elevation in tone is apparent.

Such a small matter as improving the lawn (one phase of modernizing, with well-trimmed grass, shrubbery and flowers has had far-reaching effects on the neighbors.

Considering the matter from a more selfish standpoint—that of dollars and cents—the act of modernizing a home immediately increases its market value. Two thousand dollars used to modernize a $5,000 house causes its value to become not $8,000, but $9,000 or $10,000. Figures in excess of these have been reported.

Ordinarily the cash value of the property increases 10 to 15 per cent above the original value, plus the modernizing expense.

It is evident from this that modernizing is a safe investment.

Cave-Like Gloom Now Eliminated

When electricity is cheap and efficient you are doing yourself and family an injustice when you do not provide sufficient lighting, but allow the interior of the house to be drab and gloomy. Well shaded lights are one of our economical comforts.

Gloomy interiors are caused by a number of things. Sometimes the light provided is not sufficient for the room. Other times there is plenty of light, but the walls and ceiling are so dark they swallow the light. Again, the fixtures and bulbs are dirty, preventing the light from emerging from the lamp. Dust on a shade or on the lamp bulb can absorb as much as 50 per cent of your light output.

Sometimes all of these conditions exist in a single household, keeping light and joy out of the home.

One of the large public service companies when instructing their customers to check on the amount of light needed in a room, stated that when the walls and ceilings are fairly light in tone, provide one watt for each square foot of floor space. Since the wattage of each lamp is usually marked on the bottom of each lamp, the number of lamps needed can be quickly estimated.

PLAN TO PLANT TREES

Arbor Day is observed in all sections of the country. There should be exercises in every school—exercises accompanied by the planting of one or more trees by every class says the American Tree Association of Washington, which will send you free planting suggestions. Where there is opportunity to do so whole schools participate in planting quantities of trees on suitable areas. Local and state organizations have no better activities than the planting of trees along the highways, in parks, or on areas which may be procured for that special purpose.

Hampshire Gardens Co-operative Development, Washington, D.C. has been certified by the National Association of Real Estate Boards through its consultation bureau. The certificate evidences to the public that the project in the opinion of a committee of experts officially representing the association's co-operative apartment division meets the standards set up by the division for a sound co-operative apartment project.

The project at present includes one entire block spaced with nine structures containing 102 tenant-owned apartments. The central core of the square is given over to a perpetually dedicated park space and practically every apartment in the nine buildings has three exposures. The block is part of a fifty acre tract in suburban Washington which it is expected will eventually be completely developed with co-operatively-owned buildings of this type.

CHESS NEWS AND NOTES

England—British Chess Federation—At the 1930 congress at Scarborough an invitation tournament for six British and six foreign players will be held instead of the British championship tourney.

Mr Sultan Khan will face forty players in a display at Grosvenor House, Park Lane, London, Ten shillings and sixpence for a board and 5s entrance, for the benefit of St. Dunstan's Blinded Soldiers' Fund.

The Cable Match—The dispute about the Insull Cup has been finally settled by annulling the match altogether, so that Lewis defends two up and awaiting a challenge from an American city.

United States—California Champion—With the score of 8 to 2 A. J. Fink won the State title and medal, the first prize, and permanent possession of the Brock trophy at the meet at Los Angeles. Fink lost to Scholtz and drew with Bagby and Bierwith, champion from Horochow. This was Fink's first victory over the former Los Angeles champion, who for years in tournaments and telegraphic matches has defeated the San Francisco. The scores are: Fink, 6-2; Horochow and Scholtz, each, 5-3; Bierwith, Elliott and Weinbaum, each, 4-4; Bagby and Graybill, each, 2½-4½.

Marshal Chess Club—The first "rapid transit" of the season was won by F. K. Perkins (7½), with D. Pollard and J. Pine tied for second with 6 each.

Frank J. Marshall and his wife are visiting their friend, Leo Nardus, the Dutch artist, at his villa in Tunis, Algeria.

France—Drs. Alechin and O. Bernstein (an ex-grand master) have awarded the brilliancy prizes in the Grand Masters' Tournament as follows: No. 1 (500 francs, given by Julius Pinn) to Dr. Tarrasch for his win against F. Lamed and No. 2 (200 francs, given by J. Hallgarten) to A. Barats for his win against Sir George Thomas.

Holland—The Dutch championship, contested in Amsterdam, was won by Dr. Max Euwe, with a score of 8½ out of 9. S. Landau and H. Wernink divided second and third prizes, with 7-2.

Czechoslovakia—Is it not remarkable how rarely a great master in any subject is followed by a son who scores equally well in the same line? In the chess world there is not a single example of both father and son having ranked as masters. This thought is aroused by seeing recently that a young Vidmar has been successful in a lightning tourney. Will he rival his father's greatness either as a chess player or as an expert on electrical technology? The sire is manager of an electrical works and lecturer at a university. As a writer on the science, his books are standard works in Southeast Europe. Dr. Alechin states he is now rector of Laibach University.

The World Championship—The Boston Monitor relates the opinion of chess players in the following: "New zest has been added to popular interest in chess by the first session of the world championship match at Wiesbaden. Only two games out of eight were drawn. This is playing chess to win, something that has been demode for a good many years. In contests of this kind it is customary to have three times as many drawn games as wins, and the result has been a distinct loss of public interest in chess. Because the general run of ordinary chess players have no interest in the subtleties of the 'keep the draw in sight' style of game, little general interest was manifested in the Lasker-Capablanca and the Capablanca - Alechin matches. The man in the street, that perennial duffer at the game, delights in the imaginative and gamesome possibilities of chess. After he has puzzled over two or three of these masterpieces of inaction, with their tactics based on the slow accumulation of small advantages, he will take down a volume of Morphy games and, with happy grins, play over half a dozen of his evergreen 'brilliancies.' Blashing play has marked the contest so far between Alechin and Bogoljubow. There are sacrifices galore. Pieces are left on prize; threats and counter-threats fill the air with sparks as one combination after another is entered upon. Both players indulge in speculative and enterprising variations of the Queen's Pawn game, sometimes known as the Indo-Swan gambit. In one game Bogoljubow was a Rook ahead when the challenge resigned.

"One result of this lively contest has been to set chess players all over the world to running over the games as printed in the newspapers. If the continuation of the match in Berlin, Heidelberg, The Hague and Amsterdam maintains the crackling pace of the sections just concluded, the result cannot but assist in the popularization of chess."

The ninth game, a Queen's Gambit, was a draw after thirty moves, the tenth a win for Alechin, a flyer mover. The verdict of a good London critic is "Bogoljubow is a bold and ingenious player and on occasion brilliant, but Dr. Alechin adds to these qualities a deadly accuracy in analysis and combination which we think will prove too much for his brother exile."

When the report went around that Rudyard Kipling was getting a shilling a word for something he was writing, one Oxford student set about a reg. Wiring him a shilling they said, "Please send us one of your words."

A night back came the answer, "Thanks."

World-Famous Stories

INKLE AND YARICO

By RICHARD STEELE

(Richard Steele, 1672-1729, was a famous British essayist and dramatist. He is best remembered today for his co-writing with Joseph Addison, "The Spectator Papers.")

Mr. Thomas Inkle, of London, aged twenty years, embarked in the Down on the good ship called the Achilles, bound for the West Indies, on the sixteenth day of June, 1674, in order to improve his fortune by trade and merchandise.

Our adventurer was the third son of an eminent citizen, who had taken particular care to instil into his mind an early love of gain by making him a perfect master of numbers, and consequently giving him a quick view of loss and advantage, and preventing the natural impulse of his passion by possession toward his interests.

With a mind thus turned, young Inkle had a person every way agreeable, a ruddy vigor in his countenance, strength in his limbs, with ringlets of fair hair loosely flowing on his shoulders.

It happened, in the course of the voyage, that the Achilles in some distress put into a creek on the mainland of America, in search of provisions. The youth, who is the hero of my story, among others, went ashore on this occasion.

From their first landing they were observed by a party of Indians, who hid themselves in the wood for that purpose. The English unadvisedly marched a great distance from the shore into the country, and were intercepted by the native, who slew the greatest number of them.

Our adventurer escaped among others by fleeing into a forest. Upon his coming into a remote and pathless part of the woods, he found himself, tired and breathless, on a little hillock, when an Indian maid rushed from a thicket behind him.

After the first surprise, they appeared mutually agreeable to each other. If the European was highly charmed with the limbs, features and wild graces of the naked American, the American was no less taken with the dress, complexion and shape of a European, covered from head to foot.

The Indian grew immediately enamoured of him, and consequently desirous for his preservation. She therefore conveyed him to a cave, which she gave him a delicious repast of fruits, and led him to a stream to slake his thirst.

In the midst of these good offices she would sometimes play with his hair and delight in the contrast of its color with that of her fingers. Then she would open his bosom and laugh at him for covering it.

She was, it seems, a person of distinction, for she every day came to him in a different dress, of the most beautiful elongated glass beads, shells and braids. She likewise brought him a great many spoils which her father had taken and stored to her, so that his cave was richly adorned with all the spotted skins of beasts, and most fancy-colored feathers of fowls which that world afforded.

To make his confinement more tolerable she would carry him in the dusk of the evening, or by the light of moonlight to unfrequented groves and solitudes, and show him where to lie down in safety and sleep amidst the falls of waters and melody of nightingales.

Her part was to watch and hold him in her arms for fear of her countrymen and awake him on occasion to consult his safety. In this manner did the lovers pass away their time till they had learned a language of their own. In which the voyager communicated how happy he should be to have her in his country, where she should be clothed in rich silks as his wife; coat was made of, and be carried in houses drawn by horses without being exposed to wind or weather.

All this he promised her the enjoyment of without such fears and alarms as they were tormented with. In this tender correspondence these lovers lived for many months, when Yarico, instructed by her lover, discovered a vessel on the coast, to which she made signal, and in the night with the utmost joy and satisfaction accompanied him to a ship's crew of his countrymen bound for Barbadoes.

When a vessel from the main arrives in that island, it seems the planters come down to the shore, where there is an immediate market for Indians and other slaves, as with us of horses and oxen.

To be short, Mr. Thomas Inkle now coming into English territories, began seriously to reflect upon his loss of time and to weigh with himself how many days interest of his money he had lost during his stay with Yarico.

This thought made the young man very pensive and careful what account he should be able to give his friends of his voyage. Upon which consideration the prudent and frugal young man sold Yarico to a Barbadian merchant, notwithstanding that the poor girl, to incline him to commiserate her condition, told him she was with child by him.

But Inkle, as he had been taught to be thrifty, only made use of the information to rise in his demands upon the purchaser and get a good price for her.

Thus ends the tale of Inkle and Yarico.

North: ♠ K 8 7 ♥ K J 7 ♦ K Q 8 ♣ T 8 4 2

West: ♠ 6 5 3 ♥ 10 9 8 4 ♦ 6 5 ♣ A K 10 9 6

East: ♠ A Q J 10 9 ♥ 6 5 2 ♦ 10 7 3 2 ♣ Q J

South: ♠ T 4 2 ♥ A Q ♦ A J 9 4 ♣ 8 5 3

Contract: The bidding at Contract is the same as at Auction, except that South, following North's assist, jumps the contract to four Spades.

THE PLAY

West leads the King of Clubs upon which East plays the Queen to denote the Jack or no more of suit. Had East followed with the Jack, West would read such play to mean the start of an echo with Jack or possibly, that East held the Jack alone. To determine which, West would next lay down his Ace and East would then complete a waiting game. East's play of the Queen absolutely denotes the Jack or no more. Without holding Queen, East would not signal with the Queen as he would be holding Jack-x or any two lower cards.

With the play of the Queen, West's defence becomes obvious. He takes down his singleton Ace of Diamonds and follows with a low Club, confident that East can hold the trick and will return a Diamond which West can ruff. There is nothing further to the play of the hand as South may make the remaining tricks one short of game. This hand well exemplifies the supreme importance of a partnership knowledge of the conventions of defensive signals.

Bonus Bidding

South	1st Rd.	2nd Rd.
West	1 ♠	Pass
North	3 ♠	Pass
East	Pass	Pass

Auction Bidding

South	1st Rd.	2nd Rd.
West	1 ♠	4 ♠
North	2 ♠	Pass
East	Pass	Pass

Knowledge is power! To prevent South from going game, the bonus bidder above hand, East and West must know the following: First, West must have a trick in reserve, initial lead is the King of Clubs. East, the Ace second, West must know that, with the Queen-Jack holding, East has power; response to West's lead of the King is the Queen, not the Jack. To play the Jack would deny the Queen; third, West must know that East's Queen, when played, can mean but one of two things, either the Queen is alone, or, if not alone it must be accompanied by the Jack; and thus that, in either event, East must be able to win the second round of Clubs, if West still leads low. With this knowledge, all that is required to save game is for West, after holding the first trick with the King of Clubs to lay down the Ace of Diamonds and then a low Club, to put East in the lead, and for East, when in the lead, to return a Diamond, obviously demanded by West's play.

GALLANT POINTS OF THE BIDDING

Auction: South bids one Spade, which East overcalls with two Clubs. North bids two Spades, concluding the bidding.

Contract: The bidding at Contract is the same as at Auction, except that South, following North's assist, jumps the contract to four Spades.

SHEFFIELD WILL HEAR MR. SNOWDEN

Speech From Chancellor of Exchequer at Cutlers' Hall Awaited With Much Interest

SHEFFIELD, Eng., Oct. 8—Considerable interest has been aroused here by the news that Right Hon. Philip Snowden, Chancellor of the Exchequer, has agreed to be the chief guest at the Cutlers' Feast, which is to be held here on October 24.

Sheffield has been as hard hit by the postwar industrial slump as any centre in the north of England. There are few places indeed which, in the present state of industrial reorganization, feel themselves obliged to view "Big Navy" reductions with more misgiving. In the days of feverish competition in naval armament with continental countries, the "heavy" trades of this city were almost always humming with activity. Blackbolders of Vickers, of Firth's, of Brown's and of Cammell's used to gather with the comfortable assurance of a continuance of satisfactory dividends. Nowadays the talk is all rationalization and reorganization of capital. It is rumored that the famous Cyclops works of Charles Cammell & Company, where Charles Cammell, in the early portion of the nineteenth, started armaments making on the large scale, are shortly to be closed, as the firm has been included in one of the great combines.

IN CUTLERS' HALL

It so happens that Right Hon. A. V. Alexander, First Lord of the Admiralty, is member of the Hillsborough riding of Sheffield. His earlier knowledge of naval matters can hardly have been profound, for he was long a prominent figure in the co-operative movement. For some years he was member of the Somersetshire County Council, and was for long a Baptist lay preacher.

The Cutlers' Feast may be likened to a Guildhall banquet of the North of England. The Cutlers' Hall, in which it is held, is indeed hardly less handsome than the Egyptian Hall of the London Mansion House. The Cutlers' Company of Sheffield has a history extending over some two centuries. In those easy political days when Autumn sessions of Parliament were very much less the rule than they now are, the Cutlers' Feast used to be regarded as a convenient rostrum from which a minister of the Crown could tell the world at large something of what the British Cabinet was doing or thinking during the last summer recess. Nearly every statesman of eminence during the last century has, at some time, been a guest at the Feast.

The Feast is said to have had its beginnings in an annual day's holiday which used to be taken by the cutlers of Sheffield, when they would chase a buck in Sheffield Forest and regale themselves upon it in the evening.

Harem Lady—Is it true that you murdered your last four wives?

Sultan—No; they were just victims of a practical joker.

Japanese Prince to Go Round World on His Honeymoon Trip

TOKIO, Oct. 11—Prince Takamatsu, second younger brother of Emperor Hirohito, and his bride, now Princess Kikuko Tokugawa, will make a honeymoon tour round the world in 1931.

Prince Takamatsu and the granddaughter of the last Shogun are to be married in Tokio next March. The Prince will go to England first as a state guest, returning the visit last May of Prince Henry, Duke of Gloucester, who came to Japan to invest the Emperor with the Order of the Garter. Official business finished, the Imperial couple will tour Europe and return to Japan by way of America.

MISS ADVENTURES

Intimate Pictures of H.R.H. the Prince of Wales

By EVELYN GRAHAM

(Biographer of H.R.H. the Prince of Wales, Queen Victoria of Spain, Princess Mary and the Duke and Duchess of York)

The Prince's ambition—The Prince on the enjoyment of hunting—H.R.H.'s "sympathetic friend"—The kill that was not a kill—A blinding accident to the Prince—A proposal of marriage—Hunting incognito.

It is very seldom that the Prince of Wales has any time to himself in the morning, but until his father's illness, when he did he would spend it when in season, in the hunting field. Hunting has always been his favorite sport, and the sacrifice that he made when he gave it up was far greater than everyone gives him the credit for. I remember once when he was up at Oxford, we were having a long discussion of what we should like to be if we had any choice in the matter. Considering that the talkers were probably men whom nearly every one in England envied as having the money and the opportunities to live an ideal life, I remember that one of them wished to be a golf professional, while another somewhat amusingly admitted that above all things he would like to write poetry, but it was H.R.H.'s reply that I remember the best, from the decision and the sincerity with which it was uttered. "I," he said, "should like to be a country squire hunting my own pack of hounds four times a week, in an unfashionable country."

This love of hunting has, if anything, grown with the years. The Prince is convinced that it is the finest sport in the world. He has but little sympathy with those who wish to see hunting suppressed in England. A friend of mine was once privileged to hear what the Prince of Wales thought about the agitation against hunting. "Though I have every respect," he said, "for those who object to hunting on humanitarian grounds, yet I think that they do not understand the facts of the case. In the first place the fox is killed almost instantaneously when it is caught by the hounds. In the second it has about a four to one chance of escape. And in the third, if it were not for hunting the race of foxes, of hounds, and of hunters, would become extinct."

The Prince is, of course, deeply attached to his horses, particularly to "Just an Idea," which he refused to sell at the recent sale of his stud. He was the first hunter that the Prince possessed and has carried his royal master over many a stiff bullfinch and wide yawning ditch. Never once has H.R.H. had a fall when riding "Just an Idea."

"He and I understand each other," the Prince was once heard to say. "He is such a sympathetic friend."

Now "Just an Idea" has been pensioned off and has gone to the royal farm to end his life in peace and plenty, with the wide moors to roam over, and a stable and good hay to come back to at nights.

There are all sorts of stories get about the clubs as to the Prince's ability as a horseman. The trouble is that every time he has a fall in the field it is widely advertised in the press. Now anyone who has ever hunted with the intention of being in the same field as hounds knows perfectly well that no season goes past without his having at least half-a-dozen falls, even with the best skill in the world, and as a matter of fact, the Prince has remarkably few falls when it is realized how much he hunts. I once asked an old huntsman what he thought of H.R.H.'s riding. "Well," he said, "e's got a good seat, and e's got a 'eart of a lion, I think. Trouble is that he hasn't got what I should call 'ands."

Now this old critic was a little too severe, he never would acknowledge that anyone born since 1850 could ride at all. As a matter of fact, however, he was right to a certain extent, for the chief failing of the Prince's horsemanship is his hands. With that proviso he is one of the plucksiest and best riders in all Leicestershire, and you have got to be a good man to be in at the kill before him. In fact, the Prince does not really consider that he has had a day's hunting if he is not in at the kill.

A friend of mine once fell in with him when he was on the way home. "Well," said my friend, who had had a nasty tumble early in the run, and had dropped out fairly early in the chase, "Did you kill?"

"No," replied the Prince mournfully.

"But I thought that you rolled the vixen over in the open, just beyond Pytchley."

"Oh, yes," replied the Prince, "they killed, but I was not there."

It is just because of this keenness to be at the death that H.R.H. has these falls of his at all. I remember once the first dozen of the field finding themselves boxed up in a field without a decent jump out of it, while all the while hounds were racing away from them with a breast-high scent. We were standing in a bunch before the only possible way out of the field where there was a slight gap in the hedge, but also an overhanging branch of a tree. Suddenly the Prince cantered up. "Stand clear there," he cried to X— who incidentally had competed over the Grand National Course, and without a moment's hesitation he galloped at the gap, and pulling his horse together under him, cleared it to a bound, but the overhanging branch caught his hat and jammed it hard over his eyes, so that for the next hundred yards he was galloping quite blindly over the next field. What would have happened if he had come to another jump I do not know, but fortunately, X—, who had summoned up his courage and followed the Prince without mishap, caught him up and managed to remove the broken brim from his eyes. There was another occasion, however, on which the Prince corbed his anxiety to be in at the kill. A little girl who was out on her first day to the hunting field in the custody of a groom, escaped from her guard and found herself being run away with her pony. H.R.H., who was in a field by himself trying to make up for a bad start, saw her careering madly over the meadow, and galloping alongside managed to stop the animal.

"Thank you," said the fair one to her rescuer. "Now you must show me where the fox is being killed."

"All right," said the Prince, "but first you must wear some gloves, or else in this wet weather the reins will slip through your hands, and we shall have you running away again." So he took off his yellow string gloves, and handed them over to her.

Knowing his country he was able to follow the hounds with her by means of bridle paths and they caught up with the pack soon after the kill.

At the entrance to the last field the child turned to him. "Now," she said, "you must go away, please. You know the Prince of Wales is here today, and I want him to see me riding in by myself. Then perhaps he will marry me."

At the next meet it was a very embarrassed young maiden who handed back the gloves to the smiling Prince. After all it is not often that anyone dares to propose to the Prince of Wales, but I am inclined to think that a little sportswoman of that type would have the best chance of being accepted.

As a matter of fact it is not often that the Prince of Wales is mistaken for someone else in the hunting field, the large crowds that flock to the meets are so anxious to see him that they are very ready to mistake other people for him. There was, however, one old farmer with whom the Prince fell in on the way back from a meet. The two fell to talking largely about technical matters to do with farming. After some time the farmer said to him: "We two seem to be made for each other, we must meet again. What is your name?" "Oh," said His Royal Highness, "I am the Prince of Wales."

"Lor'," replied the farmer like a flash, "I'm pleased to meet you, my son, I'm King George the Fifth."

That was off the stage with a vengeance, and the Prince of Wales is very fond of telling this story against himself, with a rather wistful air.

Overwork?

PERHAPS CONSTIPATION SAPS YOUR VITALITY

Is overwork the sole cause of your jangling nerves and everlasting tiredness? Or is constipation unadmirably robbing you of energy and health of body and brain?

Quaker Tillson's *natural* Bran is a dependable regulator of bodily functions.

The laxative qualities of *natural* bran are widely recognized. Yet, too often in this day of soft, refined foods, even bran is "dressed up," cooked, mixed and treated till it loses much of its 'roughage' value.

That is why, for your health's sake, it pays to use Quaker Tillson's *natural* Bran. It is pure, unmixed, uncooked bran, simply cleaned and sterilized.

Muffins made with *natural* bran are delicious. Try it every one or two at any meal. Quaker Tillson's *natural* Bran is now offered in the new, handy package. Simple recipes for wholesome bran baking are enclosed. *Natural* Bran makes best.
